
EXPLANATION

Contours on the base of the Pleistocene series, interval 40 feet, datum sea level.

- Well
- Electrical-resistivity station
- High-level valley partially confined by +40 contours, arrows indicate conjectured trend. Altitude of bottom ranges from +20 in north to -5 near canal.
- Medium-level valley, confined between -40 contours, grade ranges from -82 to -87, north to south.
- Low-level valley, confined between -80 contours.
- Latest valley, confined between -80 and -120 contours.
