Foreign Study Plan Well Under Way

Professor Kirkbride Has Made All
Preparations for Delaware Men
to Enter French Universities

Students Depart June 20th

The plans and preparations of the Modern Language Department for the new Foreign Study Plan are almost completed. With the exception of arranging the transportation of the students, which is being done, all else is in readiness. Professor Kirkbride has just returned from France where he has spent the last year in making accommodations for those who contemplate taking advantage of this year of work in France.

The Foreign Study Plan is particularly apropos for those who are interested in consular service, diplomatic service, exporting and importing, international banking, ocean shipping, teaching, the literature of France, foreign department of bureau of foreign and domestic commerce, etc.

But the greatest reward to be had from this experience is the acquirement of an international point of view. One can replace one's local or, in some cases, national outlook upon the world in general by an insight into affairs that is both broad and sympathetic. The significance of this is illustrated by the difference between a hasty glance and deliberate contemplation of an object. In the first one only gets a hazy idea of the object seen, but in the second a clear and appreciative conception is formed. And, then, too, it must not be forgotten that this all-encompassing view does not limit itself only to external things; its influence tends to broaden one inwardly, as well.

There is a serious need in the United States for men with international minds.

For those who utilize this opportunity a full year's credit will be given; so that upon their return they will only have their regular senior schedule to complete.

The date set for the departure is June 20th. July and August will be spent in Nancy, where an intensive course in French will be undertaken. Then the pioneers will go to Paris where they will continue studying the French language at the Alliance Francaise until November 1st, when the regular courses will begin.

At present Professor Brinton is conducting a special class in French for those who expect to go across. This preliminary course consists of five hours a week of conversation and short talks.

There are, so far, about ten Sophomores who are getting ready to represent Delaware in this initial expedition to Europe.

C. E. CHASE TO ADDRESS ENGINEERS

A. A. E. To Elect Officers For
Next Year

The A. A. E. will have a meeting in the Lounge this Thursday at 7.00 p. m. Mr. C. E. Chase, of the Delaware River Joint Bridge Commission will give an illustrated lecture, which will be followed by election of officers for next year. The evening will be topped off with a free smoker and feed.

Glenn Frank Summarizes Policy of Good Writing

Yesterday morning at the Chapel exercises, Glenn Frank delivered another of his series of talks and this time his subject was "The Policies to Follow in Good Writing and Editing." In a way it was really a continuation of his last talk, "The Important Features of Good Salesmanship."

As usual, he was most interesting and entertaining and the five qualities which he considered essential to the success of a writer or editor are certainly necessities to anyone's success.

(Continued on Page Four.)

Combined French Clubs Present Plays

The culmination of the activities of the French Club of the University was reached Monday night when, at a joint meeting of the men's and women's clubs, two plays were presented, one by the men and one by the women. The well-known comedy, "L'Anglais Tel Qu' on le Parle," was enacted by the men with much success, and another popular short play was presented by the women who did remarkably well. Considering the fact that the actors and actresses are amateurs, and that some of them have had but comparatively little French, it is remarkable that they should acquit themselves so well.

The French Club idea was originated by Prof. I. Levine whose untiring and able efforts have made that idea a reality. At the beginning of the year he instigated the formation of the society, dividing it into two clubs, one for the women and one for the men. From time to time general meetings are held when the two groups assemble. At these meetings a play is generally presented or a lecture is given in French. All conversation is carried on in French, and the students have an opportunity to familiarize themselves with the language as it is spoken. Undoubtedly, these meetings are beneficial to the students who attend them. They are an invaluable complement to the limited usefulness of the French Class. From every indication it would seem very probable that, after a very successful initial year, the French Club will next year have more members, more frequent and better meetings, and will prove itself to be one of the best and most prominent organizations on the campus.

Busy Week For Ball Team, Two Big Opponents

Meet Washington and Lee and
Dickinson at Home

Diamond in Poor Shape

The Blue and Gold pastimers will have a hectic week-end this coming Thursday and Saturday when they will entertain the nines from Washington and Lee University and Dickinson College, respectively.

Supposition on the outcome of these games is merely a waste of time; there can be no logical conjectures made. To say the least, this season has been one of the most discouraging that the Delaware nine has ever had. They are now nearing the midpoint of their schedule and thus far they have but one game won and one game unfinished, the rest being losses. The playing has been very erratic and unpredictable. Easy catches have been dropped by the outfielders at critical times; easy grounders and "possibles" in the infield have been fumbled and thrown away at the most costly moments. One of the greatest troubles in the infield has been the irregular ground in the "hot spots." The Frazer Field diamond has declined from its prime condition of last year and the bumps and holes have caused more than one sad miscue by an infielder. Conditions can be aided very materially by a grading and smoothing of the infield and with that done the support will undoubtedly be better and the pitchers will gain in confidence. It is hoped that the season can yet be made into a successful one.

Honorary Organizations Select New Members

On Saturday morning the Derelicts, an honorary senior fraternity, and the Druids, a national honorary sophomore society, selected their members for the next school year. The purpose of both these societies is to create a spirit of good fellowship throughout the Senior and Sophomore Classes, and the Student Body. Each organization selected the proverbial thirteen members.

The Derelicts were as follows: J. B. France, I. S. Elliott, H. S. Barker, M. A. Akin, F. B. Smith, J. D. Williams, C. J. Underwood, J. H. Schaefer, J. A. Frear, C. A. Shockley, E. A. Hoey, W. E. Howard and C. A. Smith.

The Druids are: R. W. Torbert, W. P. Carlon, E. E. Weggenmann, L. H. Kramer, R. D. Johnson, J. L. Manix, H. Roberts, J. F. Ash, Jr., H. K. McCoy, J. M. Cherpak, M. E. Prettyman, R. R. Atkins, and P. Leahy.

The newly pledged Derelicts were the proud possessors of the black and yellow ribbon on the lapel of their coat, whereas the Druids had their piece of green ribbon fastened on the bottom button hole of their coats.

JINX STILL PURSUES TENNIS TEAM

Need For Better Courts

Bad luck still pursues our tennis team; it again met defeat at the hands of the Johns Hopkins four in both singles and doubles. Our opponents put up a fast game and showed some clever court work. Challenger starred for Delaware, but he was beaten by his little competitor, Wasseman.

Until our men have more practice and a better place in which to train, defeat will be almost inevitable. The courts now in use are poor and inadequate. The team is composed of some excellent players, who would win if they had the chance to develop their game.

The results of the tournament are as follows:

First Singles
Bald-R. Johnson.....5-7, 2-6
Second Singles
Kaupholy-Robinson....6-4, 6-0
Third Singles
Wasseman-Challenger,
4-6, 12-10, 6-2
Fourth Singles
Hoffmeister-Barker....6-1, 1-4
First Doubles
Wasseman and Hoffmeister vs.
Challenger and Barker,
7-5, 5-7, 7-5
Second Doubles
Bald and Kaupholy vs. R. Johnson
and Robinson,
6-2, 2-6, 9-7

WAITERS HAVE PARTY; GAY EVENING AT SHOW

Guests of Mr. Ginns In
Wilmington

On Monday evening, May 7th, the members of the Waiter's Union, which is one of the most elite organizations in the field of professional art, journeyed to Wilmington, where they were entertained by James N. Ginns, the David Belasco of Wilmington. The waiters, nearly thirty strong, attended the Aldine Theatre as Mr. Ginns's guests. The show was composed of excellent vaudeville and a feature movie and the entire coterie enjoyed the evening immensely.

As the Waiter's Union is a very select group there is very little known among the general student body about it; but it is safe to state that no college organization enjoys more parties or social affairs than this group. For instance, there is a birthday party for every waiter in the Union. A big cake with lots of "gooey" icing on top and the usual candles is served at dinner at which the man so honored presides. After the dinner is over the gentleman who is so unlucky as to have been born "just so many years ago this day" receives the sincere felicitations of his fellow waiters, said felicitation being expressed by so many healthy bumps. Thus the life of a waiter actually has its bumps, but at the same time there is a spirit of good fellowship and congeniality developed at the dinner table among the waiters which would scarcely be created elsewhere.

Twelve Records Fall, Three Equalled At Inter-Scholastics

Tome and Baltimore Poly Tie for
First Class Honors

Sigma Nu Wins Inter-Fraternity Relay

Tome and Baltimore Polytechnic Institute tied for first place in the Annual Inter-Scholastic Track and Field Meet, held last Saturday on Frazer Field. Twenty-eight schools entered 300 contestants who succeeded in breaking twelve records and equaling three other records. It was the first time in four years that the meet has been held under favorable weather conditions.

Tome and Baltimore "Poly," which is coached by "Bill" Lilly, '22, tied in Class I with 36 points each. The deciding factor in the tie was the winning of first place in the broad jump by Baltimore. Class II was won by West Philadelphia Catholic H. S. with 36 points, Coatesville H. S. second with 28 points, and Wil-

(Continued on Page Four.)

Track Team to Meet Lehigh

Delaware's strongest and foremost track competitor, Lehigh, will be here Saturday, April 12th. The meet will be held in conjunction with the Delaware-Dickinson game, and these two events should attract a banner crowd to Frazer Field.

Coach Kanaly's proteges from Lehigh are just a little stronger than the Swarthmore team and the locals will have to step fast in order to conquer the boys from Bethlehem. Lehigh has veterans in all events. Their star is Carol, the lad who ran second to Leconey, the 100-yard man, in the Penn Relays. In Jose Carol, Capt. Pitman will find his strongest opponent. "Pit" and this star sprinter will oppose one another in the 100-yard and 220-yard dashes. Carol will stack up against France in the 220-yard hurdles and he will heave the javelin against McKelvie. Beggs and Sanford are two other men that Delaware must "take care of." Lehigh's entries include:

100-Yard Dash—Carol and Tal-mage
200-Yard Dash—Carol and Capt. Wight
120-Yard High Hurdles—Beggs and Sanford
220-Yard Low Hurdles Carol and Beggs
440-Yard Dash—Sprinsteen and Croll
Half-Mile Run—Leister and Mc-Pherson
One-Mile Run—Bray and Lodge
Two-Mile Run—Siegmond and Levin
Shot Put—Alwine and Roth
Javelin Throw—Carol and Sanford
Pole Vault—Washburn and Rose
High Jump—Tyler and Elmer
Discus Throw—Roth and Yeager
Broad Jump—Sanford and Burlingame

OUR VOYAGE

The "Good Ship Review" has set out upon another voyage on the sea of intercollegiate journalism. The Senior officers have retired. The new men have taken the helm and will carry with them the spirit and untiring tutelage that the "old salts" so willingly gave during the last voyage.

We who are starting out know the difficulties and handicaps under which this undergraduate publication is put forth. We take this opportunity to commend C. Norman Wade and Willard D. Boyce for the effort and time that they have so freely given to the editing and management of the paper respectively. For the past year Mr. Wade's policy of "progress" has stood out as the feature of the Review. The retiring editor and his Senior assistants have at all times given their best to the publication, and it is with a determination to carry out their good example that the news staff makes its initial bow.

The policy of the new board shall also be one of progress. It is our purpose to relate Delaware's academic, alumni, athletic and social activities as vigorously and precisely as our abilities shall permit. We shall endeavor to keep before our readers the most important issues which concern Delaware and her alumni, and at the same time try to stimulate the youth of the State to knock at the University's portals for the benefits of a higher education.

It is our aspiration to be a successful medium of exchange of student opinions. With this end in view we invite every student to take up his pen and fearlessly relate any subject which he thinks is worthy of the attention and betterment of the University. By the constant exchange of opinions we hope to aid in moulding convictions which will improve our environment and strengthen Delaware's traditions.

Our policy welcomes all constructive criticism. The true critic is never a chronic croaker, and the chronic croaker will not be a welcome critic of the University's policies. We cannot hope to be perfect, but your idea of an adjustment may help us towards our goal.

It is with these aspirations and purposes ever before us that we present to you the ensuing issues of the Review.

CONCERNING RAIMENT

Although we have no intention of instituting a movement to have the campus decorated with men appearing like cuts from a "styleplus" advertisement, nevertheless we do think that Delaware men are, as a group, much too careless about their personal aspect.

To all appearances the total wardrobe of some men seems to consist only of one army shirt, one nondescript coat, one pair of odd trousers, and one pair of disreputable shoes.

It is not so much the clothes we criticize as the manner of wearing them.

Even an army shirt, issued by the Military Department, should be laundered occasionally. Washing will not damage it so badly that the contingent fee will be vitally endangered.

Trousers soon become proletarian and revert to "pants" when their owner, or at least their wearer, neglects to clean and press them once in awhile.

No bootblack has ever been known to distort footwear into useless shapes by applying what is commonly called a "shine."

Neither are the casualties resulting from needle pricks received while sewing up a torn coat tremendous enough to warrant the ceasing of this practice.

Slovenly attire is the offspring of laziness, of rusticity, or of vulgarity.

Proof-reading by P. R. Rinard.

High Schools Hold
Fifth Conference Here

The fifth annual meeting of the State High Schools was held at the University on Friday and Saturday, May 4 and 5, 1923. Members of this Conference were invited as guests of the University to a dinner on Friday evening, and breakfast and luncheon on Saturday.

The meeting opened in the west wing of Old College on Friday; the State Vocational Conference held their session in the afternoon. The principle address at the evening session was made by Dr. David Weglein, who is the assistant superintendent of the Baltimore public schools. He spoke of the many advances that had been made in education in recent years.

On Saturday morning Dr. H. V. Holloway, State Superintendent of Public Instruction from Dover, delivered an interesting address. All sessions of the Conference were held in the west wing of Old College. The local committee in charge of arrangements did all in their power to make this meeting a success.

Class Elections

Hotly Contested

Of the class elections held last week-end, the Senior nominees proved to have run the closest races. Harvey McDonald was elected to the presidency by a margin of two votes over F. B.

Smith. Edward Jackson and Wm. E. Howard, Jr., tied for the vice-presidency. The tie will be voted off at a special meeting in the near future. A. O. H. Grier was elected secretary; Vincent Tempone, treasurer; and J. D. Williams athletic council representative.

J. G. Leach carried the Junior presidency by a safe margin. W. J. Lank was elected vice-president; I. Mather, secretary; Robert Conly, treasurer; Wm. D. McKelvie, athletic council representative; and Roger Cann, historian.

Mannix and Torbert ran a hot race for the presidency of the Sophomore class, Mannix finally getting a majority of ten votes. H. S. Messick was elected vice-president; W. P. Carlon, secretary; F. W. Barkley, treasurer; and J. M. Cherpak, athletic council representative.

Good Music and Crowd
at Interscholastic Dance

Amid a scene of sparkling gayety and colorful confusion the annual Interscholastic Dance was held Saturday evening in the Armory. The decorations of deep blue threw a soft hazy luminance over the dancers. The floor was crowded to capacity. High school students from all over the state stayed over to attend the dance and finish off a "big" day in proper style. The music was pronounced by everybody to be excellent; it seemed to pervade everyone, drawing the dancers deeper and deeper into the joys of pedal manipulation until the strains resounded no longer, and the Fifth Annual Interscholastic Dance of Delaware was nothing but a pleasant memory.

The First Electrochemist

NITROUS oxide, according to the science of a century ago, was "the principle of contagion when respired by animals in the minutest quantities." Mere say-so.

Imaginative yet skeptical Humphrey Davy, who believed in experiment rather than in opinion, "respired" it and lived.

It was this restless desire to test beliefs that made him one of the founders of modern science. Electricity was a new force a century ago. Davy used it to decompose potash, soda, and lime into potassium, sodium, and calcium, thus laying the foundations of electrochemistry. With a battery of two thousand plates he produced the first electric arc—harbinger of modern electric illumination and of the electric furnace.

Czar Alexander I and Napoleon met on a raft to sign the Treaty of Tilsit while Davy was revealing

the effects of electricity on matter. "What is Europe?" said Alexander. "We are Europe."

The treaty was at that time an important political event, framed by two selfish monarchs for the sole purpose of furthering their personal interests. Contrast with it the unselfish efforts of Sir Humphrey Davy. His brilliant work has resulted in scores of practical applications of electrolysis in industry and a wealth of chemical knowledge that benefit not himself but the entire world.

In the Research Laboratories of the General Electric Company, for instance, much has been done to improve the electric furnace (a development of Davy's arc) and new compounds have been electrochemically produced, which make it easier to cast high-conductivity copper, to manufacture special tool steels, and to produce carbides for better arc lamps.

**BLUE AND GOLD
BOWS TO GARNET**

Swarthmore 8; Delaware 5

The Delaware baseball nine dropped their fifth game of the season Friday, May 4th, when the strong Swarthmore team nosed Capt. Nutter and his mates out of victory by an 8-5 score. The game was replete with thrills and served to bring to the front a new pitcher, Mannix, who should greatly help the locals to chalk up a few victories. After Brandt had been bombarded from the mound, Coach McAvoy called Mannix in from the outfield and stationed him against the heavy hitting squad of the Pennsylvanians. The Freshman did very well in the box and turned the Swarthmore boys back after the fourth inning. The locals drove Barr and Fix from the hill. Ogden, the star hurler then went on the mound and held the locals in check. "Mike" Underwood did the heavy hitting for the Blue and Gold while MacDonald and McCormick fielded brilliantly. The score:

R. H. E.
Delaware, 0 0 0 1 0 0 0 4 0—5 10 0
Swarthmore, 3 0 2 3 0 0 0 0 x—8 12 0

**Dr. Smith Reviews
Sciences Before Faculty**

Dr. Edgar F. Smith, former Provost of the University of Pennsylvania, and now head of the department of chemistry of that University, gave a very interesting address on "The History of Chemistry in America" before the Faculty Club on Monday night.

Dr. Smith possesses unlimited knowledge on the subject of chemistry, but did not confine himself to this one science. He made a very entertaining and gripping review of the history of all the sciences, including Botany, Geology and Physics. His success as an educator has probably been due a great deal to his ideal plan of presenting the sciences to students. His method of procedure is to arouse a lively interest in his pupil for a science by going into its history and pointing out the romance which lies at the root of it.

Dr. Smith possesses a valuable and enviable collection of scientific relics. Among those which he brought for the occasion Monday night were letters written by John Priestley, the fa-

**MEMORIAL DAY
CELEBRATION ON
UNIVERSITY CAMPUS**

Dr. Hullihen to Preside

Mayor Frazer, of Newark, has announced complete plans for the Memorial Day Celebration this year.

The G. A. R., Disabled Veterans Association, schools and town's people will assemble at nine o'clock in the morning and visit the cemeteries and decorate the graves. At 10.45 the Memorial Day Service will be held on the University campus on the spot marked by the rough gray stone where the selected service men for the World War were sworn in two years ago.

The following committees were appointed:
Presiding officer—Dr. Walter Hullihen.

To secure speaker—Dr. Walter Hullihen, Mayor E. B. Frazer, Mr. E. C. Johnson.

Programs—Dr. W. O. Sypher, Mr. E. C. Johnson.

There will be community singing led by Wm. P. White, of Wilmington.

**Shockley Will Head
Farewell Hop Committee**

The committee for the Farewell Hop, which will be given in honor of the graduating class by the Junior class, was announced by President I. S. Elliott, of the latter class, the first of this week. The committees: Executive, W. S. Shockley, chairman, H. L. Corcoran, E. H. Jackson; Programs, P. L. McWhorter; Hall, J. A. Frear, Jr.; Refreshments, M. C. Johnson; Patronesses, W. E. Howard, Jr.; Decorations, C. A. Smith, W. K. Mendenhall; Music, F. B. Smith.

The dance will be held in the Armory on the evening of June 11th. Selections for an orchestra include George Madden; Bob Iula, Baltimore; and Perce Patton, Philadelphia.

Inter-Collegiates**Princeton Plans "Self Education"**

A radical change in the undergraduate curriculum of Prince-

mous English philosopher and chemist, and discoverer of Oxygen. Priestley died in 1804, so that the letters created considerable comment, both because of their content and their age.

ton University was voted at the annual spring meeting of the Board of Trustees. This change places emphasis on individual work in the concentration group. Undergraduates will do less required work so that they may get individual work in their majors. Comprehensive examinations will be held at the end of the Junior and Senior years to grade this individual work. It is hoped that such a system will develop the habit and method of individual work.

Married Students

According to an article published recently in "The Lafayette" marriage among college students—the exception in American colleges—is common in Russia. According to a report by the American Relief Administration, in six universities in one city, 293 students out of 1,462 in the two upper classes were married and 129 had one or more children.—"The Stute."

**INTERNATIONAL
STUDENTS' TOURS**

under the auspices of

**The Institute
of International Education**

offer an opportunity for American college students to travel in European countries with congenial groups, under scholarly leadership, and at lower cost than is otherwise possible.

The members of the Students' Tours in 1922 included representatives of 66 American colleges.

There will be three Students' Tours in 1923:

An ART STUDENTS' TOUR, with an itinerary which includes many of the great galleries and cathedrals of Italy, France, Belgium, Holland, and England;

A STUDENTS' TOUR TO FRANCE under the joint auspices of the Fédération de l'Alliance Française and the Institute of International Education; and

A STUDENTS' TOUR TO ITALY under the joint auspices of the Institute and the Italy America Society.

Whatever your "Choice of a Career," college training has increased your economic value, and whatever business or profession you enter, adequate life insurance is a proper self-appraisal of your powers in that direction.

The traditions, practices, and financial strength of the JOHN HANCOCK Mutual Life Insurance Company are such that the college man can take peculiar pride in having a John Hancock policy on his life. It is a distinct asset from the start. It will pay you to buy it; and later on, should you think of joining this company, it will also pay you to sell it. Our representatives will tell you just how, and can assist you in selecting both your career and your insurance.

Twelve Records Fall

(Continued from Page 1.)

mington H. S. third with 18 points.

The strongest competition in the meet was in Class III. Avondale Vocational School tied for first honors with Caroline High with 14 points, and du Pont High came in second with 13 points.

The other points in the meet were earned by ten other schools. They were honors and individual medals. Austin, the lone contestant from Summer-ville, N. J., who was entered in Class III, broke the mile and the half-mile records.

Wilmington High showed up better than it has for some years by making third place in Class II, and would have made better if Conly's third in Class I pole vault had counted toward score.

The best Delaware track team on the field was du Pont High, which lost a first in Class III by only one point, but succeeded in winning the Class III cup for Delaware schools.

Of all the events in the meet, the most exciting was the interfraternity half-mile relay, won by Sigma Nu. The race was close from start to finish and was decided in the last few feet of the run. Kappa Alpha ran second, and Omega Alpha third. The Sigma Nu team was disqualified for over-running the baton exchange distance. This automatically gave Kappa Alpha first place, but they would not accept, and the race went to the Sigma Nu's, who made the best time.

Of the records which were broken, 11 were on the track and four in the field events. The new records and record-holders are:

100-Yard dash, Class I—Bechtel, B. P. I., 10 1-5 seconds. Former record, 10 2-5 seconds.

100-Yard dash, Class II—Wahl, W. H. S., 10 3-5 (equalled).

1-Mile run, Class I—Austin, Summerville H. S., 4 minutes, 39 3-5 seconds. Former record, 4 minutes, 47 2-5 seconds.

880-Yard dash, Class III—Austin, S. H. S., 2 minutes, 7 2-5 seconds. Former record, 2 minutes, 14 seconds.

440-Yard dash, Class I—Hemmeter, B. P. I., 53 seconds (equalled).

440-Yard dash, Class II—Moran, W. Phila. Cath. H. S., 52 1-5 seconds. Former record, 53 2-5 seconds.

440-Yard dash, Class III—Kelly, Oxford H. S., 54 3-5 seconds. Former record, 55 3-5 seconds.

220-Yard dash, Class III—Roser, du Pont H. S., 23 4-5 seconds (equalled).

Sprint Medley Relay, Class III—Avondale Vocational School, 2 minutes, 41 1-5 seconds. Former record, 2 minutes, 44 seconds.

One-mile relay, Class I—Baltimore Polytechnic Institute, 3 minutes, 38 seconds. Former record, 3 minutes, 38 2-5 seconds.

Sprint Medley Relay, Class II—West Philadelphia Catholic H. S., 2 minutes 35 seconds. Former record, 2 minutes, 37 2-5 seconds.

Pole vault, Class I—Requard, T. S., 10 feet, 9 inches. Former record, 10 feet, 6 inches.

High jump, Class III—Deputy, Harrington H. S., 5 feet, 4 inches. Former records, 5 feet, 3 inches.

Shot-put, Class II—Stott, Coatesville H. S., 43 feet. Former record, 42 feet, 4 1-4 inches.

GLENN FRANK**SUMMARIZES POLICY OF GOOD WRITING**

(Continued from Page 1.)

He emphasized the necessity of overestimating a reader's intelligence and that of underestimating the readers information. All writing should be in the vernacular, in the language, thought, form, and style of the man of average intelligence and education. Fiction should be realistic. All good writing should contribute toward one hundred per cent Americanism and should be the product of the "engineer mind." And by that he meant that all writing should give the actual facts in such a way that the reader could only draw the common, ordinary, horse-sense conclusion.

It is reported that Thomas H. Dole, ex-'22, has recently invented, patented and sold an original chemical process. Dole is working in Cincinnati. He sold his discovery to the Procter & Gamble Co., famed for their "99 44/100% pure." He is supposed to have received a very profitable sum for his invention.
