Delaware Hens Trounce Kent State With Icy Victory In Refrigerator Bowl

Miller And Zaiser Spark UD Eleven In 19-7 Bowl Win

By RAY DeVRIES

The 1954 University of Delaware football team has completed one of the school's most impressive gridiron campaigns with a rousing post-season victory over Kent State University in the Refrigerator Bowl at Evansville, Indiana.

The Hens, who baked a cake made up of 7 wins and 2 losses during the regular season, took their tasty pastry out of the ice-box last Sunday and spread it with a 19-7 victory icing.

Although the elements were against both teams, a gathering of some 5000, including many Delaware partisans, watched the icy-cold, muddy contest. However, from all reports received, the weather was the only cold thing that occurred during the weekend.

After warm and wonderful treatment from the Jaycees at Evansville and the warmth of victory, the gridders received the most heart-warming reception ever accorded a Delaware team (Continued on Page 9)

Engineering Society Elects New Members

The Delaware Alpha Chapter of Tau Beta Pi, an honorary engineering society, elected pledges from the senior class and honor students from the junior class at their last meeting.

The seniors elected as pledges are: Robert Kewatch, Robert W. Gutekunst, Carlos De La Cuesta, Albert Garthwaite, John J. McFadden, John McDaniel, Arthur J. Holveck and Irven H. Rinard.

The juniors elected as honor students are Howard W. Anderson and John R. Eagle.

Present members of the society are Edward J. Taylor, president; David B. Ewing, vice president; Daniel C. Walton, recording secretary; George L. Houghton, cataloger; and Alvin J. Major, Jr., corresponding secretary.

The initiation banquet will be held on December 13.

Winter Wonderland To Greet Students At Christmas Formal

A blue and silver Field House will greet students tonight at the annual Christmas formal, the theme of which is Winter Wonderland.

Roy McKinley and his band will play for the affair, which is sponsored jointly by the freshman and sophomore classes. Roy McKinley caters especially to college dances and has played at more than 100 colleges within the last two years.

Ray feels that putting out an ordinary record means nothing to a band. He maintains that the "vocalist trend" has just about worn out the possibilities for dance orchestras. That is why he

WHAT'S UP? Although it looks as though the Hens Jimmy Zaiser is catching a pass, he is really fumbling the ball. He later made up for this mistake, by scoring Delaware's two final touchdowns. Don Miller, Bob Trivits and Jerry Weis are the Hens looking on.

Music Department Prepares Program Of Christmas Songs

The Music Department will present its Annual Christmas program on Wednesday, December 15, at 8:15 p. m. in Mitchell Hall. A program of Christmas music will be presented by the choral groups of the university under the direction of Bertram Gable and by a double brass choir under the direction of J. R. King.

The university A Cappella Choir, composed of selected voices from various schools on campus, will sing the following numbers: "O Magnum Mysterium," by Vittoria; "Hodie Christus Natus Est," by Sweelinck; "The Morning Star on High is Glowing," by Praetorius; and "To Us Is Born an Infant," by Praetorius.

Following the performance of those early compositions, the Women's Chorus will present the Ceremony of Carols by the outstanding contemporary British composer, Benjamin Britten. Traditional and better known Christmas carols will be sung by the Men's Chorus.

For the first time in public performance, the three groups will join a final chorus. This large group will sing "The Three Kings," by Heally Wilan, and "Fantasia on Christmas Carols," by Vaughn Williams. For the latter, Kenneth Wilson, baritone, will be soloist. These choral groups are all under the direction of Bertram Gable, who is in (Continued on Page 11)

Committee To Raise Index Requirements Starting In January

It has been announced that the index requirement to be on the Dean's List will be raised from 3.00 to 3.25.

This decision was made by the committee on Undergraduate Scholarship in an effort to bring the Dean's List at Delaware more into conformity with the requirements of Dean's Lists at other colleges and universities.

Dean Francis Squire, chairman of the committee, said, "We want it to be an honor to be on the Dean's List."

The committee which consists of the Deans of all the schools, the Dean of Students and the Registrar, made a careful study of the percentage of students on the dean's lists at other institutions and their requirements. They found the percentage of students achieving this honor much higher, than at other institutions.

The new index will go into effect in an. "It is not a drastic revision," said Dean Squire, "and we've been considering it for some time."

NOTICE

The last meal before the Christmas vacation will be the noon meal Saturday, December 18, at the Commons Dining Hall. The doors will be open till 1:30 p. m. Kent Dining Hall will not be open for this meal.

Building To Feature Dining Hall, Snack Bar, And Lounging Space

Minimum Student Union facilities will be incorporated in the new dining hall, to be built on the site of the Knoll. This resolution was passed as the Board of Trustees approved a \$500,000 expenditure, in addition to the \$738,000 already approved in June, toward the construction.

Committee Plans Interdorm Party For December 17

The Men's and Women's Interdorm recreation committee, under the direction of Charles Jacot, is planning an Open House Christmas Party on Friday, December 17.

Every student on campus is invited to attend the party which will be held in Brown Hall lounge and recreation rooms. There will be no admission charge, and the party will feature entertainment, refreshment, dancing and games.

The Open House will be the second such event to be held this semester in Brown Hall. At the co-recreation committee meeting on Tuesday, December 7, at Brown Hall, the students organized committees and made final plans for the party.

In charge of publicity for the program are Ellen Hoffman and Helen Eckhardt from Smyth Hall, Dick Harris of Harter and Dick Henson from Sharp Hall.

The refreshments committee for the affair is made up of Shirley Tibbet of Sussex, Pat MacFarland of Johnston, Helen Wilgus of Cannon, Jim Walton of Sharp, John Pichette from the Knoll, and Mike Carlton from Brown Hall.

The music committee consists of Donald Lull of Brown, Karen Russell of Smyth, and Bruce Bartholomew from Brown Hall.

The group in charge of decorations and entertainment is made up of Joan Forsyth and Pat Samples from Smyth, Doug Roberts of Mosher and John Morris from Brown Hall.

Four men students from Brown Hall are in charge of cleaning up after the affair. They are: Don Jost, Mike Carlton, George Stevens and Don Lull.

A freshman, Mary Ann Hall, is in charge of securing chaperones for the evening.

The whole program is being coordinated by Chuck Jacot, Chief Resident Advisor of the university.

Delaware Students Construct Nativity Scene For Christmas

For the second successive year, students of the university will build a creche on campus as part of their observance of the Christmas season.

Initiated last year by Glenn Dill, editor of the *Review*, the creche, or nativity scene, will be the result this year of the combined efforts of various groups on and off the Delaware campus.

The shelter which will frame the scene, was constructed by the university's maintenance division through the co-operation of Mr. Stewart Allmond, superintendent of buildings and

Besides the dining and kitchen areas, the building will contain at present a snack bar, a book store, lounge space and rooms for the student publications and for SGA. Eventually the edifice will be expanded to include other facilities.

"Architectural studies are now being made," stressed Dean John E. Hocutt, Dean of Students, "but it will be some time before the plans are in the final stage and construction will begin."

Seating capacity for approximately 600 diners is planned; but the space will permit about 1200 students to eat there in cafeteria style with extended meal hours.

Probably the space vacated by the book store, Scrounge and student publications in the basement of the library will be used by the library for extended book storage.

The new dining hall will replace only Commons, not Kent. No definite plans have been made as to the use of Commons excess space after the other dining hall is opened. It is most probable that the space will be utilized as classrooms.

KDP Honor Society To Hold Pledge Tea

Kappa Delta Pi, an honor society in education, will hold a Pledge Ceremony and an informal tea for new candidates, Tuesday, December 14, at 4 p. m. in Warner Hall.

The following students have been approved for membership by the chapter members and the Dean of Education:

Seniors: Cecile B. Snyder, Janet Morris, Beatrice Kaminsky, Frances E. Stafford, Carole Collins, Nancy Peck and S. Ann Short.

Juniors: Joanne Oechsler, Margaret Custis, Leone Lang, Marilyn Mayo, June Andres, Carole Isenberg, Martha Baldwin, Isabelle Smith, Betty Timmons, Filomena Giammarco, Frances McNeal, Elise Wise and Shirley Hanby.

grounds, and the SGA, which provided the funds to meet the cost of construction.

A transparent screen to protect the outside of the shelter has been supplied through the courtesy of the DuPont Company of Wilmington.

Three Wilmington stores, Sears, Roebuck and Company, J. C. Penney and Strawbridge and Clothier have loaned the mannequins which will be used as the figures in the nativity scene.

Costumes for the scenes have been supplied by the E-52 University Players, and students in (Continued on Page 6)

UD To Limit Frosh Entering Next Year. Lacks Dorm Space

Due to inadequate dormitory space, the university will arbitrarily limit the number of incoming freshmen next year.

This will probably cut down the number of out-of-state students who wish to enter, and would "assure that every Delaware student attending the university and wanting to live on campus will have an opportunity to do so." It is planned to get more land nearby for future expansion.

This was announced in Dr. John A. Perkins' annual report, consisting of two parts: capital outlay and increase in operating budget, which was presented to the Board of Trustees.

The university is asking for \$1,500,000 for dormitory space for 200 men and more dormitory space for 100 women. The university is also requesting \$200,000 for health services (infirmary); \$25,000 to replace the buildings at the university's Georgetown Agricultural Experimental Station which suffered losses from Hurricane Hazel; and \$1,000,000 for addition for the engineering building. This makes a total of \$2,725,000. The university really uses \$10,000,000 but gets the remainder from students' fees, endowments, and federal grants.

Another section of the 59-page report contained information about a request for \$91,725 for salary increases for faculty and maintenance staff. Even with a five percent increase, salaries would not be up to par with 1941 in terms of cost of living.

About 378 students hold 515 grants, scholarships and jobs. So about \$170,992 is used for this purpose, with 90 scholarships totaling \$37,400 coming from outside agencies and persons.

Constructing a budget is not a quick job. Work begins in the spring when each individual group holds a conference and makes out a budget request. Then the request is submitted to the budget committee, which makes a total budget which then must be approved by the

(Continued on Page 7)

Tassel Girls Plan Hospital Program

Tassel will present a Christmas Program at the Flower Hospital on Tuesday Evening, December 14. The girls decided on this program for their Christmas project, for it presents a situation in which they give their service rather than buy presents and serve food.

On Sunday Dec. 5, a tea was held from 3 to 5 p. m. at President Perkins' home in honor of Mortarboard alumnae of this area.

Mortarboard is the society to which Tassel will eventually belong. Among the notables present were former Dean Amy Rextrew of Dover, Mrs. Tanenberg of Wilmington and Mrs. McAdams of Wilmington.

The guests were received by Dean Ayers and several members of Tassel. Some of the girls who received were: Anne Short, Cynthia Flery and Nancy Peck. Carolyn Weimer was in charge of the name tags for the guests. Mickey Blaine was in charge of the refreshments and Ginny Larson fixed the centerpiece.

Veterans Group Selects Officers

James D. Givens has recently been elected president of the Veterans' Organization. Other new officers are: Charles Wilson, vice president; Ellis Whitman, recording secretary; Joseph Talarowski, corresponding secretary; and Art Hodges, treasurer.

For the office of corresponding secretary Joe Talarowski was elected with George Tice. To break the tie, a run-off vote was taken.

A BEVY of sprites entreat Bottom not to make a complete ass out of himself. Left to right: Suzanne Kozak, Kathy Jordan, Barbara Miruk, Barbara Nast and, beneath the long ears, Obie Edge.

E-52 Dreams On A Summer Night In Current Mitchell Hall Production

One of the most laugh provoking plays in the history of drama, "A Midsummer Night's Dream," will be presented by the E-52 University Theatre in Mitchell Hall tonight and tomorrow night at 8:15 p. m.

Not for 14 years has a show as funny as this one been presented in this area and, at that, it had to be another production of the same play.

The comedy of this show, one of Shakespeare's finest, is being emphasized from start to finish by Dr. C. Robert Kase, the director, and the large group of veteran performers.

"A Midsummer Night's Dream" is the story of four lovers whose affections become mixed up when a wood sprite pour the love making nectar into their eyes. It is after this that the queen falls in love with Bottom, the weaver, not because of himself but because of the ass's head that he wears over his own.

It is also the story of a play, nor a good play, but a play put on by a troupe of actors headed by Bottom. The scene in which this second production is presented is probably one of the funniest scenes in any show.

Tickets are on sale at the box office in Mitchell Hall from 3:30 p. m. to 5 p. m. this afternoon and can be obtained before either of the two remaining performances. They are available at no cost to students with the presentation of ID cards.

Current Art Exhibit Features Pre-Columbian Art Of Peru

The current exhibit in the Library's Art Gallery is a collection of Pre-Columbian Art of Peru, a gift of Miss Jane Maxwell.

Miss Maxwell of Newark, who died in the spring of 1954, has willed this collection of Peruvian pottery to the university. The gift has been presented in memory of Miss Maxwell's father, James Maxwell, who was an engineering student at the university in 1858.

Miss Maxwell's father, a civil engineer of importance during the last half of the 19th century, discovered the pottery in Peru while constructing the first railroad across the Andes.

His workmen struck a burial mound containing pottery vessels of various kinds, water jugs, portrait jugs and animal shaped vessels, as well as other objects such as tools for shaping pottery, whirled for spinning, small needles and bone spears. By permission of the government, he shipped a large collection to the United States, part of which became Miss Maxwell's property.

Miss Maxwell herself was born in Peru in 1874. She made her first long trip at the age of six months, crossing the Andes on her way to the United States. Since the railroad her father built was still unfinished at the time, the trip had to be made by her mother on mule back, the baby on her lap. Miss Maxwell's first home in the United States was Newark and here she lived much of her life.

Fed. Agencies Offer Smyth Girls Hold Tea

Students majoring in engineering, chemistry or physics may obtain jobs as trainees during the summer. Positions are open in the following Federal Agencies: Philadelphia Shipyard, Naval Air Material Center and the Naval Boiler and Turbine Laboratory.

An examination must be taken in order to be considered for a position. These examinations will be used to recruit college students in both the co-operative education plan and the summer employment plan.

Further information may be obtained at the Placement Bureau.

Smyth Girls Hold Tea

Smyth's biggest social function for this semester, the Parents' Tea, was held last Sunday, December 5. Those present were parents, the deans of the five schools and several of the faculty.

A sextet consisting of Jody Baldwin, Lee Lee Hannold, Franny Hamilton, Pat Samples, Mary Stephenson and Nancy Van Seiver sang a medley of three songs having a dedicatory purpose, "Bless This House," the first in the medley, was dedicated to Smyth.

"I Think You're Wonderful" was dedicated to the parents who are responsible for their being here at the university and, lastly, "I'll Be Home for Christmas" was in acknowledgement of the coming Christmas vacation. The girls were accompanied on the piano by Carol Brown, who is also accompanist for the A Cappella Choir.

Dr. Edwin C. Byam To Retire From Modern Language Dept.

Dr. Edwin C. Byam, chairman of the Department of Modern Languages at the University of Delaware, has announced his retirement after serving as a member of the faculty for the better part of the past thirty years.

A 1920 graduate of Boston University, Dr. Byam received his master's degree from Harvard and his doctorate from Johns Hopkins. He has traveled widely in Europe, including periods of study from 1921-23 and 1935-36.

Presbyterians Plan Advent Communion

There will be an Advent Communion at the Presbyterian Church on Main Street, Wednesday, December 15. Communion will be served promptly at 7 a. m. by the Reverend Robert Andrews of the Westminster Foundation.

The women of the church are preparing a breakfast following the services, so there will undoubtedly be no shortage of food as there was at the November service. Breakfast will be over in time for 8 a. m. classes.

The weekly Vesper Program, followed by discussions and a coffee hour, are open to all students. The Westminster Foundation would like to see you there this coming Sunday at 8 p. m. in the chapel of the Presbyterian Church on Main Street.

There are more out-of-state students enrolled in the University of Delaware from New Jersey than from any other state.

For five months during 1930 he served as acting director of the Foreign Study Group in Paris. In 1929, he was made an "Officer d'Academie" by the French government and in 1934, France named him a Chevalier de la Legion d'Honneur.

Dr. Byam joined the University of Delaware faculty in 1925 and became head of the Modern Language Department in 1937. He served for many years as Secretary of the Committee on Foreign Study.

In 1943-44, he spent his sabbatical leave in Mexico and in 1945-46, he was selected by the U. S. Army to occupy an important position in the University Center established at Biarritz, France.

This center was planned to provide instruction for veterans in diverse fields of Arts and Science, Business, Agriculture and Engineering to prepare them for entrance into universities upon their return to this country.

Dr. Byam is a member of the honor societies of Phi Beta Kappa and Phi Kappa Phi, as well as a member of the Sigma Alpha

Get Acquainted

Why Does The Pselaphid Not Cross The Tide Flat?

By Nancy Stewart

The University of Delaware is honored to have Dr. Robert Stearns Howard on its staff. Dr. Howard is presently concerned with ecology, that is, the study of animals in relationship to their environment.

Last summer Dr. Howard took a trip to New Orleans, around the Gulf to Key West and up the Atlantic Coast, the purpose being to collect specimens to aid him in his research. Stopping every twenty-five miles, he brought back with him many specimens; these being a species of earwigs, beetles and pseudo-scorpions. The whole purpose of Dr. Howard's research and investigation is to discover why these animals are found only on the shore line. For instance, it is still unascertained as to why the type of beetle, the scientific name being pselaphid, which he collected, lives in the sort of environment it does, while the rest of the species live in the forest. The subjects of Dr. Howard's investigation can only be found in the intertidal region; that is, they are found between low and high tide.

Some of Dr. Howard's findings have been printed in the Biological Bulletin, a publication of the Marine Laboratories. There are many possible reasons why these

animals inhabit only one particular place. One possible explanation is that they are restricted to the tidal region because they cannot compete with other life in another environment. Another theory is that they are more successful and more highly developed. This too, is offered as a possible explanation. However, it appears that the answer will only be found by observation and constant experimentation.

Dr. Howard received his BS from the University of Chicago in 1947. His Masters and MS Degrees were obtained at the University of Miami in Coral Gables, Florida, and his Ph. D. was received from North Western University, Evanston, Indiana.

Dr. Howard has been with the University of Delaware since the fall of 1953. Previous to that time he was associated with the University of Pennsylvania for one year.

UD Representative Visits NAM

WILLIAM K. BROWN, New Castle, a student at the University of Delaware, is pictured as he accepted a certificate of recognition from Robert H. W. Welch, Jr., chairman of the Educational Advisory Committee of the National Association of Manufacturers, during the 59th annual Congress of American Industry in the Waldorf-Astoria Hotel.

How would you feel if you were asked to represent your state in a conference with the nation's industrialists?

William K. Brown, a junior, who has recently returned from the 59th Annual Congress of American Industry terms his participation in the conference as "An enjoyable and worthwhile experience."

Student representatives from each of the 48 states as well as 14 students who were sponsored by special business groups attended the conference along with Bill. The meeting was held from December 1 to 3 and sponsored by the National Association of American Manufacturers. They met in New York City at the Waldorf-Astoria Hotel. Besides the 62 students, there were businessmen from firms ranging in size from 20 employees to gigantic corporations such as United States Steel.

The theme of the conference was "building a better America." At one of the selective panel sessions, of which Bill was one of 26 participants, the students were quizzed by top industrialists. During this discussion, the

(Continued on Page 12)

UD Sends Delegates

Of Students And Staff To NIC Conference

Spencer Hedger, President of the Interfraternity Council; Dr. J. Fenton Daugherty, advisor of National Interfraternity Council; and John E. Hocutt, Dean of Students, attended the National Interfraternity Conference in Friday and Saturday, December 3 and 4.

The conference, which took place in the Bellevue Stratford Hotel, was held in two simultaneous sections. The only joint events during the conference that the undergraduate divisions had were the luncheon and the banquet. The Honorable Robert T. McCracken, Chairman of the Board of Trustees of the University of Pennsylvania, spoke on "The Influence of Fraternities" at the luncheon.

More than 500 representatives, which included members of sixty national social fraternities, of Interfraternity Councils, and Deans of Men participated in NIC.

Dean Hocutt participated in a panel discussion on "One Means of Meeting Today's Challenge to Fraternities: Alumni Interfraternity Council." Seven other people were on the panel, including two student chairmen, two alumni interfraternity council members, a past chairman of IFC, and others.

The agenda of the Undergraduate Conference included panel discussions on methods of improving the operation of Interfraternity Councils at the campus level, scholarship improvement, public relations and rushing activities.

Delbert N. De Young received a B.S. in Chem. Eng. from the University of Wisconsin last June. Now he is working for an M.S. degree. By asking questions, he's learned that many excellent industrial opportunities are passed over because they're not understood by the average undergraduate.

Clarence "Ding" Bell answers:

Well, if I said "All sorts," it might sound a bit vague to you, Del, but it would be very close to the truth. That's because technical sales work at Du Pont—bearing in mind the great diversity of products we have—is broader in scope than a lot of other technical assignments, and requires additional talents.

Let's suppose that one of Du Pont's customers is having technical difficulties—needs help in adapting "Teflon" to a specific gasketing application, for example. When our sales representative calls, he naturally must carry with him the engineering knowledge that's the basis for sound technical advice—data on flexural fatigue, chemical passivity, and deformation under load. The customer is receptive. He wants to make a better product, increase his sales, reduce costs—or do all three. Naturally, he's looking for reliable technical advice and intelligent actions that apply to his specific conditions. With the cooperation of the customer and help from our own research people, when necessary, the problem will sooner or later be "licked."

We have found, though, that if a technical service

man is going to be truly effective in such a situation, he must possess certain human qualities in addition to his technical ability. That is, he must really like people and be sincerely interested in helping them solve their problems. He must—in every sense of the word—be an "ambassador" who can handle human relationships smoothly and effectively.

Take the depth suggested by this simple example, Del, and multiply it by a breadth representing all the challenging problems you'll run into with Du Pont's diversity of products. If your slide rule isn't too far out of alignment, the resulting area should give you some idea of what I meant by "all sorts" of work.

Let me emphasize one more point. The importance of effective sales work is fully understood and appreciated at Du Pont! In the past, sales work has been one of the active roads to top management jobs. There is every reason to believe that this will continue in the future.

Clarence D. Bell, B.S., Chem. Eng., Univ. of Pitts. (1937), joined Du Pont as a chemical engineer immediately after graduation. He began in the research group of the Ammonia Department, progressed steadily through assignments on nylon and a number of other products. Today he is an Assistant Director of Sales in the Polychemicals Department.

A Spirited Victory

By The Big Team

The culmination of a great football season has also seen a great change in pep and enthusiasm at the University of Delaware.

The high point of the football campaign could be debated, but the high point of school spirit occurred 8 hours after the curtain was dropped on the 1954 football season.

A spontaneous movement came from points all over campus as soon as the icebox door was closed with a victory. The movement by the students was the start of the best-organized and best-attended pep fest this university has ever seen.

According to members of the victorious Blue Hen Bowl team, the greetings of some 200 well-wishers and students at the airport was like a "dream." But they were all stunned, thrilled and overjoyed at the reception accorded them at 2 a. m. Monday morning by more than 700 students.

All agreed that the bowl game was a thrill and an honor. Everyone was sold on the treatment by the Junior Chamber of Commerce of Evansville. The Carpenter Field House reception was, in the words of Steve Butcher, "The most wonderful part of the football season. I wish I had four more years at Delaware."

Congratulations and thank you's are in order for: two wonderful Deans, John Hocutt and Bessie Collins, who were in there pitching, cheering and organizing the festivities, shoulder to shoulder with the students; Chuck Jacot, who worked along with the deans and handled the master of ceremonies chores in an expert way; Mr. King and the band for their music; the fraternities for their organizational inspiration, especially Sigma Nu for providing dance music; and finally the cheerleaders.

A number of firsts were established during the course of the evening. It was the first time there has been dancing in the field house past 1 a. m.; it was the first time all women students have been allowed to stay out past 2 a. m.; and, most important, it was the first time the students have appeared all for Delaware and Delaware for all. Instead of being a football team and a cheering section, it was one "big" team. Let's keep it that way.

Letters To The Editor

(All letters to the editor must be signed. Names will be withheld on request, but unsigned letters will not be accepted).

To the Editor:

It seems that part of the nursery has moved into the Scrounge lately. This has been evidenced by the mounds of sugar heaped on the tables and deluged with coke, making nifty mud cakes. These kids even like to play photographer by opening the

napkin containers and snapping the pictures, pulling out the "pictures," i. e. napkin polaroid style. For this reason, the napkin dispensers have been put away temporarily. But there is a dispenser available for use on the sandwich counter.

Seriously, though, we hope that this is not an indication of the manner in which these few students will continue to act and that these silly capers will not be carried over into the new Student Union.

Hopefully,
Student Union Committee
Stan Lowieki
Joan Rose

'Neath The Arches

By Marty Baldwin and Jack Mealey

When the boys left Evansville, they must have forgotten to shut the Refrigerator door—'cause, "Baby, it's cold outside."

The reception committee at the airport voted it the coldest spot in the state of Delaware. However, the weather in no way cooled the reception that the team got. The warmest of all was the one Dan Ford received, Jody really hung one on him.

The greatest show of school spirit shown on this campus kept the field house boiling over from eleven to two. Braving the balmy breezes, some 700 kids turned out to give Delaware's finest team a red-hot reception—a great tribute to a great gang.

While things were cool and quiet at Evansville, things were hot and bouncing at the Ape house as the Rebels invaded to combine their talents in a gambling venture. Going broke over the dice table were Pat Gerstenberg and Rich O'Conner. Meanwhile Mal Silverman and Gordon Pizer were busy dealing Black Jack. Just as things got rolling, Ed Braniecki hollered "cops," and Willie Keene saved the day by giving them their cut and sending them home.

The opening basketball game of the season was a thriller. A caravan moved out to C. I. after the ball game for a little refreshment. Among the aggregation were Elise Wise and Tom Jenkins, along with Monk Evans and Betty Paul.

A portion of south campus moved to Wilmington Saturday night to go to Mask and Wiggling. From the looks of some of them on Sunday morning they still had their masks on. Eileen Dalton and Babs Waldman still haven't found their shoes.

The deep freeze has cooled the campus commandoes off. There are only two pinnings reported this week. The long rides to Central Jersey have paid off for Bill Hobson, who pinned Judy Campomenosi. Also thawing out was Neil Pirnie with his pinning of Pat Kane. Many congratulations to both couples.

Well—We'll see you all to night at the big dance!

Impressions

There has been a lot of complaining during the past few years that Delaware is a commuter's school. This week we asked a group of students if they agreed with this and, if so, why?

Louise Ferdon: I think Delaware is a commuter's school. The only thing I can think of that would help the situation is to have sororities. This would keep the girls closer so they would stay down and wouldn't depend on fraternities for all social life. However, this is the only argument for sororities that I know of.

Dick McKelvie: It certainly is a commuter's school. There's nothing to do here but go to the movies and there is much more to do in Wilmington. Besides, I can get a good meal in Wilmington.

Jay Bargley: It's pretty much a commuter's school, because too many of the students are from Delaware or surrounding states. The social life is deficient.

Sherry Stolper: Not many of the students go home on weekends, especially in Smyth. I think the SGA should put on some things and not leave it to the fraternities all the time. I think that so far there have been enough activities, and the turnouts have been pretty good.

Ted Hughes: Delaware is a commuter's school because it's so close to Wilmington. However, it's more fun not to commute and I think you get the full benefit of college life by living down. The people who go home on weekends, especially boys, are the ones who live in dorms and aren't associated with fraternities. If they were they would stay down and go to house parties and dances.

Elsie Wise: I think this is a commuter's school. They ought to have good movies here on weekends instead of westerns

Taken For Granted

JACK GRANT

With all the confusion in Asia and the rearmament of Germany in Europe, it certainly is easy to forget our relationships with the Latin American countries.

Only recently there was an Inter-American Conference of Finance and Economic Ministers in Petropolis, Brazil. One wouldn't even know of this very important conference unless he had searched in the back pages of his newspaper.

The United States' Assistant Secretary of State for Inter-American Affairs, Henry F. Holland, said at the conclusion of the meeting that the United States had found complete unanimity with the Latin American countries on aims to be pursued in the economic field. He said that the conference had been highly satisfactory for the United States delegation.

He defined the recently coined phrase "good partner policy" as representing an evolution in the good neighbor policy, corresponding to the evolution in Inter-American relations. It implies, he said, not merely friendly co-operation, but a sense of responsibility on both sides.

After reading the front page of any newspaper, it does the heart good to read of this sort of unanimity being reached over the conference table. An agreement that is not designed directly for the mutual protection against an aggressor is hard to find in these days of turmoil.

In the last issue of the REVIEW we made reference to Fordham and the reasons—as we understood them to be at that time—for their not debating the national topic for this year. It was because "a clear moral question prevents us from debating."

Last Saturday at a novice debating tournament at Temple University, we had the opportunity to discuss this matter with a debating coach from Fordham. The coach was judging the debate between the University of Maryland and our own team.

We asked her just what was the moral issue and she didn't seem to know what we were talking about. She said that it was obvious that Fordham was debating because she was there and with a team from the university.

After further discussion it turned out that only students in the ROTC couldn't debate. As far as we are concerned this only complicates matters, but rather than discuss it here we just pass the information along for the record.

The conclusions of the censure proceedings just concluded by the Senate are truly amazing. Did you ever dream that he would NOT be censured for any activities or incidents occurring during investigations of the committee of which he is chairman, but rather for incidents more or less of a personal nature.

It is a pity that the investigation of Communist activity in this country must be hurt so merely because of a clash of personalities.

Urnst & Ienst

Ceiling Unlimited

(Continued from sometime)

As you will no doubt recall, we left our heroes, Urnst and Ienst, in a rather precarious position, trying to escape the campus cop not only for parking a vehicle on campus without a proper tag, but also for illegally removing campus property with the aid of mystic anti-gravity bongo juice.

Now we find the boys dashing through the Scrounge with the "law" in hot pursuit. Unfortunately they collide with a luckless freshman who is joyously carrying his morning eggs to the table. Several drops of the bongo juice are dislodged from the bottle and sprinkled on the Frosh's hen fruit. As the eggs float upward toward the greasy ceiling, the frosh is left to frustration, not knowing whether to chase his tormentors or his breakfast.

As the boys round the corner to the Scrounge, stairs a rise leading to that haven—the library. Unbeknownst to them a few drops of the juice are flung onto a nearby phone booth. As they head up the stairs, little do they know of the drama that has unfolded back at the phone booth. The few drops have their effect and the booth floats quietly to the ceiling. The occupant, poor lad, concludes his love talk and hangs up the phone. He steps out, plunging to the floor eight feet below, just as the campus cop passes beneath. Unfortunately the irate frosh in pursuit of his egg-stealing tormentors is unable to stop and crashes into the pile of bodies. The three victims untangle themselves and head for the library with sweet revenge in mind.

Upstairs Urnst and Ienst are seeking a place to hibernate until the storm blows over. Unfortunately they round a corner at the same time as does a member of the library household staff, who is pushing a load of books on the "square-wheeled limited." The boys try in vain to maintain the equilibrium of the little bottle, but their efforts are to no avail and librarian and book cart are drenched.

Seconds later, the sight of one of his employee's wheeling the cart along upside down on the ceiling is too much for Dido Lewes, who promptly retires to the stacks for an aspirin or two.

As the lads head for the exit, the DEAN suddenly enters from one door, while up the stairs charge the cop, the egg-eater and the telephone boy. Finding themselves trapped, the boys risk their fortune and freedom on a desperate step. Urnst sprinkles just enough bongo juice on the advancing DEAN to raise him slightly off the floor where he hangs suspended like a toy balloon. The three avengers make their entrance, but come to a screeching halt to find their beloved DEAN in such a dishonorable state of inverted elevation.

Torn between their duty to the DEAN, being eager to bring him back to a decent footing, as he is vocally bemoaning his fate, and the desire to capture the perpetrators of this dire deed, the three stand frozen in their tracks. This is more than enough time for Urnst and Ienst to make a frenzied getaway out the rear door.

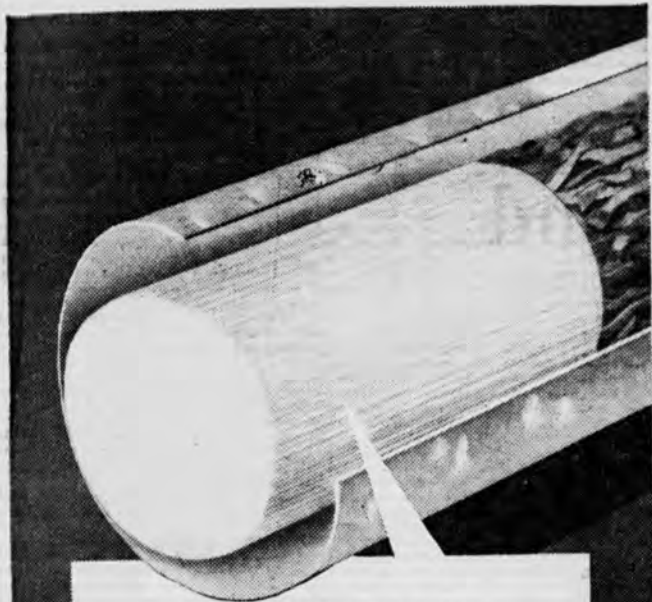

Looking for a place of escape the boys head for the jungle of South Campus. As luck would have it, Urnst, bearing the juice, trips and douses himself and his companion liberally with the remainder of the bongo fluid. Fortunately, a handy pomomey tree breaks their upward fall—as the three avengers thunder by below, hot in pursuit.

The boys, their magic fluid gone slide down the tree when the coast is clear and set out gayly in search of new adventures.

all the time, so the kids wouldn't have to go to the Wilmington movies. Campus life would be more interesting on the weekends if people would stay down for some of the activities that are planned.

The question for next week will be, "Should students have a limited amount of cuts?" If you care to voice your opinion, just write it down and send it to Jean Evensen, Box 354. Please include your reasons and sign your name.

What have VICEROYS got that other filter tip cigarettes haven't got?

THE ANSWER IS
20,000 FILTERS
IN EVERY VICEROY TIP

Inside every Viceroy tip is a vast network of 20,000 individual filters to filter your smoke over and over again. You get only the full, rich taste of Viceroy's choice tobaccos . . . and Viceroy's draw so freely.

Yes, you get Viceroy's remarkable new tip . . . with 20,000 individual filters . . . plus king-size length for only a penny or two more than cigarettes without filters.

**WORLD'S LARGEST-SELLING
FILTER TIP CIGARETTE**

Only a Penny or Two More than Cigarettes Without Filters

Helen Phillips, Soloist Appears In Concert

By CORNELIA V. MYLREA

Helen Phillips, soprano from New York, was the eleventh hour replacement due to the illness of Phyllis Curtin. She presented the second concert in the current Artist Series in Mitchell Hall on Wednesday, December 1st.

Miss Phillips possesses a beautiful soprano voice of a wide range from chest tones to clear high ones. She has a keen appreciation of music and sings with good style and clear enunciation. She was ably assisted at the piano by Kelley Wyatt, a most sympathetic accompanist.

The program covered a wide selection of music, from early classic to American Negro Spirituals. As her first selections she chose two works from a Latin Oratorio by Antonio Vivaldi, "O Servi Volate" and "Vieni, Vieni" were sung sotto voce with clear enunciation and warm tones.

"Danza, Danza, Fanciulla Gentile" by Francesco Durante was bright and pleasing.

Three little known lieder by Clara Schumann followed. "Ich stand in dunklen Traumen," "Liebst du um Schönheit" and

"Er is gekommen in Sturm und Regen" were softly spoken in clear German diction. "Wer hat dies Liedchen erdacht" and "Scheiden und Meiden," two folk songs by Gustav Mahler were brightly intoned with good climax.

Miss Phillips not only possesses skill in the soft interpretive works, but has dramatic ability as well. "L'Altra Notte" from "Mephistophele" by Boito was sung with power and dignity. So well was this received that as an encore, she sang "Vio lo sapete, O Mamma" from Cavalleria Rusticana by Mascagni.

A group of songs in English followed. "I Brought A Bright Sword" and "Slave Girl's Song" by Gail Kubik were exacting songs requiring sustained tones. "Sleep Now" by Samuel Barber was in the modern idiom, while "Hills" by Frank La Forge was sung with power and evident enjoyment.

Miss Phillips is well fitted to sing spirituals. She sang three, "City Called Heaven," arranged by Hall Johnson; "Hard Trials,"

a humorous one arranged by Burleigh; and "My Soul has been anchored in the Lord" arranged by Boatner. These were most enthusiastically received. As encores Miss Phillips sang "On My Journey" arranged by Boatner, and "Tell Me O Blue, Blue Sky," by Giannini.

Students Granted Christmas Leave

Students who wish to request permission to extend the Christmas recess in order to accept pre-Christmas employment are advised to apply to the Dean of Students or the Dean of Women. Application is made on a special form obtainable from the Office of the Dean of Students.

The policy which has applied the last two years in ruling on such requests is to be followed again this year.

To receive favorable action on such a request, the student must meet six requirements, including a cumulative index of 2.0 or better; no deficiency grades at the current mid-semester report period and certification from each of his instructors.

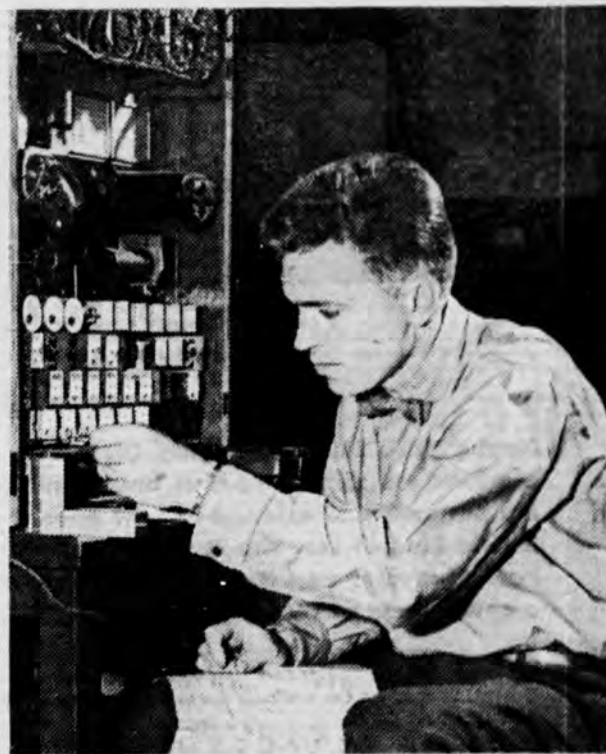

A student will not be granted permission to be absent prior to Wednesday, December 15, to engage in pre-Christmas employment.

A CAMPUS-TO-CAREER CASE HISTORY

"All the answers aren't in the book"

W. D. Garland, E.E. '52, Univ. of California, is working for the Pacific Telephone Company. We thought you'd be interested in what Don told us about his first assignment.

(Reading time: 45 seconds)

Here Don Garland makes noise distribution measurements with a Level Distribution Recorder

"My job is to help solve problems of noise and other interference on telephone lines due to power interference. Inductive co-ordination is the technical term for the work.

"First thing the Chief Engineer explained to me was that 'all the answers aren't in the book.' He was right. Most of the problems have required a combination of electrical engineering, a knowledge of costs and generous amount of ingenuity. I like it that way. It's given me an immediate opportunity to put into practice the theory I learned at school.

"In addition to this on-the-job experience, I have attended several special training courses conducted by the company. Now I'm breaking in a new man, just like when I started."

Don Garland's work is typical of many engineering assignments in the Bell Telephone Companies. There are similar opportunities for college graduates with Bell Telephone Laboratories, Western Electric and Sandia Corporation. If you'd like to get more details, see your Placement Officer. He will be glad to help you.

BELL TELEPHONE SYSTEM

Delaware Students

(Continued from Page 1)

the art department will assist in the decoration of the creche. Members of the Delta Tau Delta fraternity have helped in handling and storing the shelter previous to its erection on campus.

The music department will lead student carolling at the creche following the department's annual Christmas pro-

gram in Mitchell Hall on Wednesday, December 15.

General arrangements for the creche have been handled by Bob Cunningham and Jean Ryker of the Review staff, with the assistance of Mr. Dill, who remains on campus as the university's sports publicist.

ONE GOAL ONLY

In some cases success has been brought about because no allowance as made for anything else.

British Universities To Offer Program For Summer School

The British Universities are offering again this year a joint program of 1955 summer schools in the fields of English, history, literature, art, music, drama, philosophy and politics. The participating universities will be the University of Birmingham, London, Oxford and Edinburgh. Undergraduates in their junior and senior years and holders of B. A. degrees, are eligible to apply. Although the courses involve study of the humanities, students of the natural and applied sciences, business and the practical arts are eligible provided they have some background and interest in the humanities.

A few scholarships are available to cover full or partial tuition, room and board. Applications must be received by the Institute of International Education before March 28, 1955. Candidates will be informed by the first of May. Interested students should see Dean Squire.

"They're Here Again" Commons' Latest Cry

"Oh no! They're here again!" is a common cry at Commons Dining Hall about two mornings each week. This remark is made about the four students in the Quantity Food Preparation course.

Every Tuesday and Thursday morning one pair of girls makes an appearance, white uniform and all. They usually assist in preparing lunch that day, but their's is usually an independent job, completely amateur, to the distress of many. They also do food studies on waste percentages of foods, keeping qualities, etc.

Dr. Byam

(Continued from Page 2)

Epsilon social fraternity.

Prior to his arrival at the University of Delaware, Dr. Byam taught for two years at Carnegie Institute of Technology and as a part-time instructor at Boston University. He served in the U. S. Army during World War I. Dr. Byam has been recently engaged in promoting a program of language study in the elementary school grades.

The course is designed to teach the girls quantity preparation, in addition to use of equipment and general "know-how" on the workings of a large kitchen. Under the supervision of Miss Todd, dietitian at Commons, they really get the overlap picture.

Although the lab hours are scheduled for lunch time, the girls have been known to sneak in at 6 a. m. to flip pancakes for almost two hours. Yesterday they even got their hands in the pot for dinner.

You may wonder where "the Poisoners" come from. Well, that nickname popped up after the first failure of the semester. The girls have been trying, in vain, all semester to vindicate themselves.

As one of the students, I can say that at least a few of the boys have learned a few things, one of which is, "Never request butterscotch pudding." And they are warned against ever trying a new looking cookie or pale colored stew.

The girls get even, however, by using the boys as guinea pigs for their "laboratory" work, (and confidentially, even the girls term the end products as typically experimental.) They feel safe to say it now that the course is almost over. But wait till next semester, when six instead of four girls will be cooking.

Sophomore Women Receive New Blazers

New navy and white sophomore blazers have been seen everywhere since their arrival on December 2 on campus.

Suggestions for a pocket emblem were voted on and a decision was finally reached that the company plan to use as a design one of the university buildings as a basis. Therefore an emblem with Old College and 1957 beneath it was the result. Embroidered name emblems were also sent to be sewn on wherever desired.

The blazers were ordered in October by the sophomore women from the Sylvia Putziger company in New York.

LOSES HIS CHANCE

The man who looks before he leaps often gives the other fellow a chance to get in ahead of him.

The exciting new idea behind the motoramic Chevrolet

The Bel Air 4-Door Sedan—one of 14 new Fisher Body beauties in three new series

Maybe once in a car-buying lifetime, you come across something that breaks all the old patterns and establishes new ones. This is that kind of car. This is the true story of how Chevrolet and General Motors shaped a new idea in steel.

Like most good ideas, this one is pretty simple. Chevrolet and General Motors set out to build the first low-priced car that would:

- bring you the very freshest and finest styling to be had.
- bring you the most advanced engine design and engineering features.
- bring you the kind of performance and the kind of ride that have never been available before in a low-priced car.
- bring you the highest quality of manufacture and materials.

All this in Chevrolet's price field? That did take some doing! And isn't it logical that only Chevrolet and General Motors have the people, skills, resources and facilities, to carry out this exciting new idea? Here is how this new Chevrolet changes all your ideas about cars!

Real Show-Car Styling!

Your eye tells you the Motoramic Chevrolet is no styling "patch-up" job. A rakish, low profile... soft swiftness from its sleek rear fenders

to its wide-eyed Sweep-Sight windshield... a new outlook for motoring. And that outlook doesn't change when you slip inside... exciting fabrics and trim are harmonized with the whole car.

A Sensational Ride!

You live the new idea instantly... you glide... actually glide because spherical joints "roll with the punch" of the road in Chevrolet's new Glide-Ride front suspension.

And outrigger rear springs mean new balance in turns... turns made so effortless by new ball-race steering. And when you stop suddenly, new Anti-Dive braking control checks that nosing down in front... you get "heads up" stopping. Tubeless tires mean much greater protection against blowouts. And with new high-level ventilation there's fresher air.

Drive with care... EVERYWHERE! Make December 15 and every day SAFE-DRIVING DAY!

Power Beyond Compare!

You also feel the new idea quickly... quick power like a panther's paw with the new "Turbo-Fire V8" (162 h.p.) and two new "Blue-Flame" 6's. And sparking this performance is a 12-volt electrical system giving you better ignition, faster starting, greater electrical reserve for any of the power assists you might desire. You have a transmission choice of economical Overdrive and improved, automatic Powerglide (optional at extra cost) or standard shift.

8

6

Even Air Conditioning!

And if you desire the convenience of power assists (optional at extra cost)... you'll find new power-steering and improved power brakes on all models. Power-controlled windows and powershift seat are available on the Bel Air and "Two-Ten" models, while air conditioning may be added on V8 models.

Won't You Try It?

Here, we can only tell you how successfully the Motoramic Chevrolet expresses the new idea behind it. But the car itself can quickly show you! Come in for a demonstration drive, won't you, first chance you get.

Fraternally Speaking: The Greeks..

Alpha Tau Omega

We congratulate the Blue Hens for their spectacular playing against Kent State last Sunday. Delaware can be proud of their football team.

All of the brothers are looking forward to the Christmas formal tonight. Maybe we will even have some snow. Delaware Epsilon Rho will have an interfraternity party that night, and on the following evening, we will have our annual Christmas Party. Brother Hopkins has been particularly good this year and wonder what Santa will bring? Good luck, Tink.

Next Thursday we will have a party for the orphans of Our Lady of Grace Home. All of the brothers are anxiously awaiting the kids and Santa will be on hand with gifts for the youngsters.

Brother Dean Steele, newly elected co-captain of the soccer team, was initiated into Omicron Delta Kappa, honorary fraternity. Congratulations, Dean!

Alpha Epsilon Pi

This past Saturday money flowed freely at AEPI-KA's hideaway as sharp gamblers assembled to pit their skill and chance against Lady Luck. Spyros Evnochides was the biggest winner making three passes (two at the dice table). Not contented with the usual games of chance, several couples indulged in thoroughbred mechanical dog racing. The winning dog came from the famous Presnell Stables, Brother (Queeg) Handloff kept the house ahead of the unsuspecting players by skillful "manipulation" of the roulette wheel. In the midst of the evening, the fun

and the frolic was interrupted by a raid by Detective Jerry Rothstein of the Newark Police Force. The offenders as punishment were forced to listen to the entertainment. The audience thrilled to the golden tones of Dave Tompkins and George Caye as they sang "I'll Never Be Jealous Again." Following this Tex Silverman, the famous monotone, did a superb rendition of "Thay There." We believe that this joint effort by KA and AEPI was an overwhelming success due to the cooperation by both organizations. We hope this affair has contributed to interfraternity relations on campus.

Delta Tau Delta

People, we're beginning to wonder about Brother Art Hodges. Last week, we thought it strange that he didn't arrive until 9 a. m., Monday morning. But this week, he rolled in at 4 p. m., Monday afternoon! What is it with him anyway?

For the past week, Delta Upsilon Chapter of Delta Tau Delta has been entertaining Field Secretary Jack McClelleny of the national fraternity. Jack was certainly a welcome guest, and he offered many constructive ideas to the men.

Brother Brown has returned from his trip to New York, bringing back with him loads of good cheer and also an autographed MacArthur cornucopia. Seriously though, Brownie had a swell time, and we would like to take this time to congratulate Bill on his admission to Omicron Delta Kappa. This is certainly an honor for all of us here at the Delta Shelter.

We hope to see a lot of you cats at the Field House dancing to the strains of Ray McKinley and his band. See ya, gang!!

Sigma Phi Epsilon

Congratulations to one of the greatest football teams in Delaware's history for their fabulous season. It was a job well done by every member of the team. We want to extend a special congratulation to brother Bob "Mush" Trivits as he completes his outstanding football career at the university.

"No School Tomorrow" seemed to be the motto as the blue and red jackets of Sig Ep invaded the Field House last Sunday night (and early Monday morning). It was a great turnout to welcome home the team but the "no school" part seemed to be a failure.

As for the next affair of this kind, Pete Gohn is keeping his eye on "Bandstand." It seems there's still one step on there that he hasn't mastered.

To enumerate on more of last weekend's festivities; the Sig Eps turned out in full force on Saturday night to watch brothers Kelleher, Waddington, McKelvey and Keough play a little roundball.

Afterwards, several brothers migrated up to the C.I. Those participating were: Bill Paterson and Betty Mae Snowberger, Frank White and Bobbie Holmes, Tom Jenkins and Elise Wise, John Tuley and Barbara Taylor and several others.

Also, congratulations to Dick Buckley on recently becoming a pledge.

Kappa Alpha

The house party at AEPI last Saturday proved that the Kastle is in reality a den of gamblers, as the brothers reaped in the dough at AEPI-KA's Hideaway. Even a raid by local agents hardly stopped the heavy betting, but eventually the entertainment began, and what entertainment!

Sunday afternoon everyone was huddled about their radios rooting for the Blue Hens as they won the Bowl game. Brother Lew Whitaker was one of the chosen few who flew up with the team and really had some tales to tell.

Last Wednesday night a roving band of troubadours entered the third deck to entertain the heavy sleepers at 3 a. m. It seems instead of collecting penalties for their efforts they paid out a few dollars. "Bevo" had some trouble getting away from the tuba which was entwined about his neck.

Best wishes go to our newly-engaged couple, Jay Rowland and alumni Paul Hodgson. Congratulations to Ed Ralph, Stan Lowicki and Don Goodridge on their tapping into ODK. Also congrats to Ted Hughes and Harry Tetlow, who reached the semi-finals play in handball and won the trophy for our house.

Sigma Nu

To say just congratulations to our football team would hardly be a fair tribute to the tremen-

dous job that they have done this season and at the Refrigerator Bowl. Our pride in you and the job you did is more than can be put in words, especially that for Jim Flynn, Bob Moneymaker, Ed Malinkowski, Jim Johnson and Ray Elzak, who represented our house on the field. Also, congratulations are due to Jimmy Flynn for his setting a new yardage record.

The turnout Sunday night to welcome the team was one of the greatest showings of school spirit on the campus in a long time. Let's hope that win, loss or draw the student body will show continued enthusiasm for all the teams representing Delaware.

Here's hoping that our basketball team will have the best of luck in its season this year. Representing Sigma Nu on the hardwood are Dallas Green and Jimmy Smith.

Tonight, during the Christmas Formal, the doors of our house will swing open for an interfraternity party. Saturday night will feature a house party with all the trimmings, including St. Nick.

Congratulations to Mike Ferwer, who was recently tapped for ODK, the honorary leadership fraternity; Jack McDaniel, who was pledged by Tau Beta Pi, the honorary engineering society; Bill Burton, who is a pledge of Scabbard and Blade, the honorary military society; and to pledge Frank Buhl, who was initiated in Alpha Chi Sigma, the professional chemical society.

Pbi Kappa Tau

Several of our brothers who have been heralded for their work in the fields of leadership, scholarship and sports deserve hardy congratulations.

Brothers Dave Ewing and Don Rau were pledged to the honorary fraternity, Omicron Delta Kappa, for their leadership on the U of D campus.

Brother Howard Anderson was pledged to Tau Beta Pi, which is the honorary engineering fraternity.

Brother Dick Garrett has been asked to join the ranks of the Scabbard and Blade. He has also fought his way to the semi-finals in the ping pong tournament.

Brother John Hooper came from behind to win the Intramural Handball Tournament.

Brother Neil Pirnie has pinned Patricia Kane.

Saturday evening students studying in the library will be studying to music coming from the Phi Tau House. A contest will be playing "Here Comes Santa Claus" at the annual Christmas House Party.

"Jack the Dooog" has a new red and gold coat for parties.

The Intramural basketball team won its first basketball game and they looked like a real threat to the championship.

Theta Chi

Sunday held quite a few surprises for the University of Delaware, the girls stayed out until two Monday morning, the student body turned out in force to greet its football team, but one thing was no surprise to the house, Delaware won, 19-7, beating the Golden Flashes of Kent. Congratulations to Capt. Don Ford and the entire Delaware football team, but especially to the twenty-one Theta Chi's on the Fighting Blue Hen's roster. A better bunch of ballplayers and finer gentlemen would be hard to find anywhere.

Last week Don Miller was acknowledged as a member of the Little All-American Team, something we here at Del, knew at the time, and on Sunday as a final tribute to a great ball player, he received the outstanding player award at the Refrigerator Bowl. Congratulations from the entire house, Don.

Special tribute must also be paid to the seniors who have played their last game for the U of D: Ford Miller, Anastolico, Geytvan, Murray, Snowberger and Buckwalter, our 20th and fraternity brothers. We're mighty proud of them.

Well, it's been a long wait but it looks like we can finally open up our social season—we'll see you girls!

Budget

Lehigh Hoopsters Score 69-57 Win Over Blue Hens

Lehigh forwards, Clyde Royster and Bill LeClair paced the attack with 19 and 16 points respectively as the Engineers from Bethlehem, Pa., handed the Blue Hen quintet its second straight defeat in as many games by a 69-57 score.

Jack Waddington led the losing Hens with 17 points before a crowd of 1100 at the Carpenter Field House last Wednesday night.

Lehigh took the lead on the first play of the second half after the half had ended in a 25-25 deadlock. The Hens refused to give up as they knotted the count 37-37 in the third period on a pair of foul throws by Waddington.

Co-captain Pete Kelleher brought the margin down to three points, 52-49, later in the game. But Lehigh was not to be denied as they soared out in front in the closing minutes. It was LeClair who sewed up the game with eight points in the last quarter rally.

Delaware had opened the game by jumping to a 16-8 lead. Then Lehigh switched to a zone defense and stifled the Hens.

This game marked the return of Co-captain Don Miller to the basketball court. As he had been unable to practice with the team due to the extended football season, he did not play.

Frosh Swimmers Hold First Meet

The freshman swimming team will meet its first hostile competition tomorrow when it takes on P. S. DuPont High in a practice meet in the home pool.

Two weeks ago there was a freshman-varsity meet and last Saturday many frosh swimmers were recruited by the alumni to help in the Delaware Varsity-Alumni meet. Coach Rawstrom noted the continual improvement in all of the boys and stated that he was pleased with the performances last Saturday.

Although the PS meet tomorrow is only a practice outing, the team seems keyed up for it. The importance of acquiring the "winning habit" in practice meets should not be overlooked.

The frosh start their regular season on January 8, with a 2 p. m. home meet with the Lehigh frosh.

The other meets are: Bainbridge Naval Training Center, January 15, 1 p. m., home; Pennsylvania Freshmen, February 9, away; F & M Freshmen, February 15, away; and the Middle Atlantic Championships, March 5, 8 p. m., away (at F & M).

Small Freshman Wrestling Turnout Serious Problem

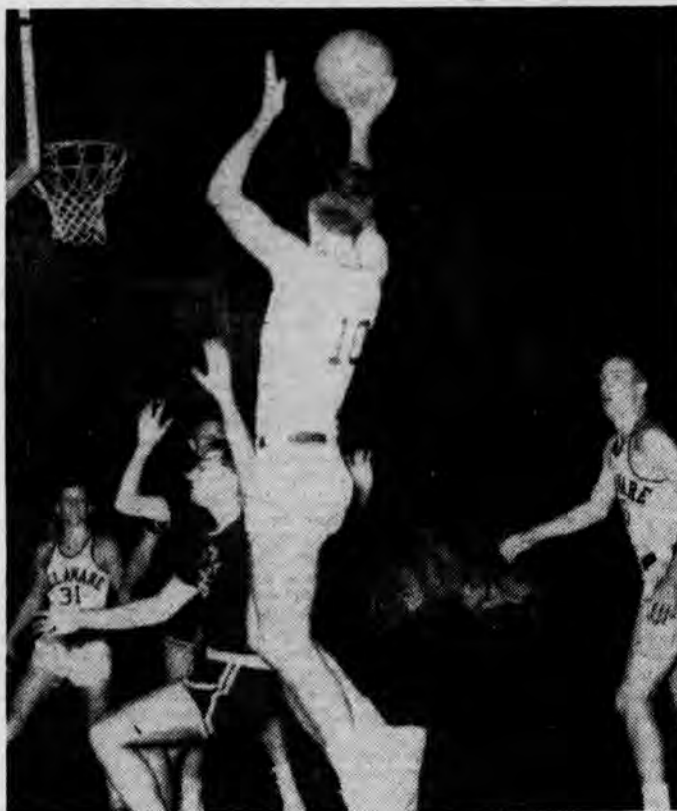

The small number of candidates for the freshman wrestling team is at present the main concern of coach Whitey Burnham. The need for freshmen to compete in the light and heavy-weight classes is almost desperate, according to the coach.

The coach explained that candidates need not have previous experience. He has revealed that last year's undefeated frosh squad was made up of a majority of boys who had no previous experience.

The team has been working out in the basement wrestling room of Taylor Gym for the last two weeks. Coach Burnham, who is the mentor for both the freshman and the varsity squads, has been directing the teams simultaneously in their joint workouts.

If any freshman is interested in joining the team, he should report as soon as possible for the team. The Frosh will open their season a week from today when they oppose Haverford College Jay-vees at Haverford, Pa.

Green Connects In Opener

DALLAS GREEN (No. 10) hits for two in a losing cause as Hofstra downed the Hens 64-59 at Carpenter Field House Saturday night. Other Blue Hens in the picture are Jack Waddington (31) and Pete Kelleher on the right.

Vince Grande, Outstanding UD End To Captain Next Year's Blue Hen Squad

Vince Grande, Delaware end, has been selected by his teammates to captain the 1955 football team. The voting took place last Tuesday afternoon at the Carpenter Field House classroom.

Vince was a standout performer throughout the past season. He alternated pass receiving chores with Marty Apostolico and Tom Redfield. Every time he played, however, he made some spectacular catches and set up key plays.

Chick 'n' Chat

By CHARLOTTE PHILLIPS and JEAN TULL

Way to go, team! We couldn't be more proud. Winning that game was just what the doctor ordered for this school. It united us more than any one other thing could have done. An excellent example was that fine showing at the "welcoming-back" party. Words can never express the school's gratitude and praise for the way you upheld Delaware's name in this football classic.

Meanwhile, back at the women's gym, we have some badminton and volleyball games being played. Each dorm is being represented in the volleyball tournament, which started Monday. We're sure there will be a lot of action and good teamwork if they follow last year's pattern. As you remember, the finals were very close in the last game Topsy, Turvey and Boletus edged out Sussex by a small margin to become the volleyball champs. Next week we'll be able to bring you some volleyball results and give you an idea of who's who in the badminton tournament.

The Spring Aquatic Show is shaping up, as the president, Liz Stafford, reports that the music has been selected, and surface dives, dolphins and somersaults (you know all those stunts and strokes), are being worked into interesting patterns to the music. As the old saying goes: "The early splash gets the best show."

Talk about parties, the Delaware Club is going to have a ball, you all will never forget. Santa will have presents for every major who has been a good little girl. There will be refreshments and the best in entertainment by the "McGuire sisters of the gym." Miss Waltz, Miss Durant and Miss Malberg, Miss Hartsorn and Lee Seemet will accompany us in singing "Santa Baby."

See ya' Gang.

Coach Dave Nelson promoted him to starter in the Lafayette game. In that game, Vince snared six Don Miller passes for 63 yards and in one instance moved the ball within easy scoring distance as the Hens routed the Leopards, 41-7.

Vince performed so admirably in that game that he was chosen as one of the East's Unsung Heroes of the Week by the Eastern Inter-Collegiate Football Association, and Blue Hen of the Week by this paper.

The coaches have nothing but praise for the 24 year old, 6'1" junior. Nelson described him as a great competitor and an outstanding leader.

Known as the old man of the team, Grande found himself backing into the first-string end position in spring training this year, when he made several fantastic catches and was the leading receiver on the field.

Grande, who is the oldest member of the squad, is married and is the team's only "daddy." He hails from Watertown, New York.

Frosh Bow 57-42; Hutten Scores 16

The Delaware Frosh basketball team came out on the short end of a 57-42 score as they dropped their first game of the season to Goldey Beacom.

The Frosh team was handicapped by two things: they lacked the height, and they were playing a team composed of nearly all second-year men. Coach Bob Siemen hopes that the lack in height will be overcome by the spirit and determination exhibited by the team.

High scorer of the game was Immediato, a forward for Goldey Beacom, with 17 points. High scorer for the Delaware Frosh was Don Hutten, a guard, with 16 points.

Hoopsters Journey To Easton Tomorrow To Face Lafayette After Dropping Opener 64-59

Tomorrow the Delaware basketball team will travel to Easton, Pa., to face the Lafayette Leopards. Last Saturday the Hens lost their initial game against a strong Hofstra quintet, 64-59.

Bill Thieban of Hofstra was high man of the game with 27 points. Co-captain Pete Kelleher led the Hens as he racked up 18 points.

In the first quarter Delaware played a good floor game, but just couldn't seem to score as easily as they did in the last two quarters. Kelleher and Bob Messick were the only two men for Delaware to score in the first quarter. Messick was second in total points for Delaware with 17.

Souls Were Willing But Purses Weak!

Many were willing but few were able—such is the story of Delaware rooters who attended the Refrigerator Bowl. In order that their valuable eye-witness first-hand impressions may be preserved to enlighten posterity, we interviewed a number of Blue Hen supporters who made that memorable trek to Indiana:

Frank Serpico (star end of the '53 team who spotted the Blue Hen Players for the press and radio): "I think Delaware was superior in every aspect of the game. On a dry day it would have been a slaughter. Give the boys in the middle of the line, Mush Trivits and Steve Butcher especially, a lot of credit. It was a fine team effort."

Grace Harrison: "Very good. The Refrigerator Bowl is well-named; it was pretty cold. I think Don Miller and Johnny Oberg played well."

Milt Roberts, Co-ordinator of Student Affairs: "Kent State is definitely the best team we've played this season. For three quarters it was an even game. The muddy field and wet ball hampered our passing and their running. As the game progressed and the field improved, the tempo of our attack picked up."

The whole line was a stand-out defensively. Don Miller's ball-handling was greatly responsible for our running success. I was talking to part of the radio crew from Akron, Ohio, who covered the game. They said they had never seen a better ball handler than Miller."

June Williams: "I think the team looked very good; I was quite proud of them. I enjoyed the game; it was well worth the trip."

Glenn Dill, Assistant Director of Public Relations: "It was cold, wet, windy and muddy and we couldn't get our passing attack underway. The wet ball and the numbing cold bothered Don Miller and the receivers."

Defensively Delaware played a tremendous game, offensively we beat Kent State at their own game—running. Our deception really had them fooled. Finally we won because the team really wanted to win."

Ruth Ward: "I was very glad to go. The team looked very good, especially in the second half. Kent State was impressive in the first half but we outplayed them in the second."

Hofstra led at half-time, 31-24, mainly on the dead eye of Thieban. In the second half, however, the Blue Hen quintet really started to roll, as they narrowed the lead to five points. Kelleher, Messick and Kwiatkowski led the attack.

In the closing minutes of the final quarter, the Hofstra quintet kept possession of the ball until the time ran out. Delaware tried in vain to get possession of the ball to no avail as Hofstra went on to win.

Co-captain Don Miller will travel to Bethlehem, Pa., with the Blue Hen squad tomorrow. Last Saturday Miller was unable to appear because of the bowl game.

Russ Trimmer, who had a slight concussion, should also be able to see action tomorrow against Lafayette.

Blue Hen Of The Week

Co-captain Pete Kelleher led the attack of the Delaware basketball team by scoring 18 points last Saturday in a losing cause in Delaware's opening basketball game against Hofstra from Long Island, New York. His two-handed jump shots gave Hofstra a run for their money.

Pete, a senior this year, cramped his opponent's style so much that Thieban, center from Hofstra, could score only 27 points against Delaware, as compared with his scoring of the previous week of 46 points.

Last year, playing in all 22 games, Pete, a 6'4" forward from Wilmington, scored 82 points by attempting 110 field goals and making 37.2 percent of them. He tried 46 foul shots and made 21, which gave him a percentage of 45. During the whole season he got 75 rebounds, averaging 3.4 per game. This gave him a total of 103 points for the 1953 season.

As a sophomore he played 2 games and scored 26 field goals. Pete started his basketball career at Sallies before coming to Delaware.

U of D Grunt-and-Groaners Tackle Strong Lafayette Matmen In Opener

Coach Whitey Burnham's wrestling squad journeys to Easton, Pa., tomorrow to encounter the tough Leopards from Lafayette in the first meeting of the season.

For the Hens this match represents one of the toughest tests of the year. Lafayette has perennially been a Middle Atlantic Conference power and advance reports this year indicate the Leopards will be strong.

Veteran Dale Boyd, 123-lb. captain, is the top point scorer from last year's team. Boyd, who is a junior, has lost only three matches in three years of collegiate competition.

Sophomore Bill Baur will make his first varsity appearance in the 130-lb. slot, and Eddie White appears set at the 137-lb. position. Moving to the heavier classes, Harold Ladd will represent the Blue Hens in the 147-lb. class. Tom Baker and Howard McCurdy are vying for the starting role in the 157-lb. weight. At 167-lb., Jack Wenner, undefeated from last year's frosh team, will start the starting nod.

Senior Herb Nickel and sophomore Pete Gohn have the inside track on the 177-lb. and the heavyweight position is a toss-up between Jerry Weiss, Steve Butcher, Jim Shelton and Tom Cys.

SPOTLIGHT ON SPORTS

By DAVE TOMPKINS

"Brrr." It was cold in Evansville, Indiana last weekend. The Refrigerator Bowl (or is it "Ice-Box Bowl?") was certainly aptly named. The sportswriters and radio announcers in the press were practically forced under the tables to avoid the howling wind which added to the general discomfort. Those who were unable to squeeze in the pint size press-box were actually more comfortable as they viewed the game from busses—with heaters.

The crew (team, coaches and miscellaneous) received a royal welcome by the Evansville Jaycees upon their arrival. They piled on two busses and traveled to the edge of town with a police escort. You would have thought that Mickey Jelke and his call girls had arrived in town.

Then the team boarded the town fire engines for a hectic trip through the city. What would have happened if the fire house had burnt down? This was only the beginning of a wonderful weekend. Another highlight of the weekend was the stage show in Evansville's Grand Theatre which featured the election of Miss Refrigeratorable by the members of the opposing teams. The players had just one comment about the girls — "Mmmm, boy!"

As Sunday dawned dark, dreary and rainy, prospects for a record-breaking crowd at the Reitz Bowl flew out the window. It also answered the prayers of Kent State coach, Trevor Rees, and his team. They were hoping that

a bad day would slow down Delaware's passing attack. It appeared that their players were answered, as the Hens were unable to click for the first three periods.

Delaware's defense and ground attack was more than Kent bargained for, however, as the Hens, with a slight assistance from Jim Zaiser, put the game literally "on ice." Without a doubt it was a terrific game between two evenly matched teams — a game of which both teams can be justly proud.

From all reports, the Indiana hospitality was great. Every wish was fulfilled as the Evansville Junior Chamber of Commerce went all out to please the Delaware representatives. The entire team and those who went with them are grateful to the Evansville townspeople for the great time. It was an event that long will be remembered by fourteen seniors.

The most inspiring part of the trip for the team was the arrival home, as about 700 students turned out to greet the squad at two in the morning. That was school spirit at its best.

ROTC Rifle Team Holds Annual Hearst Competition

Members of the University of Delaware Reserve Officers Training Corps Rifle Team fired their first match this past week. The match fired was the 34th annual William Randolph Hearst ROTC Rifle Competition for 1954-1955. Scores posted were as follows:

Alexander—162 out of 200
Epps—151 out of 200
Messinger—175 out of 200
Mundy—166 out of 200
Simmernan—172 out of 200
Team Total—826 out of 1000

Captained by Robert H. Alexander, the team has been in practice since October 12, 1954. Challenges have been received from a number of universities and colleges in the United States. All matches are fired with the caliber .22 rifle and are of the postal type, which are witnessed by members of the Military Department at the college and the challenged university. The scores posted are compared by the team coaches for the winner.

Coached by Captain Francis McCarthy and Sergeant First Class Neil J. Buzzini, the ROTC team consists of the following cadets: John L. Alexander, Robert H. Alexander, Ronald Edwards, Howard R. Ellis, Jerry Epps, George Buchwald, Norman A. Messinger, Leon Millel, John G. Mundy, Irvin K. Richter, Charles Riggan, Harold M. Simmerman, Charles K. Skinner and Fred Weinstein.

Handball Trophy Captured By KA

Kappa Alpha has captured the trophy in handball, although beaten in the finals. KA's Ted Hughes met Hooper of PKT in the finals and was defeated after three closely contested matches.

In table tennis the fifth round elimination is about to be played off. Out of the following men will emerge the 1954 champion: Hoopes, SPE; Duff, SN; Garrett, PKT; and McBride, SN. Finals will be played December 9.

Intramural basketball got under way last week. The teams have been divided into two leagues this year. One consists of the nine social fraternities the other, campus teams and fraternity B teams. The first official results are as follows:

Campus League
Frosh Generals over Trojans
KA B over Maulers
Harter Hall over Mosher Hall
SN B over Panthers

Fraternity League
Theta Chi over DTD
PKT over AEPi
KA over SN

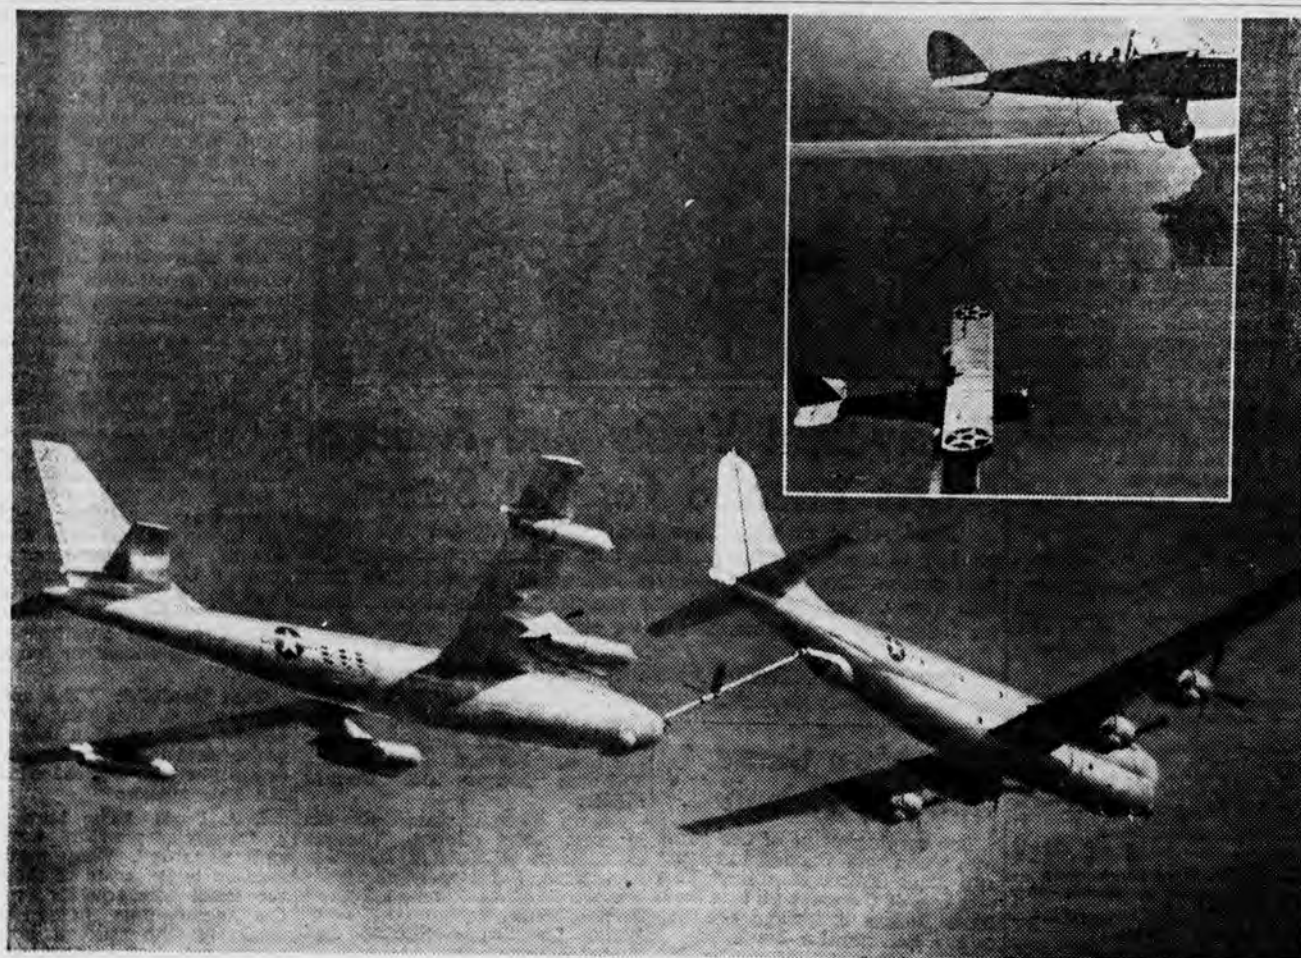

Sigma Xi Program Designed To Spur Scientific Research

Sigma Xi encourages scientific research in the fields of mathematics, physics, biology, chemistry, engineering and medicine by recognizing achievement and incentive in scientific research. Sigma Xi, founded at Cornell in 1886, is a national honorary fraternity of 111 chapters, composed, mainly, of graduate students. Its publication is published quarterly and known as the American Scientist.

The 60 members of the Delaware Club are former members of different college and university chapters. Delaware's club is now seeking membership into the national council of Sigma Xi. When Delaware has its chapter, it will be able to elect promising researchers to its fold.

Sigma Xi officers are: president, Robert F. Jackson; vice president, Wm. V. Smith; secretary, R. R. Ronkin.

Dr. Wohl of the Department of Chemical Engineering discussed "Combustion Research" at the University of Delaware" at the meeting on November 30.

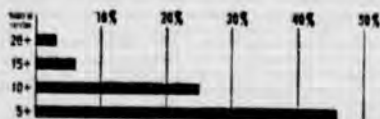

1954—Boeing KC-97 tankers completed 16,000 refuelings last year

30 years of progress in aerial refueling

The small picture shows the first aerial refueling by the Air Force. The large picture shows a Boeing KC-97, today's standard Air Force tanker, transferring 600 gallons of fuel a minute to a Boeing B-47 Stratojet bomber.

Boeing pioneered aerial refueling tankers and equipment. Further, during its 38 years, it has constantly pioneered trend-setting designs in commercial and military aircraft. This has meant such continuous growth that Boeing now employs more engineers than ever before, including the World War II peak. Boeing offers stable careers to engineers

of virtually EVERY type: civil, mechanical, electrical and aeronautical. The company employs draftsmen and engineering aides for routine work, thus freeing engineers for more creative assignments.

Boeing engineers enjoy long-range careers—46% of them have been at Boeing 5 or more years, 25% have been here 10 years, and 6% for 15 years.

In addition to stability, Boeing offers an unusual variety of research, design and production opportunities, including work with new materials, guided missiles, jet bombers and transports, and research in nuclear-powered aircraft and supersonic flight.

Boeing makes it possible for engineers to take graduate studies while working, and reimburses them for all tuition expenses.

For further Boeing career information, consult your Placement Office, or write:

8 AM. Variety Add To Communication Course At Ag Hall

A rather obscure course here at the University of Delaware is Rural Communications. Last year four students took the course; this year eight students attended the 8 a. m. class at Agriculture Hall. Designed for people interested in Extension work, the course proves to be extremely versatile.
"We wrote articles for a local paper in Wilmington and the Newark paper quite frequently," commented one of last year's survivors.
"We went during the snow storm too," commented the student who was proud of her walk to the Agriculture Building at such an early hour and under such under unfavorable conditions. The students however admitted that they took a "few" mass cuts.
Besides writing news articles, those in the Rural Communications course wrote scripts for radio on a phase of work which interested them most.

Last year they took a field trip to WDEL and saw "Cosmopolitan Kitchen," where they learned "how not to break eggs." Radio scripts and writing were not all they did. The students made tape recordings to hear their own voices.
They studied ideas for pamphlets, fliers and folders. Furthermore they studied what makes the component parts of a good show case. Mr. Van Horn even went so far as to invite the group to his home to watch "Today" when they were studying about television.
The moral of this story is that if you are a hearty soul who likes 8 a. m. classes, variety and writing, you belong in Rural Communications class next semester. See you there at the Ag Hall.

New Scholarship For UD Students

A new scholarship has been presented to the University of Delaware by the Traffic Club of Wilmington.

As one of their last official acts, the retiring officers of the Traffic Club presented a check for the scholarship to Dr. Charles Lanier, chairman of the Department of Economics and Business Administration at the university.

The annual value of the scholarship is \$250, the full amount to be presented to a student who plans to major in business administration. Under the terms of the grant, the first presentation was made for the 1954-55 session to a freshman graduate of a New Castle County high school.

The award is based upon a record of financial assistance and promise of academic achievement and may be renewed annually throughout four years of college preparation if the recipient meets the university's qualifications for scholarship aid.

The first student selected to receive this grant was Michael Milgrene, Jr., of 508 Tyrone Avenue, Woodcrest, a graduate of the Henry C. Conrad High School.

Future recipients of the Traffic Club Scholarship will be selected by the Dean of Students and the chairman of the Department of Economics and Business Administration.

Bill Brown

(Continued from Page 3)
Delegates were asked what they expected from Industrial Economy in the future. Bill's answer, which he termed as "flag waving," covered the international aspect of industrial economy. In his modest way, Bill describes the speech as nothing sensational, however, from reports of the members of the NAM who went from this area, it was one of the best student speeches of the conference.

In addition to the discussions, the students toured New York City, the United Nations and witnessed a demonstration of the new Bell Telephone Solar battery.

Some of the guest speakers at the conference were Walter Bell Smith, former United States Ambassador to the Soviet Union; Clarence Randall, chairman of the Randall Commission and president of the Inland Steel Corporation; and Carlos Romulo, former president of the General Assembly of the UN. Bill stated that he was particularly impressed by Romulo.

Bill said, "The best thing

about the conference was the fact that the students of the country got a chance to see how an association of big and small businesses actually works."

"Seeing how these organizations work," he said, "Got rid of some of the false impressions

that many people have—namely that the NAM and similar groups are interested only in playing politics and favoring their own interests."

Bill said that his experiences at the conference showed him the business groups were inter-

ested in this, but also something more. "They are interested in showing people how their organization functions and also they are interested in putting the industry in our country to use in international co-operation efforts."
