NUMBER 36

Newark Contractor Is Lowest Bidder For College Dorm

James H. Hutchison Wins Out In Competition For New Building On Women's College Campus; Ten Contractors In Field When Bids Are Opened

AWAIT FORMAL ACCEPTANCE

The joint bid by James H. Hutchison, of Newark, and the Selbyville Manufacturing Company of Selbyville, Delaware, for the erection of New Castle Hall, the proposed new dormitory for the Women's College here, proved to be the lowest when the estimates of ten contractors were opened at the Delaware School Auxiliary offices in Wilmington yesterday.

Mr. Hutchison's bid for the work was \$134,900, nearly \$5000 under that of the Smyth Construction Company, second on the list. The Selbyville Manufacturing Company, with which Mr. Hutchison is linked for the first time, is headed by former Governor John G. Townsend, Jr.

Mr. Hutchison, when interviewed last night, stated that he had not been formally advised of the awarding of the contract. Following the opening of the bids, the Trustees went into executive session. "I hope," he continued, "that authorization to begin work will come soon, as a great deal may be done towards the new building before winter sets in."

Ten In Field

Ten bids were submitted by Wilmington, Baltimore and Philadelphia firms. Exclusive of the Hutchison bid, they were as follows:

Smyth Construction Co., Wilmington, \$139,500; A. L. Lauritsen, Wilmington, \$139,950; Haddock and Son, Wilmington, \$140,108; Haley and Co., Wilmington, \$141,458; William Francis and Co., Wilmington, \$144,328; J. A. Bader Co., Wilmington, \$146,188; Consolidated Engineering Co., Baltimore, \$148,000; H. E. Baton Co., Philadelphia, \$148,900.

A few of the bids are under the appropriation for the building made by the State Legislature at its last session. The work will be finished and the building ready for occupancy by the opening date of the 1926-27 college year.

Mr. Hutchison has been a resident of Newark for several years, and has completed some high class building contracts. Among the local homes he has built are those of J. Pilling Wright and the new home of Armand Durant, both on Orchard Road. Recently, he completed two new dwellings in the Kells Avenue section of town.

TO PUBLISH IMPORTANT REGISTER FOR STATE

Will Cover Executive Proceedings For Two Centuries.

Former Judge Henry Conrad, the state archivist, is planning to publish an executive register for the State of Delaware which will cover appointments and general conduct of the executive department of the State from the time of the organization of the William Penn government in 1683 up to the year 1850. The work of collecting data for the register from the state archives was started by former Archivist Tatnall and continued by Judge Conrad. The contract for the printing of the book has been awarded to a Wilmington concern.

DIRECTORS TO MEET

Chamber of Commerce Planning Active Year

Announcement has been made that a meeting of the Board of Directors of the Newark Chamber of Commerce will be held on Friday evening of this week.

At that time, plans will be formulated for the fall and winter activities of the Chamber and arrangements made for the annual Fall dinner, to take place soon.

P. & S. Hospital Begins Campaign For More Funds

Wilmington Institution Seeks Money For Broadening Its Service To City And State; Teams Working Hard

BULLETIN

At two o'clock this afternoon, campaign headquarters in Wilmington announced that the grand total had reached \$146,887. Today's pledges, included in the total, were \$84,284.

The first rally report made at Monday's luncheon of the teams and memorial committee in the \$500,000 building and endowment fund campaign for the Physicians and Surgeons Hospital yielded a total of \$72,544, from 262 subscribers.

Of this amount \$62,875 was reported by the memorial committee, of which S. D. Townsend is chairman and which collected this amount from 22 subscribers.

The banner team at the report luncheon was team No. 8 of which Dr. Benjamin R. Veasey is captain. It reported 1,459 from 17 subscribers. Division B, of which Dr. Ira Burns is commander, and which includes team No. 8, led the field with \$3,739 from 55 subscribers.

Mrs. Maud L. Johnstone, director of the campaign, stated that this showing was a good "dress rehearsal," and the work of the teams in the coming few days is expected to return much larger reports on Wednesday and Friday, when, in the ballroom of the Hotel du Pont at noon, (Continued on Page 8.)

SALESMEN VISIT PLANT

Continental Fibre Management Hosts To Road Men This Week

Branch office managers and salesmen attached to the staff of the Continental Fibre Company arrived here early in the week for a series of conferences with company officials. This constitutes the annual visit of the salesmen to the plant. Most of the visitors are quartered at the Deer Park Hotel.

While much of the time is spent in the plant and in sales conferences, the sales force has been given the privilege for using the Country Club links for golf. A number of informal entertainments have also been planned for them.

BUSINESS MAN WEDS

Thos. A. Potts and Mrs. Clara Mather Married Saturday

Mrs. Clara Mather, of Frankford, Pennsylvania, and Thomas A. Potts, well known hardware dealer here, were married Saturday evening at eight o'clock by the Rev. H. Everett Hallman, pastor of the First Presbyterian Church. The ceremony took place at the manse on West Main street.

CHANGE IN DIRECTORATE

J. Irvin Dayett Elected To Board Of Newark B. and L. Association

At this week's meeting of the Newark Building and Loan Association, J. Irvin Dayett, of Coeh's Bridge, was elected a director to succeed Charles B. Evans.

Mr. Evans was elected at last month's meeting to fill the president's chair, made vacant by the death of David C. Rose.

Councilmen Move Towards Control Of Parking Laws

McKelvey-Fader Case Necessitates Binding Ordinance; \$3000 Loan Authorized For Water Bond Interest At Monday's Meeting

Town Council, in regular session Monday night, made the first move in what is expected to be a drastic regulation of automobile parking in the business section here.

The Councilmen decided to authorize the drawing of an ordinance wherein will be set forth binding rules for motorists. It will also likely contain provisions for time limits and a system of warning signs. The matter was discussed at length following complaints against a local motor car dealer. In the minds of the councilmen, traffic through Main street has reached such proportions that something must be done.

Mayor Frazer presided at the meeting. Councilmen Beales, Widdoes, Wilson and Grier were in their places.

Maxwell O. Hammond appeared and requested permission to install a new type of gasoline pump at the curb adjoining his newly acquired property on Main street. After some discussion decision was deferred pending an investigation.

Council authorized the borrowing of \$3000 to meet the interest on water bonds.

Two requests for the use of the room above the Council office for regular meetings the coming winter were refused by Council Monday night. The basis for their decision rests, it is understood, in an ordinance forbidding the renting out of the room for any regular series of meetings. The requests came from the local Boy Scout Troop and from Mrs. Armand Durant. The latter request is said to relate to the possible establishment of a kindergarten.

Additional items of routine business were completed prior to the adjournment of Council.

BREAKS ARM IN FALL

Thirteen-Year-Old Thelma Hall Badly Hurt Saturday

Miss Irma Hall, 13 year old daughter of Mrs. Ora Hall of this town, suffered a fractured right arm Saturday afternoon near the University power house, adjacent to Frazer Field.

The young girl spied some friends watching the football game then in progress on the field, and in her hurry to join them tripped over a wire hidden in a hedge, and fell heavily. Her forearm was badly broken. Within a few minutes after the accident she was taken to the office of Dr. Johnson. Later she was sent to a Wilmington hospital where an X-Ray examination was made. The nature of the break made this procedure necessary. In the hospital, the injured member was set.

INSTALL NEW OFFICERS

Minnehaha Tribe Of Red Men Gather Last Night

With prominent State officers present, and a large number of local members in the lodge rooms, the ceremony of raising the newly elected Chiefs of the Minnehaha Tribe, I. O. R. M., of Newark, was held last evening. Following the ceremonies, a brief social hour was enjoyed.

The new officers of the local lodge are as follows: Prophet, Frederick J. Strickland; Sachem, Willy Von Ehren; Senior Sagamore, Walter Campbell; Junior Sagamore, Edwin Shakespeare.

GATHER AT OLD CHURCH ON SUNDAY

Visitors From All Parts Of The County Are Expected At Head Of Christiana Church, Near Here, Sunday For 223rd Anniversary

Head Of Christiana Church Arranging 223d Anniversary

Hundreds Expected To Attend Services Next Sunday In One Of Delaware's Oldest Institutions; Plan Morning And Evening Services

The two hundred and twenty-third anniversary of the founding of Head of Christiana Church will be observed next Sunday.

The old institution situated along Nottingham pike about two miles west of Newark, will once again open its doors to visitors from many nearby towns and communities. Two services will be held, at 11 in the morning and 7 in the evening. During the afternoon, homes of members of the congregation will be thrown open to friends from a distance, come to participate in the birthday party.

Head of Christiana Church is one of the oldest active Presbyterian institutions in the State. Back in the days when Newark consisted of a cross roads; long before the ardor of the American Revolution swept the colonial states, the old church served pioneers in New Castle county. It has stood fast despite the gradual rise of the urban churches to power. Names of some of the first families in Delaware are inscribed on the weather beaten tombstones in the adjacent cemetery.

In the intervening years, the old families have scattered and gone. But on anniversary day, the descendants come back to the old home country. Each year the celebration grows larger. Next Sunday, providing the weather is clear, the largest crowd of all is expected.

Missionary To Speak

Rev. John McMurray, pastor of the church, announces that a noted missionary of the church, now home on furlough, will be the principal speaker of the day. Mr. and Mrs. Arthur B. Wilson, of Wilmington, always popular with the congregation, will arrange and lead the musical program.

\$950 IN DAMAGES ALLOWED MRS. SMALLEY

Case Involving Death of Son In Accident Settled In Court Session.

Mrs. Mary J. Smalley, of Harmony, near Newark, has been awarded \$950 damages against Francis Reifsnnyder, of Newport, under a decision handed down by Judge Rice in Court of Common Pleas. Charles W. Smalley, son of the plaintiff, was run down and fatally injured on the Newport pike on March 7, last, and Mrs. Smalley brought suit for damages.

Smalley was fixing a tire on his automobile when he was struck by the defendant, it was charged. He died ten days later in a Wilmington hospital.

J. Frank Ball was attorney for the plaintiff, who sued as administratrix of her deceased son, and George W. Lilly represented the defendant. Reifsnnyder claimed his attention was fixed on a bicycle rider he was fearful he might run down and so did not see Smalley.

INVADERS TURNED BACK

Local Linksmen Put Skids Under Brinton Lake Team

Newark made it two straight at the expense of the Brinton Lake Country Club team here Saturday afternoon, when the local gentlemen completely smothered their Pennsylvania contemporaries under a 15-5 score. It was perhaps the last team match for the present season.

The Newark line-up included the following patriots: J. P. Armstrong, Dr. W. O. Sypherd, E. B. Wright, Paul F. Pie, E. J. Menery, C. O. Houghton and Robert C. Lewis.

Addition To Kells

Work on the new addition to Kells began Tuesday morning. It will be rushed to completion. The addition comprises one complete wing two stories high, and an extension of the present building.

Divorce Brings End To Couple's Troubles

Pair Married In Gretna Green; Separate Few Hours Later

On the grounds of malicious desertion Helen K. McCrabb, of Porter's Bridge, has been granted a divorce from Earl J. Wilson, of Oxford, Pa. On January 14 the couple eloped to Elkton and were married by one of the marrying parsons. It was brought out in the testimony that Wilson, who is but eighteen years old, but is over six feet tall, swore that he was 21 years old, when a license was secured.

It was brought out at the hearing last week that when he informed his parents of the marriage there was a scene and the parents threatened to have him sent to the House of Correction. He deserted his bride of a few hours and has since refused to live with her.

TO PENSION MINISTERS

Presbytery Adopts Resolution Calling For 65 Year Age Limit

Presbyterian ministers who have served 35 years in the ministry and have reached the age of 65 years, or who are disabled, may be retired on a pension according to a resolution adopted this week by the Presbytery of New Castle. Under this plan the minimum pension will be \$600 a year and the maximum \$2,000. The amount will be determined by the ministers and churches agreeing to the plan. The pension payments would be divided with the ministers paying two and one-half per cent and the church seven and one-half per cent of the amount apportioned.

This is the 416th stated meeting of the Presbytery which is being held in Makemie Memorial Church, Snow Hill, Md., one of the oldest Presbyterian churches in the United States. The session opened Monday afternoon with about 100 ministers and laymen in attendance and with Dr. A. W. Sonne, of Wilmington, presiding as moderator.

FORMER PASTOR DEAD

Rev. Rollin Sawyer Victim Of Sudden Illness Monday

Newark residents are saddened to hear of the death of Rev. Rollin A. Sawyer, rector of St. Stephen's P. E. Church, of Harrisburg, Pa.

Rev. Sawyer was rector of the Episcopal Church here from 1896 to 1899. Preceding that he had parishes at Odessa, Port Penn and Clayton, Delaware. He left there to go to Carbondale and from there in March, 1905, he went to Harrisburg, where he remained ever since.

The rector had been in robust health until Friday when he was taken suddenly ill.

were 2,818 miles. This had been multiplied to reach 30,635 miles in 1850 and 193,346 miles at the beginning of the century. Today, one-third of the world's main line is laid in the United States, which comprises a sixteenth of the globe's land area. This figures 259,651 miles.

This, in a sense, tells the whole story of the American farmer. The railroads have made it possible for the farmer to invest his energies where the climate, soil and topography logically dictate, while the manufacturer has his plant where he can produce and ship to the best advantage. The railroads have made possible the exchange of their products and have converted the "age of homespun" where each man raised only enough for his own needs to the present era of efficiency in production.

The earliest experimenters of cars on rails, it is worth while noting, had no idea in mind of passenger service. They were simply looking for an easier way to transport coal, ore and stone. Freight then was the original purpose of the railroad, and still is the more important service of the two. Some idea of the intensive growth of freight traffic is realized when one learns that there are 2,500,000 freight cars in use in this country. If they were coupled to one another in a continuous string it would take all the nation's 69,000 locomotives to pull them and the procession would stretch from New York to Denver without a break.

Carry Millions of Tons

Two hundred and twenty million tons of agricultural products were shipped by freight last year, and forty-eight million tons of animals and animal products, the enormous bulk of which without the railroad would either have been wasted or never produced. This averages together 41.5 tons for every farmer in the United States.

Still this is not a fraction of what the railroad has done for the farmer in less than a century. It has afforded him a cheap and convenient means of getting away from his farm from time to time, but better, even than carrying him to the world outside, it has brought the world to him and has dissipated a great deal of his sense of isolation. Daily mails, newspapers, and magazines, the latest motion pictures, besides every manner of merchandise, are brought to him by every train, not to mention the city cousins who descend upon him for a visit in the country.—Baltimore Sun.

CHRISTIANA THACKERY

Elkton Woman Dies In Union Hospital

Miss Christiana Thackery, the last surviving daughter of the late Thomas and Sarah Thackery, of Elkton, died at Union Hospital, Elkton, on Wednesday, of general debility, aged 77 years. Her life was one of self-sacrificing service to her family, by whom he was beloved, and to others to whom she ministered. For twenty-five years past she had resided in Dover, Delaware, visiting from time to time at the home of her brother, Robert C. Thackery, Esq., who survives her with another brother, Allen C., of Philadelphia. Her funeral was held Friday from her brother's home on East Main street, with services conducted by Rev. G. Harris, and interment in the family lot, in Elkton Cemetery.

MERMAID

selection from the writings of Edgar A. Guest.

Miss Sara Pennington is ill at her home here, suffering with shingles.

Sara Kelly returned home from the hospital recently and is reported much improved.

Mrs. Earl Staats is spending this week as a guest of her sister, Mrs. Harry Brackin.

Mrs. Leonard Eastburn entertained Miss Carolyn Peach on Monday afternoon in honor of Mrs. Eastburn's guest, Mrs. Marion Armstrong Schwartz, of Los Angeles.

Messrs. E. H. Rubencane and Howard Pierson were Sunday visitors at the Pennington home.

Blanche Derrickson and Abner Woodward motored to Millersville Sunday to visit Miss Helen Pennington, who is attending Normal School there.

Mr. and Mrs. Peach and two daughters, Mrs. Garrison and Miss Carolyn Peach, spent Friday last at the home of F. C. Bancroft, near Wyoming.

Mrs. Leslie Derrickson was taken to the Samaritan Hospital, Philadelphia a few days ago for an operation.

J. H. Peach and Mrs. Harvey Ball were Friday guests at the A. B. Dennison home.

A number of young people attended a party at the home of Horace Woodward Saturday evening, the occasion being his 18th birthday.

State Health Campaign

At a meeting of the Cecil County Health Association held in Elkton, on Thursday, it was decided to conduct a Financial Campaign in the county, during the weeks of October 25th to November 7th. The object of the drive will be to obtain funds to support a County Health Nurse, and everyone will be asked to assist.

The following committee of women was named to conduct the campaign in their respective districts:

First district—Miss Frances W. Davis.

Second district—Mrs. Harold Steele.

Third district—Mrs. Henry M. McCullough.

Fourth district—Mrs. A. D. Short.

Fifth district—Mrs. George O. Garey.

Sixth district—Mrs. R. C. Dodson, Miss Bertha Balderston and Mrs. Eleanor J. Moore.

Seventh district—Mrs. G. R. Emery and Miss Alice Miller.

Eighth district—Mrs. Louis Taylor.

Ninth district—Mrs. Norman Wright and Miss A. O. Stockbridge.

One Hundred Years Of Railroadings Phenomenal Growth Of Great Industry Outlined From Time Of Stevenson's "Puffing Billy" Back In 1825

On a little American farm a hundred years ago a farmer sat on the back-door porch of his home and there in the autumn twilight looked over his fields in their heavy ripeness and mused on what he saw. Corn was there in abundance—more than he could possibly use or dispose of. He could have doubled his live stock had there been any point in doing so. His wheat had not done so well that season; perhaps with closer cultivation he could have a better crop next year; but there, again, it hardly seemed worthwhile, as all his neighbors had plenty and there was not feasible way of marketing it.

He did not know that that very day—September 27, 1825—had seen an event which was to alter for all time the lives of his family, his neighbors and in fact all the world.

For that was the day that George Stephenson's locomotive made the first passenger trip, the now famous fifteen mile run from Darlington to Stockton, England. The centennial of that event is being widely celebrated this year all over the civilized world.

Wooden tracks had been used for some years, then steel over wood and finally all steel. Provisions had been made for hauling wagons over these tracks with men, horses or "other-wise," and it was this last means that Stephenson chose.

Like Barrel On Wheels

"Puffing Billy" was the name of the first locomotive and it bore a resemblance to a barrel on wheels with a stovepipe stuck up on top of it in front.

A flagman was part of the train's equipment, his job being to ride on horseback in advance of the train ringing a bell and waving his red flag to clear the track for the fast ex-

press, tearing through space at some eight or ten miles an hour.

A little cart holding wood and a tank of water for the boiler were directly back of the crazy little engine and then came the passenger wagons. The seats were simply planks stretched across.

One can well imagine the excitement, consternation and discussion which the first train caused. The ladies complained of the smoke and discomfort; the overpious questioned whether God had intended man to use the forces of nature, and the owners of the 3,000 coaches of England looked with alarm at this unexpected danger to their business.

First, second and third class coaches were soon instituted, the last placed nearest the engine where the greatest danger lay. Then the air bristled with a rumor of a brand-new disease of the brain, caused, it was said, by riding at such a rapid rate. Gentlemen traveling from Manchester to Liverpool were so affected by the swift motion as to become completely addled, forgetting what they came for, and had to write home to find out.

Comes to United States

The locomotive was not slow to find its way over the United States, and the story of the coming of the railroad to America is one of the most exciting and inspiring stories of our history.

"I consider this among the most important acts of my life," said Charles Carroll when, 90 years old, he laid the cornerstone of the Baltimore and Ohio Railroad, "second only to the signing of the Declaration of Independence, if even it be second to that."

Twenty-three miles of tracks were in use by 1830. Ten years later there

Cecil County Court Ends Busy Session; Elk Mills Woman's Sentence Suspended

After a session of two weeks the Circuit Court for Cecil County came to a close on Thursday. A large number of criminal cases were disposed of. Several liquor cases came to trial and sentences or fines were imposed on the malefactors. The last two days' session took up the case of Mrs. Kate Johnson, wife of Oscar Johnson, who had pleaded guilty to selling liquor last week, chose a jury trial on the charge of selling liquor to four residents of Elk Mills, one of whom, Clyde Emerick, died after drinking it. She was found guilty, but sentence was suspended as she has a family of children, and her husband was given a term in the House of Correction. On Wednesday night, Charles R. Wharton was given 30 days in jail in one case, and sentence was suspended in the others in which he had pleaded guilty, until December for the Court's further consideration of his case.

Norris Jackson, of Havre de Grace, charged with selling liquor to two residents of Chesapeake City, chose a jury trial. Mr. Crothers appeared for him. The other jurors were discharged finally. Jackson was found guilty and later was fined \$50 and costs, which he paid.

In the afternoon the Commissioners of Charlestown vs. John S. Scouler, of Philadelphia, was put on trial before the Court. Trial of it was resumed on Thursday and closed in the afternoon. The suit was brought to eject the defendant from a lot in Charlestown for which Edward Haney, now living in the West, had obtained a patent under the title of Haney's Discovery, from the Land Office in Annapolis, notice of the application for the patent having been published in the Midland Journal of Rising Sun only. The patent was passed regularly, giving title to the ground. He conveyed it later to Scouler, who was well known as a visitor in Charlestown, for \$1 and other considerations. Scouler claimed that he patent gave title also to a town wharf used as such since 1755. The suit was brought to vacate the title given by the patent. Messrs Brown and Crothers appeared for the plaintiffs, and Mr. Bratton for the defendant. Counsel for the plaintiffs contended that the long use of the wharf by the town gave it virtual possession which the patent could not affect. The Court gave judgment for the Commissioners, with nominal damages of one cent, putting the costs of the suit upon the defendant. His counsel gave notice of a motion to be offered for a new trial of the case. Court was then adjourned until the second Monday in December. The Grand Jury before it was discharged, made the following report:

To the Honorable Judges of the Circuit Court of Cecil County:

We, the Grand Jurors of the September Term, 1925, for the Circuit Court for Cecil County, have finished all its work and beg leave to submit the following report:

We have examined 40 witnesses and found 20 presentments and 20 true bills, ignored 1 case, 1 passed over for the December Term, witnesses not available.

Constables from 1st, 2nd, 3rd, 4th, 6th and 7th districts examined and reported no violations in their districts.

A committee consisting of John E. Reynolds, Samuel R. Miller and Walter S. Fox visited the Alms House, reported as follows:

Found 3 horses, 6 cows, 1 beef cow, 1 heifer and 1 bull, stock in good shape.

Twenty-five tons of baled hay, 20 tons loose hay, 7 tons baled oat straw, 15 tons loose straw, 6 shoats, 6 brood sows, and 1 with 9 pigs.

Farm machinery in good shape.

One hundred bushels wheat, 450 bushels oats, 20 acres corn, 45 acres of ground to go in wheat, 1 1/2 acres late potatoes, 1 1/2 acres of truck, 3/4 acre of turnips, 20 turkeys, 75 chickens, 30 guineas, 20 ducks.

Inmates—5 white males, 5 white females, 3 colored males, 2 colored females.

Fifty tons coal in cellar, 1 barrel beans, found buildings in fair condition.

The Grand Jury visited the County Jail in a body, found inmates, 10 males, 1 female, colored, 9 white males, 1 white female.

Found four large window lights needed, recommended that his be attended to, also the lower floor.

JESSE T. CAMERON,
E. D. CARHART, Foreman,
Secretary.

Prominent Elktonian Stricken By Paralysis

Henry Vinsinger Succumbs After Day's Illness; Funeral Held Monday

The funeral of Henry Vinsinger, one of Elkton's best known citizens, was held from his late home on East Main street Monday afternoon. It was largely attend by friends from various parts of the county. Interment was made in Elkton cemetery.

The deceased was 75 years of age, and was born near Kemblesville, Pa., being a son of the late William Vinsinger. When quite a young man he located in Elkton, engaging in the milling business. Later, he disposed of that business to Alfred Davis and his son, William T. Vinsinger, who conducted the Head of Elk Mills, until the property was bought by the Town of Elkton, a few years ago. Mr. Vinsinger after quitting the milling business, engaged in the undertaking and furniture business, which he disposed to Harry W. Pippin about ten years ago, and had since retired.

For many years, Mr. Vinsinger was an official member of the Elkton M. E. Church, and for about 40 years was superintendent of the Sunday School. He was a director and one of the organizers of the Elkton Banking and Trust Company.

He married Miss Cordelia Strickland of Elkton, who died about ten years ago. Two sons, William T. Vinsinger, of Elkton, and H. Edwin Vinsinger, of Newark, survive him.

Many Interesting Notes Mark Week Over Elkton Way

Churches Busy With Early Fall Activities; Boy Hurt By Rifle Bullet; Complete New High Street Sewer

Elkton's Dollar Day, the big Fall shopping event held each year in the county seat, has been set for Wednesday, October 21st. Merchants are co-operating with the Chamber of Commerce in an effort to make this occasion the biggest ever held.

At the Quarterly Conference of Elkton Methodist Episcopal Church held in the Church House last Thursday night, an invitation was extended to Rev. W. G. Harris to return for next year.

The School Board and the Parent-Teacher Association of Elkton have given contract for four inside bells and two 8-inch outside gongs for the new elementary school in Elkton.

Rally Day service was held on Sunday in the Elkton Presbyterian Church. An interesting program was rendered at the morning service. Mr. Frank Mitchell, under warden at the New Castle Workhouse, was the speaker.

The North East Firemen last week selected August 6-14 as dates for their carnival next year.

St. Mary's Protestant Episcopal Church, North East, was reopened on Sunday after undergoing extensive repairs. Bishop Davenport preached

at the morning service, and Rev. John T. Yellott, of Bel Air, officiated at the evening service.

The football season opened at Tome School on Wednesday afternoon by the local eleven defeating the Forty-Ninth Squadron from Aberdeen, 13-0.

Joshua M. Ash fractured several ribs on Thursday when he made a misstep while carrying a chair down stairs.

Henry Phippen, the 10-year-old son of Mr. and Mrs. Harry W. Pippin, while he and a companion were shooting at a target, was accidentally shot in the lower lip by a rifle. The bullet was removed by a physician.

The Wilmington District Woman's Home Missionary Society will hold an all-day session in the Church House, Elkton, on Thursday.

The work of laying the sanitary sewer on East High street, Elkton, was completed last week.

PARTY AT ELK MILLS

Mr. and Mrs. Ford Entertain in Honor of Daughter

Mr. and Mrs. Joseph Ford, of Elk Mills, gave a party Friday evening at their home in honor of their daughter, Ella. The evening was spent in dancing and playing game.

Those present: Misses Barbara Jackson, Mildred Ruth, Gladys Ruth, Hilda Gregg, Rachel Jackson, Emily Jackson, Ella Ford, Alverda Ford, Hilda Reed, Cora Riggs, Pauline Reed, of Elk Mills, and Elizabeth Jackson, of Philadelphia, Pa.; Wilbur Ford, Thomas Kay, Albert Warpole, Richard Jackson, Norman Moore, Alfred Kay, Adis Jackson, Claude Jackson, Vernon Jackson, Eddie Ford, Howard Reed, Raynold Kay.

Train Changes For Elkton Announced

The winter schedule on the Pennsylvania Railroad went into effect on September 27. The following changes are made for Elkton:—5:30 a. m. northbound is eliminated; 6:25 a. m. is changed to 5:48; 8:14 a. m. to 8:10 a. m., and a new train is put on, due at 10:29 p. m. Southbound—12:15 a. m. is changed to 1:30 a. m.; 5:52 p. m. to 5:49 p. m.; 9:45 p. m. to 9:15 p. m.

MERMAID

The weekly grange meeting Monday night was well attended by the members. During the business session it was decided to dispense with the order for fodder yarn.

During the lecturer's hour at which Mrs. L. H. Pennington presided, piano solos were rendered by Miss Pearl Harrington; Frances Dennison read her prize essay on "Road Improvements"; Edna Brackin gave a reading, and Mrs. Pennington read a

Personals

Miss Etta Boulden, after a lengthy visit with her parents, Mr. and Mrs. George Boulden, has returned to Washington, D. C.

Sunday was Rally Day at the Methodist Church and most of the classes were present with full quota. The services were very interesting from beginning to end. A sixpiece orchestra furnished music and were assisted at intervals by the four little babes who were chistened.

The Gleaners and Westminster Guild held their monthly meetings Tuesday evening of this week.

The Women's Club held its first meeting of the season yesterday afternoon at the Odd Fellows Hall.

Mrs. William Feehly, who has been ill for the past two weeks, is slowly improving.

Miss Edith Cawley is home after a successful operation for appendicitis at Union Hospital.

William H. Gilpin has returned from a three months motor trip to the Pacific Coast.

Misses Julia and Marian Young left Sunday for New Orleans where they will attend the Convention of the Protestant Episcopal Church. They will visit relatives in the Carolinas on their return trip home.

Mrs. John F. Sparklin spent several days last week with her sister, Mrs. George T. Witworth, in Wilmington.

Messrs. John Maloney, of Elkton, and Edward McKenzie and Charles Scarborough, of Providence, are in Omaha, Neb., where they will attend the National Convention of the American Legion, represent Elkton Post.

Miss Evelyn Sparklin is the guest of Miss Margaret Shockley, in Wilmington.

Who Pays Uncle Sam's Bills?

Who actually pays Uncle Sam's bills is a question which has been raised recently in connection with the road building program of the various states in co-operation with the Federal government.

In an effort to present a true answer to the public, and one devoid of all trace of deceptive calculation, the American Association of State Highway Officials has gone into the matter exhaustively.

Rich states, according to a statement just issued by the Association point to their percentages of internal revenue payments and assert that they are paying more than their due share of Federal highway construction costs, considering the amounts they get back.

Other states not so rich in national wealth but exceeding the so-called rich states in basis value, assert that since all national wealth is derived from basic wealth, this latter should be largely the standard by which states are to be credited in helping the Federal government meet its bills. It is their contention, in the main, that states which put flour in the bin and bacon on the shelf are entitled to equal consideration with other states that show on the surface the largest cash payments to Uncle Sam, for the farmers today are called upon to furnish food for 80 of our 110 million people. By basic wealth is meant the value of one year's production of wealth from minerals, forest, animals, and agriculture.

Basic wealth gets the least return for its products. Many crops are perishable and must take the market price offered.

In considering the matter, highway officials contend that a national viewpoint should be taken.

"When the Federal government wants funds to meet its obligations," says the officials, "citizens are called upon irrespective of residence to pay according to their means. States, as such, have no obligations, and tabulation of receipts for the Federal Treasury, by states, is misleading, unfair and in many cases far from the truth as to who meets the assessments. Probably the ideal way of considering the real business affairs of the Nation as transacted by present day methods would be to discard all state lines and consider New York, Boston, Philadelphia, Baltimore, New Orleans, St. Louis, Chicago, San Francisco, etc., as clearing house centers. But we have been in the habit of telling what this state

does and what that state has accomplished, so long, that certain results are tabulated as by states, when in reality some states would actually starve if it were not for their neighbors. They have plenty of gold in the till but no hills on which to graze the cattle. Some of the richest states in the Union do not annually produce one half of one per cent of the basic wealth so necessary to our very National existence.

"Some people are born in one state, educated in another, and attain business success in another—always at home and proudly American. Others are like one of the early fathers, who, going twelve miles west of Boston, celebrated the event by erecting a stake on which he had inscribed:—'Thus far shall civilization go and no farther.'"

For the purpose of making their point that basic rather than national wealth should govern largely in fixing the position of states in their contribution toward Federal expenditures, highway officials have selected the first fifteen ranking states in basic wealth, to show their basic wealth percentages as compared to their percentages of the total national wealth, and their percentages of total payments through internal revenue and population. States ranking basic wealth are given in the following order: Pennsylvania, Texas, Illinois, California, Iowa, Ohio, Oklahoma, Missouri, Minnesota, New York, Kansas, Indiana, Wisconsin, Michigan and West Virginia.

As a group, these states, comprising less than one third of the nation provide, according to government statistics, 61.6 per cent of the nation's basic wealth, 64.3 per cent of its national wealth and they pay 72.24 per cent of the total internal revenue from a population representing 58.7 per cent of the whole.

Among the states that put flour in the bin and bacon on the shelf, Kansas and Iowa afford excellent examples. The latter state, with 2.2 per cent of the total population pays only .06 per cent of the total internal revenue but it produces 3.3 per cent of the national wealth and gives the nation 4.8 per cent of its basic wealth. Kansas gives the nation 3.0 per cent of its basic wealth and is credited with 2.0 per cent of the national wealth and yet it pays only .07 per cent of the total internal revenue because its basic products go to other states.

New York, from the standpoint of basic wealth, ranks tenth in the total

"Good Roads, Flowers, Parks, Better Schools, Trees, Pure Water, Fresh Air, Sunshine and Work for Everybody"—OUR MOTTO

value of basic products, whereas Iowa ranks fifth and Kansas eleventh. From the foregoing it is claimed that the answer to the question "Who pay Uncle Sam's bills," if it is to be answered in economic justice, is found largely in basic wealth,—the source of all national wealth, and the initial source from which internal revenue funds start, no matter in what geographical division the final checks are written.

People's Column

October 5th, 1925.

Editor THE POST,

Sir: I believe a little matter of road signs for Newark was discussed at length in your columns some weeks ago. They were to be erected within a very, very few days.

No doubt they are very attractive, perhaps a bit too pretty, even, to be exposed to the horrid old rain. But let's have a public unveiling, anyhow. Hopefully yours,

Willie.

How The Others See It

There are times when it seems as though we have made a permanent waive of personal rights.—Philadelphia Inquirer.

They are thinking of erecting a bust to the man who invented the Volstead Law. A bust would be appropriate.—Elm City Clarion.

During the last year births in the United States have averaged five every minute. Thus does nature work overtime to repair the havoc wrought by gunmen and automobiles.—Cleveland Plain Dealer.

The Bambino ought to realize that battling around at night doesn't make for batting around during the day.—Norfolk Virginia-Pilot.

There doesn't seem to be any doubt about being able to collect from Europe, if we only lend her enough money to keep a little out for herself.—Sandusky Register.

The boy's last hope hangs on the remote possibility that the school board neglected to put in any coal.—Syracuse Herald.

Everything must have a beginning. Perhaps people could be persuaded to obey the laws on Tuesdays and Fridays.—Elm City Clarion.

Another bit of good advice is never to start anything you can't stop.—Philadelphia Inquirer.

Odd Lot of Women's Evening Dresses Half Off. What's odd about that?—Arkansas Gazette.

The diamaying thing is not what man descended from, but what he descends to.—Elm City Clarion.

You may not be able to find perpetual youth in Chicago but, at least, you can easily avoid old age.—Arkansas Gazette.

Enact the Ten Commandments into civil law and there would be a frightful howl against the restraint of personal liberty.—Toledo Blade.

MD. NATIONAL GUARD MAY CAMP ON 'SHORE

Report Abroad that Virginia Beach Will Be Discontinued as Summer Headquarters.

The Maryland State National Guard camp, says the Centerville, Md., Record, may be located somewhere on the Eastern Shore by next summer.

For several years the Maryland Guard has been holding its annual encampment at Virginia Beach. After this year's outing the State officials abandoned this site and stated

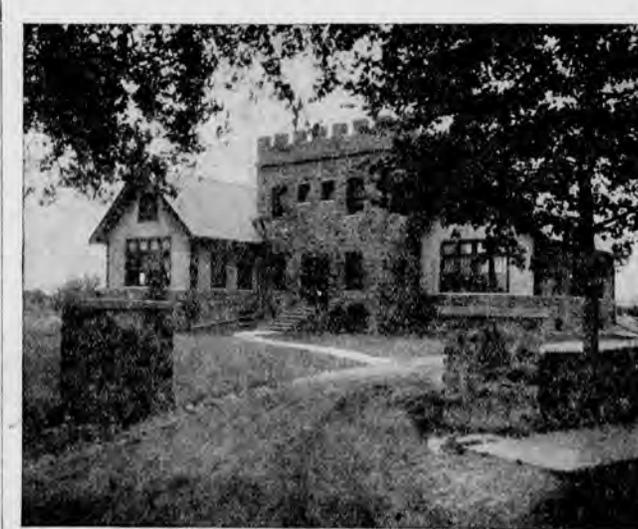

that the encampments in the future would be held in Maryland. When this was known the Chamber of Commerce of Berlin got busy and obtained an option on 850 acres of land on Sinepuxent Bay and offered it to the officers of the Maryland State Guard. Since then the option has been enlarged to include three thousand acres. At a meeting held last Tuesday in Berlin a committee was appointed to place this matter before the officers of the State Guard and to do all they can to induce the state to accept this site as the place for the annual encampment.

General Reckord said Tuesday he expected to inspect the proposed National Guard camp site on the Sinepuxent Bay within the next few weeks.

"I am interested," General Reckord said, "in selecting some available location. I may say that a site on the Sinepuxent Bay does not appeal to me more than a site on the Chesapeake Bay, but I should like to be shown some location on the ocean front.

"I expect to visit Ocean City in the near future and will inspect all the sites available in that vicinity. A site on the Chesapeake Bay would be more centrally located in the State than a site on the Sinepuxent, but a site on the ocean front would be a different matter.

"Just now I am considering certain plans in regard to a camp site, but am not yet ready to divulge them. In the meanwhile I am receiving many proposals as to possible sites."

ENTERTAIN ROCK CHURCH LADIES

Mrs. H. E. Tiffany very pleasantly entertained the members of the Ladies Missionary Society of Rock Presbyterian Church, on Saturday afternoon, October 3d, at her home on Amstel avenue, in honor of her mother who for more than eighteen years has been President of the Society, but owing to an accident two years ago has been unable to meet with them regularly. The very efficient Vice-President, Mrs. T. E. Meeker, a graduate of a Baltimore Training College and as a worker in Rock Church, is doing excellent work for the Society in the cause of Missions, as Supervising President during Mrs. Brokaw's enforced absence.

Weddings

Wagner-Clark

Miss Ida ("Betty") Wagner, of Philadelphia, and Charles H. ("Chick") Clark of this town were quietly married in Elkton on Saturday last by the Rev. W. G. Harris, pastor of the Methodist Episcopal Church there. The groom is well known in Newark. He is the son of Mr. and Mrs. John Clark. The bride is a niece of Mr. and Mrs. William J. Lovett. She has for some years spent her summer vacations in Newark and enjoyed a wide circle of friends here.

Mr. and Mrs. Clark made a brief tour down State over the week-end, visiting relatives and friends at Dover. They also spent a few hours in Newark.

Tall-Lewis

Marriage licenses were issued late last week in Elkton to Naomi M. Tall and Myer M. Lewis, both of Newark.

Moore-Guhl

Miss Evelyn M. Moore, daughter of George A. Moore, Newark, Delaware, and Elmer R. Guhl, of Kemblesville, Pa., were quietly married by Rev. W. R. Moon, at Elkton, Md., on Saturday afternoon, October 3rd.

They were accompanied by Mr. and Mrs. David T. Perry and Mr. Edward Moore and Miss Elsie Reed, of Newark. They motored on to Aberdeen, Md., where they were given a dinner, and later in the evening a reception at the home of the groom's sister, Mrs. Myrtle Tweed. Those present

Miss Mary Amelia Zinberg has entered "Dana Hall," Wellesley, Mass., as a freshman, taking the college preparatory course.

YOUNG PEOPLE ENJOY DOGGIE ROAST

The banks of White Clay Creek rang with merry shouts as the following young people from the University of Delaware gathered there on Thursday of last week to hold a "hot dog" roast: Louise Burke, Peggy Burke, Elinore Butler, Ruth Butler, Frances Butler, Elizabeth Crooks, Les Blackwell, Clyde Davis, Cliff Callaway, Herb Clark, Jr., Ira Ellis, George Bringham, Marshall Manns, and Gove Loveland.

The family of A. C. Davis have removed from their former home on South College Avenue and have joined Mr. Davis in Altoona, Pa., where he is now stationed.

Mr. and Mrs. J. E. Burch and daughter, of Wilmington, spent Sunday at the home of Mr. and Mrs. P. R. Shumar.

Mrs. Wallace M. Johnson is reported to be ill in a Wilmington hospital.

The Misses Alice Williamson, Edith Malsbergen, and Edith Rose, of the Newark High School, were among the girls in a watermelon party down in Maryland last week.

Mrs. Helen Wilson left today for a two weeks stay with relatives and friends in Virginia.

Mrs. Jos. W. Bond and son, Joseph, of Germantown, Pa., and Mrs. Wm. Reese and daughter, Dorris, of Fox Chase, Pa., spent several days visiting Mr. and Mrs. H. J. Gaerthe.

Mrs. D. Lee Rose gave a dinner Sunday in honor of her son, Reginald's birthday. The immediate family and relatives were the guests.

Mrs. Nathan Steltzer, of Willow Grove, Pa., and Mrs. Frederick Weidner, of Philadelphia, visited Mr. and Mrs. Gaerthe on Monday.

LUNCHEON GIVEN FOR MRS. ZINBERG

Mrs. Mary Dora Armstrong and daughter, Mrs. Wingett, of "Spring Run Farm," gave a luncheon on Friday, October 2nd, in honor of Mrs. Sam Zinberg, of Forest Hills, Long Island. Mr. and Mrs. Zinberg are sailing for Europe on October 10th, for a two months trip.

were Mr. and Mrs. Elmer Guhl, Mr. and Mrs. David Perry, Mr. Edward Moore, Miss Elsie Reed, Newark; Mr. and Mrs. Jordan Tweed, Mr. and Mrs. George Buedy, Mrs. G. W. Wagner, Mrs. Cora Weil, David E. Buedy, Charles Buedy, Mr. and Mrs. George C. Keller, Mr. and Mrs. Arthur Chandler, Mr. and Mrs. Chester Stevens and son Ray Stevens, Mr. and Mrs. Roff Gross, Mrs. Austin Andrews, Mrs. Minnie McClean and Mr. Orion Ford, all of Aberdeen, Md. A pleasant evening was spent in playing cards and dancing.

MISSIONARY SOCIETY

The Women's Home Missionary Society of the Presbyterian Church will meet at the home of Miss Leta Waters, East Main street, on Friday evening, October 9th, at 7:30 o'clock. Mrs. Williams, president of the Missionary Society of First Central Presbyterian Church, Wilmington, will address the meeting on "Missions in General."

BIRTHS

Born on Sunday evening to Mr. and Mrs. Randolph Lindell, of Cleveland avenue, a baby daughter.

Word has been received in Newark of the birth recently of a baby girl to Captain and Mrs. Roy Sparks, former residents of Newark. Mrs. Sparks is at the home of her parents in Ohio.

Luncheon-Bridge

Mrs. R. A. Whittingham entertained about thirty ladies at a delightful luncheon in the Deer Park Hotel here yesterday. Later the guests enjoyed an afternoon of bridge at the Whittingham home, "Linden Hall,"

New Century Club

The opening meeting of the New Century Club was well attended.

There was little business that required immediate action so most of the afternoon was given over to music, travel talks, refreshments and sociability.

Mrs. Lasher, always a pleasure to listen to, played a piano selection. Mr. Matthews, of the University Faculty, sang several beautiful selections, he was accompanied by Miss Nell Wilson. Mr. Matthews has come but recently into our community. We shall look forward with pleasure to hearing him again.

Mrs. Cann invited all those present to step into her car and with her (in imagination) we set out for Quebec. Among the places we stopped on our way north were West Point, Saratoga, Lake George and Montreal. We spent most of our time in the quaint old city. Our return route was by way of the Green Mountains of Vermont and the Connecticut Valley. Thus we had a variety of beautiful scenery and a fine time.

Next Dean Robinson took us aboard ship with her and the Foreign Study Group, whom she was escorting to France. So well did the Dean conduct her party that not one was absent when meals were announced. With the Dean we saw all the students comfortably placed in charming French homes. This duty having been faithfully discharged, we went out to see the world. My how interesting it all was! What beautiful cities! What interesting people our over-seas neighbors are.

The club members noticed that a good deal of grading and cement work had been done on the club grounds during the summer recess. We were informed that the heavy expense incurred by these improvements was borne by our generous friend, Mr. S. J. Wright.

—Secretary.

RED MEN BUSY

Deputy Great Sachem Frank M. Smith (pro tem.) and Staff of Great Chiefs trailed to Bear Station on last Thursday's Sleep and raised the Chiefs of Little Bear Tribe No. 46; on Monday's Sleep visited Union and raised Chiefs of Wawa Tribe No. 45; and last night's Sleep raised the Chiefs of Minnehaha Tribe No. 23. On next Tuesday's Sleep Brother Smith and Staff will trail to Middletown and raise the Chiefs there. All members of Staff and all others who care to go will meet at Fraternal Hall at 7 o'clock.

FROM CALIFORNIA

Dr. A. Lee Porter, of Saratoga, California, is the guest this week of Dr. and Mrs. Charles L. Penny, on West Main street. Dr. Porter was a former resident of Newark.

NEEDLEWORK GUILD

Preparations Made For Annual Garment Exhibition Here

The Officers and Directors of the Newark Branch of the Needlework Guild are preparing for the annual collection and exhibition of garments which will take place the first week of November.

A meeting of the executive committee will be held next week to make the final arrangements.

Youngster Improved

Master Tom Cooch, son of Mr. and Mrs. Edward W. Cooch, of Cooch's Bridge, who has been seriously ill at Johns Hopkins Hospital with paralysis of the throat, was brought home last Thursday. He continues to improve and is now able to eat normally and be up an increasing length of time each day.

In Memoriam

In sad but loving remembrance of my dear mother, Susie Larimore, wife of James Larimore who departed this life September 3, 1925, at her home near Chestnut Grove, Md. She was 58 years of age.

Gone but not forgotten,
Day by day we saw her fade
And slowly pass away,
Yet in our hearts we often prayed
That she might longer stay.

Her busy hands are folded,
Her work on earth is done;
Her troubles all are ended,
Her heavenly crown is won.

Rest on, dear Mother, thy work is o'er,
Thy willing hands will toil no more,

A faithful mother, true and kind,
A better mother, we can never find.

Her Daughter, Annie Frampton.

In Memoriam

My dear son, Charles W. Mercer, died October 10th, 1922. Today recalls sad memories of a loved one gone to rest. How we miss you everywhere, You will never be forgotten, Never from our memory fade, Sad and loving hearts will always Linger around the grave where you are laid.

—Mother.

Mrs. Katherine Gamble

The funeral of Mrs. Katherine Gamble was held from her late home on Delaware avenue, Monday after-

L. M. HAGEMAN

Moving and Hauling

noon of this week. Mrs. Gamble, one of the well known older residents of Newark, died on Friday. She was 85 years old. Interment was made in the Newark cemetery. Deceased is survived by two daughters, Mrs. Spence and Mrs. Aiken, both of Newark.

She was the widow of James Gamble, who died a few years ago. Her husband dug the first spadeful of earth for the present plant of the Continental Fibre Company, and was

in the continuous employ of that firm until his death.

Card of Thanks

We appreciate the sympathy and kindly helpfulness of our many friends and neighbors, who remembered us in our sorrow, and assisted in every way, also sending beautiful flowers for our dear wife and mother, Mrs. Charlotte G. Owen, for all of which we are very grateful.

—Frank Owen and Family.

Fire statistics come home to roost

Cold statistics of millions lost through roof fires seem to mean so little to the man who has never been "burnt"—but every year thousands of home owners pay the bill.

Fire authorities blame inflammable roofs for a large proportion of America's fires and plead for fire-safe roofings. They have endorsed asbestos roofings as the sort of protection vitally needed by every roof.

The safety of a Johns-Manville Asbestos Shingle roof costs less in the long run than the risk of inflammable roofings. Beauty and permanence make these shingles a lasting improvement that adds greatly to the cash value of your home.

Unsung Freshman Leaps Into Spotlight As Delaware Downs St. Joseph's In Opener, 14-6

Glasser, Westville High School Boy Last Year, Scores Touchdown For Blue And Gold In Team's Great Comeback

After undergoing a thorough trouncing for practically half the game, the Delaware eleven turned on the invaders from St. Joseph's Saturday and beat them down by a determined rush in the last two quarters. Two touchdowns were all they could manufacture, one through a fortunate break in the game, and the other the outcome of a dazzling aerial attack.

Coach Ed. McGinley brought a husky bunch of warriors to Newark. From end to end the line withstood every Delaware attack nobly. In fact, it could be said from an analysis of the scoring that Coach Forstburg's boys were impotent in straight line plunging and tackle plays.

St. Joseph's ripped off six plays in less than two minutes and had a touchdown to start the game. It was a steady march down the field through a demoralized Delaware defense. As the game wore on, however, Delaware put more steam in their play, shook off the "buck fever" of their first game, and were outplaying the visiting team in the last stages.

In the second quarter, Delaware received the first of many breaks of the game. Creamer punted to the St. Joe's quarterback who fumbled when tackled in midfield. A mad scramble for the ball resulted. Both teams kicked and juggled the ball all over the field and when the elusive pigskin was finally brought to rest it was in the hands of Glasser, only three yards from St. Joe's goal line. "Dutch" Weggenman, the fullback of the home team, took it over, tying the score. Fritz Creamer gave Delaware a one point lead by booting a perfect dropkick. The half ended with the ball in midfield.

Up to this point Delaware had been clearly outplayed although they were in the lead. Delaware made only one first down during the entire first half while McGinley's charges had gained ground with comparative ease.

Delaware Stages Comeback

Coach Forstburg must have told his boys a few things for they came out for the final half with determination in their eyes. The entire third quarter was a hammer and tong affair for the ball changed hands on downs every few minutes. Both teams seemed on a par and neither tried any open plays. The visitors were penalized heavily in this period for holding and Kalen the St. Joseph's signal caller was sent from the game for slugging.

In the last quarter the Blue and Gold opened up with an aerial attack which proved a puzzle to their opponents for they marched steadily up the field. St. Joseph's held for downs on their own 10-yard line and when they attempted a forward the ball was intercepted by Red Owens, the Delaware right guard, who dashed 15 yards into the shadow of the goal posts. "Fritz" Creamer, the heady field general of the Newark lads,

using beautiful reception threw a perfect pass to Glasser across the goal line, scoring the second touchdown for Delaware.

Creamer, who is a former Jenkintown High School star, played a fine game, as did Bill Lohman the fleet left end. Glasser, Forstburg's latest protege, is a former Westville High School star, where he played tackle for two years besides getting letters in both baseball and basketball.

Delaware will play at home again next week when they meet Ursinus at Joe Frazer Field. Ursinus is reputed to be strong this year with a heavy line. The game will start at 2.30. The line-up:

Delaware	St. Joseph
Lohman left end	Swank
Coppock left tackle	Dougherty
Reybold left guard	Wright
Swezey center	Desmond
Owens right guard	Donohoe
Torbett right tackle	Cooney
Beatty right end	Henry
Creamer quarterback	Kalen
Wooten left halfback	Dineen
Cheepak right halfback	J. Mostovoy
Weggenman fullback	Oaks

Substitutions—Delaware: Reybold for Swezey, Cathcart for Reybold, Reese for Owens, Glasser for Beatty, Rose for Cheepak, Draper for Rose; St. Joseph's: Jack Mustovoy for Swank, Hughes for Dineen, Tong for Cooney. Time of quarters: 12 min. Referee—W. Douthett, Ursinus. Umpire—S. Hunt, Merceburg. Head linesman—W. H. Tatnall, Haverford.

SCORE BY PERIODS

Delaware	0	7	0	7-14
St. Joseph's	6	0	0	0-6

Touchdowns—Oaks, Weggenman and Glasser. Points after touchdowns—Creamer, 2.

HENLOPEN LIGHT

(Dedicated to Captain J. T.)

BY EDITH NEWLIN, LEWES, DELAWARE
Two hundred years Henlopen's light Has flashed her signal through the night.

A star to guide the ships aright,
Two hundred years! And now at last,
The bruise and buffet of the blast,
And lash of waves in fury crash,
By mad sea never satisfied
Against her proud unyielding side,
Have warped her walls but not her pride.

Though tottering she stands and frail
Still in the high sea and the gale,
She lifts the light that shall not fail.

Oh! Delaware, be thou her groom!
Another gale may seal her doom
What peril if she falls, what gloom.
Brave sailors lost and steamers wrecked
Decreed by God to stand erect,
She shall not fall by man's neglect.

The reason marriage is a failure
with some people is because they
couldn't be successful at anything
else, either.—Philadelphia Inquirer.

Championship Game Ends In Tie Score On Weavers' Field

Cecil County Teams Struggle Through Twelve Innings Of Fast Ball Without Decision Saturday; Watkins Twirls Good Game

The second game of the Tri-County League "World's Series" between Elk Mills and Elkton bowed to oncoming darkness Saturday afternoon, after twelve innings of effort. The score read 2 all when the umpires decided that further play was dangerous.

It was a pitchers' battle all the way between Bob Watkins and McGovern of Elk Mills. Both twirlers were wasting few balls and held opposing batsmen helpless for most of the game.

Elk Mills jumped into the lead in the fifth frame only to see the score tied in the next inning. The process was repeated in the seventh and eighth; from then on, it was anybody's ball game.

Ralph Robinson distinguished himself at third base for Elkton, playing a bang-up fielding game and smacking out three telling blows. Bill

Bland, another Newarker, had a busy day at the hot corner for Elk Mills.

A big crowd witnessed the game. The failure to reach a decision makes it necessary to replay the game at Elk Mills next Saturday. If a third game is needed, Rising Sun has offered its field free of charge to the struggling contenders.

Saturday's score:

Elkton	R.	H.	O.	A.	E.
Dunbar, 2b	0	0	5	3	1

Newark High Beats Smyrna Footballers 14-0, Creating New Record In State Championship

What is believed to be the highest score ever run up in a scholastic football game in Delaware was registered Friday afternoon when Newark High christened their new field by tramping Smyrna underfoot, score, 14-0.

It was a pretty terrible football game, taken by and large. Nevertheless, the home rooters howled for more blood until the final whistle. At the close of the third quarter, 87 points had been registered by Captain Chalmers and his mates.

In the last period nearly everybody scored a touchdown except the water-boy. Linesmen came back and ran the ends, while the backs were content to trot along after the ball, now and then shoving a Smyrna player out of the way. Which wasn't hard to do.

While there was little or no chance to determine Newark's strength in the fiasco Friday, one man, Captain Chalmers, stood out. Playing his first full game in the backfield, calling signals, punting, passing, and leading interference, "Shorty" was a very busy young man. It was a severe blow to the fans if he was tackled before gaining at least fifty yards. His touchdowns came so fast, that he not only wore himself out, but taxed the resourcefulness of the score-keeper. It can be said, despite the poor opposition, that "Shorty" is emphatically on his game again this year.

Pretty Terrible

For the last half of the game, the down state boys played mechanically.

Their spirit was shattered. Heads down, tired legs dragging tired bodies, they chased their Newark opponents up and down the field. Occasionally, a sharp tackle was made. More often, they gave it up when the ball carrier had passed the scrimmage line. It was a very sad team, indeed, that came up from old Kent county.

Newark scored 17 touchdowns, Chalmers leading with seven. On several occasions Newark players ran through the entire Smyrna team for touchdowns on the kick-off. The playing of Whiteman and Riley also featured. The line-up:

Newark (14)	Smyrna (0)
Mayer left end	Ely
Riley left tackle	Clayville
Sylvester left guard	Staats
(Vansant)	
M. Armstrong center	Pusey
Cook right guard	Mumford
(Crooks)	
M. Manns right tackle	Hollett
D. Armstrong right end	E. Pinder
Morris quarterback	W. Pinder
Whiteman left halfback	Hurd
(Medill)	
Jaquette right halfback	Barwick
(T. Manns)	
Chalmers fullback	Bennett

Touchdowns—Chalmers, 7; Morris, 1; Jaquette, 2; D. Armstrong, 1; Riley, 2; Whiteman, 1; M. Armstrong, 1; Medill, 2; Myers, 1. Points from touchdowns—12. Referee—Carlton, Delaware. Umpire—Mannix, Delaware. Head linesman—Steele, Delaware. Time of quarters—12 minutes.

P. & S. HOSPITAL BEGINS CAMPAIGN

(Continued from Page 1.)

the teams and memorial committee will report again.

The conclusion of the campaign has already been designated as the victory dinner and will be held at 6.30 o'clock on the evening of Monday, October 12. At this meeting the allied towns' committee, which under the direction of Thomas Donaldson, is soliciting prospects in the territory surrounding Wilmington which is served by Wilmington hospitals, will make its final report.

It is also the objective of this campaign, aside from the raising of a \$500,000 building and endowment fund, to secure no less than 8,000 subscriptions in order to further prove the popularity of the hospital's appeal. The larger prospects, being interviewed by Mr. Townsend and his committee, are responding handsomely. It now remains for the popular subscribers to match in the aggregate the benefactions of those able and willing to give large amounts.

Serves Many Towns

An interesting report has just been made public by the hospital authorities.

During the period from 1920 to 1924, the P. and S. Hospital has served nearly every community in the county together with those in adjacent states.

Newark has sent 43 patients to this hospital during this time.

A few of the nearby towns served by the hospital follow:

Table with 2 columns: Town Name, 1924-25 Population, 1924-25 Services. Includes Bear Station, Christiana, Delaware City, Elsmere, Elkton, Hockessin, Landenberg, Marshallton, Newport, Stanton, Mt. Pleasant, Blackbird and Kirkwood.

P. T. A. NEWS

The Parent-Teacher Association will begin its year's work Tuesday evening, October 13.

This first coming together will be mainly for the purpose of getting acquainted. You who have children in the schools will want to know those who have undertaken the difficult and responsible job of teaching your children.

Likewise the teachers should be given an early opportunity to become acquainted with the parents of the boys and girls who have been placed in their care.

Last year we had more than a hundred members in our local organization. That was fine for last year. But there are other hundreds who are interested in the Public School. Why not make this interest function by joining the Parent-Teacher Association?

Parents and friends come to this party in the High School building, Tuesday, October 13, at 7.30 p. m. —President.

The Chafing Dish

By Neil Farmer

"I know the softness of man
The hardness of woman,
And the selfishness of both.
Knowing this I do not weep
But laugh at life
And all its contradictions;
For it does not bore me."

Ovid in his "Remedia Amoris" emphatically warns persons against making beginnings. "Resist beginnings," he says. Of course, he makes this statement in Latin and throws in a lot of other foreign-looking words from the same language explaining why one should resist beginnings.

Of some wealthy newspaper to invest; namely, the columnist, which comes in a different and, perhaps, more attractive package from all other brands, was not acquainted with that wildcat speculation, in which some courageous circulation manager sometimes prevails upon some easily-influenced business manager.

But Ovid, never having been exposed to American Civilization, Ovid's words were not for one of these.

The personal essayist, miscellanist and jester of the newspaper, who writes like a musician practices, only with a clock eating away his minutes instead of a metronome beating the tempo, must begin. If anyone doubts this, let him try to write a column without beginning. I know of nothing more difficult, except, of course, Bulterizing Philadelphia or swimming the English Channel. It would be just as foolish to attempt to do a column without beginning as it would for a delegation of Tennessee yokels to endeavor to convert H. L. Mencken to the worship of ectoplasm.

Consequently, Ovid was a jobbernowl—a driveling dullard—a fatuous old theorist—a plain damn—not that I've ever read Ovid—no, indeed—I made it a rule during the early part of my career as an undergraduate in college, or at college, never to crack a column written by persons of such gross ignorance that they wrote entirely in capital letters, as did the Latins. Not only that, but I lost my pony at about that time.

A shrill whistler heralded his approach up one of the by-streets to the public square with "The Star Spangled Banner," reproduced in a discordant minor key. "The rocket's red glare" proved to be a trifle higher than the whistler's range, and the tune was suspended "in mid-air." But only for an instant. For immediately changing to a lower and more congenial key, the unseen patriot continued his rendition of the American national anthem.

Then, without warning, the whistling ceased abruptly. I waited. It was not resumed. This was something more serious than a mere change of key. I looked up from the old dusty court records I was going through. With all of the visible portions of him completely soiled, a lad, wearing an ancient straw hat minus the brim, a gray flannel shirt which was kept across his scrawny chest by the co-operative persuasion of one button and a safety pin, and a pair of constitutional, or amended, short trousers, was standing on the green.

He was so much preoccupied in an intensive inspection of the earth directly below his bare feet that he had forgotten to keep "the stars and stripes" flapping on the wings of music. As one bent upon a delicate and momentous duty, the grimy urchin was conducting a careful and methodical exploration of the surrounding grass. For several minutes he searched without his efforts appearing to be rewarded. Once he halted suddenly and glanced down attentively at some hidden object; then he kicked it contemptuously, and again continued his hunt.

Across the square, opposite the court house, a benevolent-looking old gentleman paused to watch the youthful seeker. Suddenly the boy bent over, then straightened up swiftly, a smile of triumph replacing the frown of concentration which had but recently distorted his countenance. Seeing the old gentleman across the way, the boy darted toward him, exultantly displaying the cigar stump he had just found and yelling, "Hey, mister, gimme a light."

Although many persons use the first half of their lives in making the second half miserable, some of these are lucky and die at the end of the first half.

I have at last discovered how the Ku Klux Klan came to be revived. A group of sheet manufacturers—but perhaps I'd better not give it away.

A chameleon would make the perfect political candidate, wife, husband, or newspaper editor. It can change color at will without ever being accused of being inconsistent.

Rally Day Attracts Many To Local Church; Many Youngsters Promoted To Higher Classes

The Rally Day exercises of the First Presbyterian Church of Newark were held in the Sunday School room October 4. The room was filled with members of the school, their parents and visitors, over 200 altogether.

At ten o'clock the orchestra played a march and the Beginners' Department and Primary Department marched in and took their places in the front of the room. The following program, arranged by Prof. R. W. Heim, was rendered:

Selection by Orchestra; Hymn, "We Rally Today," entire school; Responsive reading, "True Wisdom," lead by Superintendent; Prayer, Mr. Paul Lovett.

Beginners' Department Exercises—Song by all the Beginners; Recitation, 23rd Psalm, Junior Hancock; Recitation, Names of First Twenty Books of the Bible, by Billy Richardson.

Primary Department Exercises—Song by the Department; Recitation, 15th Psalm, Doris Strahorn; A group of questions were then asked by Miss Blanche Malcolm, which were answered by those members of the Department who were promoted to the Junior Department.

Selection, "Just for Today," by the male quartette of the church, Mr. Cobb, Mr. Myers, Mr. Barnes, Mr. Kennedy.

Parents of certificates by the Superintendent; Beginners to Primary—Dorothy Holton, Maggie Campbell, Gwendolyn

McCormick, Jean Barnes, Dorothy Rose, Ethel Stephan, Betty Johnston, Paul Cheney, John Edgar Dawson, William Richardson, Guy E. Hancock, Jr., Raymond Baker, Edward Foster, Samuel Heiser, Paul D. Lovett, Jr.

Primary to Junior: Ernest Campbell, Charles Gibb, Carolyn Chalmers, Carolyn Johnston, Doris Strahorn, Doris Smith, Dorothy Townsend, Margaret Grier.

Announcement was then made that the following boys were promoted from Mr. T. A. Baker's Junior Boys to Mr. Tomhave's Intermediate class: George Dawson, George Dutton, Earl Smith, Robert Ford, Marcus Malcolm, Malcolm Medill.

A new class of Senior girls was formed with Mrs. Whitney as teacher, by the promotion from the Intermediate department of Ruth Foster, Helen Gregg, Ruth Herdman, Josephine Hossinger, Mary Johnston, Lucy Reynolds, Marion Singler.

The following boys were promoted from Mr. Tomhave's Intermediate class to Mr. Lovett's Senior boys: Harry Williamson, Jack Cann, Allan Smith.

Additions to the Cradle Roll: Melissa Baker, Deborah Marie Johnston, Sophie Philena McVey, H. DuVal Cleaves.

Promotions from Cradle Roll to Beginners' Department: Patricia Ann Wilson, Evelyn Hye Smith, Edward Clifton Hurlock, Jr., Lewis Heister Knotts, Walter C. Anderson, Mary August Medill, Edith Miriam Lewis. Address by the Pastor, Rev. H. E. Hallman.

DUCKS PLENTIFUL AS SEASON APPROACHES

Reports From 'Shore Points and the Susquehanna Flats Presage Plenty of Game.

The forecast for duck hunting this year is that there will be more good ducks, canvasbacks and redheads, than in any other season for three decades. The Susquehanna flats have an abundance of wild celery, upon which these ducks feed, and there is generally a feeling among hunters that there is going to be gunning.

Already common ducks, consisting of blackheads, black ducks, mallards, etc., are beginning to arrive from the North. The season does not open until November 1 upon the flats, and the ducks will have a whole month to feed without interruption.

All along the Eastern Shore this same story is told. For some reason many ducks that ordinarily go to Canada to rear their young, have remained over this year, and it is said that the Dorchester county marshes are teeming with mother ducks and their young.

The work of getting boats and equipment in order already has begun. This year there will be more of the dead rise boats than ever before. The day of large yachts apparently has gone. Boats of 30 or 40 feet in length, with cabins heated and lighted with electricity, have taken their place. These boats draw but 14 to 18 inches of water and can run right in on the flats, thus saving the gunners from the necessity of four or five mile trips in small open boats before daybreak.

DELAWARE REVENUES EXCEED EXPENDITURES

Interesting Figures Relating to Finances of State Made Public at Washington.

The cost of maintenance and operation of the state government of Delaware for the fiscal year ended June 30, 1924, amounted to \$3,763,890, or \$16.80 per capita, according to the Bureau of Census, Department of Commerce. This includes \$1,204,281 apportioned for education.

Interest on the state debt amounted to \$310,895 and outlays for permanent improvements totaled \$3,801,628. The outlays were therefore chiefly for expenses of the general departments. Interest and outlays were \$7,876,413, according to the department's figure. The totals include all payments for the year, whether made from current revenues or from the proceeds of bond issues.

Delaware expended \$3,771,940 for highways, \$170,484 for maintenance and \$3,601,456 for construction, the department's report shows.

The per capita indebtedness of the state for the last fiscal year ending June 30, 1924, was \$28.40. The next indebtedness, including sinking-fund assets, on June 30 of last year was \$6,607,098; in 1923 the per capita debt was approximately the same figure, being \$28.79, as compared with \$4.02 in 1917.

The department stated the total revenue for the State of Delaware for 1924 was \$8,023,625, or \$34.50 per capita. This was \$3,948,840 more than the total payments for the year, exclusive of the payments for permanent improvements, and \$147,212 more than the total payments, including those for permanent improvements. Property and special taxes represented 47.2 per cent of the total revenue for 1924, 49 per cent for 1923 and 28.1 per cent for 1917.

The increase in the amount of property and special taxes, collected was 596.9 per cent from 1917 to 1923, and 18.5 per cent from 1923 to 1924. The per capita property and special taxes were \$16.29 in 1924 and \$13.87 in 1923 and \$2.11 in 1917.

Earnings of the general departments or compensation for services rendered by the state officials, represented 4 per cent of the total revenues for the year 1924.

NEWARK OPERA HOUSE

A new exotic romance, recently produced by Mark Byron, Inc., will be presented for performance at the Opera House Friday night, October 16th. This play is in three acts, with music, and was written by Lincoln Osborn, whose "Uptown West" proved to be one of the outstanding plays two seasons ago when produced by Earl Carroll on Broadway. Mr. Osborn spent several years in Hawaii and thoroughly understands the simplicity of the natives.

Dover's New Golf Club

The charming club house of the Mapledale Country Club, Dover's new golf club, will be formally opened on November 6. A buffet supper will be served to the members and their guests by a committee of ladies of the club of which committee Mrs. John P. LeFevre is chairman.

COUNTY AGENT'S REPORT FOR SEPTEMBER

Potato Demonstrations

The digging of the potato demonstration plots has been completed. The results of the demonstrations for the year 1925 follow:

Farm of H. L. Dilworth, Centerville—Certified Green Mountains, New York Seed, 125 bu. per acre; Non-certified Green Mountains, 109 bu. per acre.

Farm of John F. Brackin and Son, Marshallton—Certified Green Mountains, New York seed, 141 bu. per acre; Non-certified Green Mountains, 109 bu. per acre.

Farm of J. Howard Mitchell and Son, Hockessin—Certified Green Mountains, New York seed, 145 bu. per acre; Non-certified Green Mountains, 115 bu. per acre.

Farm of P. T. Pierson and Son, Hockessin—Certified Green Mountains, New York seed, 114 bu. per acre; Non-certified Green Mountains, 123 bu. per acre.

Farm of J. Arnold Naudain and Son, Marshallton—Certified Green Mountains, New York seed, 135 bu. per acre; Certified Green Mountains,

Maine seed, 119 bu. per acre; Non-certified Green Mountains (Plot on somewhat higher ground), 93 bu. per acre.

Farm of Norman Cox, Hockessin—Certified Green Mountains, New York seed, 73.4 bu. per acre; Certified Green Mountains, Maine seed, 74.2 bu. per acre.

The certified seed consistently produced larger yields than did the non-certified seed (second generation seed) with the exception of the demonstration on the farm of P. T. Pierson and Son. It will be noted that on this demonstration the non-certified seed produced nine bushels per acre more than the certified seed. This is only the second instance during seven years of demonstrations, comprising approximately 35 separate demonstrations, that the second generation seed produced a greater yield than did the certified seed. The results of the demonstration on Mr. Pierson's farm indicates that conclusions cannot be drawn from one demonstration. However, the results of a large number of demonstrations

covering a period of years is information on which farmers are justified in basing a farm practice. The results of 35 demonstrations covering a period of seven years indicate that on the average the certified seed produced from 20 to 50 bushels greater yields per acre than did the non-certified, or second generation seed. It is conservative to state that it would be difficult for a farmer in northern New Castle county to invest money to better advantage than by buying certified seed annually.

It is interesting to note that the demonstration on the farm of Norman Cox showed that the certified Green Mountain seed from the State of Maine produced eight-tenths of a bushel per acre more than did the certified Green Mountains from New York State. However, on the farm of J. Arnold Naudain and Son the certified Green Mountains from New York State produced 16 bushels more per acre than did the certified Green Mountains from the State of Maine. The County Agent, upon request,

(Continued on Page 11.)

Washington College Nears 143rd Birthday

Washington College, at Chestertown, Md., will celebrate its first Founders' Day on Thursday, October 22. Although the college will be 143 years old it will be the first celebration of its anniversary.

An event of the day will be the unveiling of a tablet and stone presented by the Old Kent Chapter, D. A. R., commemorating the receiving of the honorary degree of doctor of laws by George Washington at the college in 1789. It is the only college to bear the name of Washington by his own consent.

Governor Ritchie of Maryland will be among those present. Dr. Alfred Pearce Dennis, vice-chairman of the United States Tariff Commission, will deliver the main address.

FALL SPORTS START IN CECIL COUNTY

Soccer and Volley Ball Schedules For Season Announced After General Meeting.

At a recent conference of the principles of the High Schools held in the office of the Board of Education in Elkton, a soccer ball schedule for the Cecil County High School boys and a volley ball schedule of the Cecil County High School girls was arranged. The rules and regulations governing the games of the Public Athletic League were adopted, as was also the rules and regulations in regard to the eligibility of players, etc., as adopted for the base ball league last year.

All games are to be played on Friday afternoons. Postponed games are to be played on the following Wednesday.

Games are to start not earlier than 3.30. Visiting teams are not allowed to leave their schools until 2.30.

The schedule for the boys and girls follow:

Southern Section

- October 9—Cecilton at Chesapeake City; Elkton at Kenmore.
- October 16—Chesapeake City at Kenmore; Elkton at Cecilton.
- October 23—Kenmore at Chesapeake City; Cecilton at Elkton.
- October 30—Elkton at Chesapeake City; Cecilton at Kenmore.
- November 6—Chesapeake City at Cecilton; Kenmore at Elkton.

Northern Section

- October 9—Perryville at Calvert North East at Rising Sun.
- October 16—Perryville at North East; Calvert at Rising Sun.
- October 23—Calvert at Perryville; Rising Sun at North East.
- October 30—Perryville at Rising Sun; North East at Calvert.
- November 6—North East at Perryville; Rising Sun at Calvert.
- November 13—Championship game on neutral ground between Southern and Northern sections of county.

HIGH PRICES RULE AT CECIL COUNTY SALE

Fletcher Williams' Guernsey Herd Averaged \$100 Each Last Week.

Mr. F. P. Williams, Cherry Hill, last week had one of the best cattle sales ever held in that section. Twenty-six head of cattle averaged \$100, of this number 13 were cows, 12 heifers and one bull. Many of the cattle were purchased by Cecil county people. Among those buying this high grade Guernsey stock were: Mrs. Cassat, of Berwyn, Pa., paying \$185 for a nine-year old cow, and Francis H. Forsythe, of Philadelphia, purchasing a six year old cow for \$180. Many of the cattle stayed in Cecil county. Holly Hall is now stabling a two year old heifer for which \$200 was paid. Six months old calves averaged \$60 apiece. Mr. W. J. Brown, of Chestertown, bought eight head for his stables.

Autos In Collision

Automobiles owned by Lee Lewis and Harrison Gray, both of this town, collided at the intersection of Main and Academy streets Friday of last week. Both machines were badly damaged in the crash but neither of the men were hurt. The matter of damages is being adjusted between Messrs Gray and Lewis, it is understood.

Who's Who At Delaware —and Why

"From Fiddle to Physics"

Interesting Story of Dr. Paine, Head of the Department of Physics at the University

In one of the issues of the *University of Delaware Review* there appeared, last May, a three or four hundred word article concerning some scientific papers which had been written by George Porter Paine, Ph. D. The collegiate newspaper write-up was a dry conventional account of the fact that these papers were to be published with a brief sketch of the contents of the manuscripts included. In reading the newspaper article, one would never get even a hint of the real, living, gripping story behind those printed words.

Here is the newspaper account:

"The *Annals of the Astronomical Observatory of Harvard College* will shortly publish five scientific papers by Dr. Paine. These papers contain some of the results of his researches under the auspices of the National Research Council, at Harvard University, from 1919 to 1923. Conducted originally at the Wind Tunnell of the Massachusetts Institute of Technology, and continued at the Jefferson Physical Laboratory of Harvard College, these researches consist of a mathematical and experimental investigation of the laws of airflow in pipes, channels and in the neighborhood of solid obstacles.

"Air, drifting slowly along a channel, moves in a smooth, regular manner known as streamline motion. When, however, velocity of flow is sufficiently increased, the current breaks up into eddies and swirls. Air flow in this eddying state is said to be turbulent. It is, for example, turbulent air motion along the upper surface of the wing of an airplane that creates the low pressure making possible the flight of a heavier-than-air machine. Again, it is turbulent motion in the atmosphere that controls certain weather conditions. In the case of the airplane, air turbulence is usefully applied. On the contrary, in certain manufacturing processes, necessitating transmission of air or chemical gases through long channels, turbulence is the cause of great practical difficulty. Thus in Aeronautics, Meteorology and in certain branches of Engineering, it is of importance to add to our present knowledge of this most interesting type of fluid motion.

"The first of Dr. Paine's papers accordingly contains an account of laws, discovered by him, of the flow of dry, turbulent air through a channel. This is followed by a similar investigation of the flow of dry air in a channel past a fixed obstacle. In the third paper, these results are extended to the flow of moist air, and in the fourth and fifth papers, developments of the theory are discussed which lead to a method of measuring the weight of water vapor in the air, which, in convenience and precision, is in advance of methods heretofore in use.

"The entire investigation bears closely upon important problems in atmospheric circulation. As such, it has aroused the interest of meteorologists and astronomers, and has thus led to the publication of these papers in *Harvard Annals*.

"It is understood that permission has been obtained from the Harvard authorities to bind reprints of the entire series with our *Delaware Notes*."

From that one would never gather that Dr. Paine never went to high school, that he taught himself to play the violin so well that he was awarded the Ditson Scholarship to the New England Conservatory of Music, that he practiced music eight hours each day and then wrote musical criticisms for *The Boston Advertiser* of concerts he had heard that evening, that he later decided to go to college and took a year in which to prepare himself for the entrance examinations required at Harvard. No, the newspaper "write-up" leaves a great deal untold. The reporter missed an excellent opportunity.

George Porter Paine was born on Dutch Island, a little isle in the Narragansett Bay, Rhode Island, in 1876. His father was a civil engineer, who had charge, at that time, of the construction work on the fortifications being built on the island by the Federal Government. When he was fourteen years of age, he went to work in a position in the dry goods commission house of O. H. Sampson and Company, in Boston.

During his spare time in Boston, he labored with his violin and once in a while attended a concert. Also he read a great deal during this period. Finally, after hearing him play for a group of friends one evening, certain members of the Ditson family became interested in young Paine, and a short time afterward he was offered the Ditson Scholarship in the New England Conservatory of Music. Greatly delighted at this unexpected opportunity, Paine immediately gave up his position with O. H. Sampson and Company and accepted the scholarship. He held the scholarship for three years.

At the time he started out to become a professional violinist, he was seventeen years old. Then followed three strenuous years of practice and writing for the *Boston Advertiser*. Practicing on the violin for eight hours each day, reading at every opportunity, attending musicales during the evenings, and writing his daily criticisms for the newspaper afterward, staying up almost every night until three o'clock, Paine's health broke down at the end of the third year and he was forced to give up his dream of becoming a great musician.

At the time of his work on the *Advertiser*, Louis Elson was the regular music critic, but Elson had so many lectures to deliver and at such a number of different places, that he had secured Paine to do most of the regular newspaper work for him. Dr. Paine says that he clearly recalls writing his criticisms on glaring yellow paper in violent purple ink.

NEWARK, PAST AND PRESENT

A Series Of Sketches, Written In 1882 By James L. Vallandigham, Jr., Of The Old Delaware Ledger, In Collaboration With Egbert Handy, And Released For Publication In Serial Form By The Newark Post.

(Continued from Last Installment.)

INDUSTRIAL INSTITUTIONS THE DEAN WOOLEN FACTORY

Mr. Joseph Dean was the founder of the woolen manufacturing industry in this neighborhood. In 1845 he bought the grist mill, then located where the factory now stands, from Mr. Samuel Thomas, of Bucks county, Pa., and converted it into a woolen mill. He also built a dye house, warehouse and several other houses for the workmen employed. As his business steadily prospered, in 1853 he built a four story mill. In 1847 the business, which had been hitherto carried on by Mr. Joseph Dean alone, was much increased, and he admitted his son William Dean, Esq., who is so well known throughout the state, into partnership with him. The firm was known as Joseph Dean & Son, and under this name it continued until within a recent period. After the death of Mr. Joseph Dean, a new firm was established by William Dean and John Pilling, still under the firm name of Jos. Dean & Son. This firm has carried on business with wonderful success, having run the mill night and day, without intermission (except for a short time at one period), up to the present date.

The Kiamensi Woolen Company has also been under the entire management of those two gentlemen for many years. During the war large contracts were allotted to the firm which were filled with scrupulous care and fidelity. The establishment of the mill of Jos. Dean & Son, at Newark, has been of great value to the town and its vicinity. It has furnished steady employment and prompt pay to a large number, and livelihood, comfort, and in some instances actual wealth, to the employees. During the time the mill has been in operation, wages to the amount of a million and a half of dollars have been paid to the employees.

In the latter part of 1881, the firm came to the conclusion that they had acquired more capital than could be profitably employed upon the present basis; they were obliged either to take some out of the business, or increase their working facilities and capacity. They chose to do the latter; accordingly a joint stock company has been organized. The plan upon which it was formed was to raise a capital of \$200,000, at \$50 per share of stock, then to improve the present mill by doubling its capacity, putting up new buildings, and introducing the latest and most improved machinery. The plan seemed to meet the approbation of the business men of the community. A meeting was held at the house of Mr. Pilling (our present representative in the legislature), in February, 1882, and subscriptions for stock taken. At the first meeting nearly all the capital stock was subscribed for, and within two weeks the whole amount had been taken.

With characteristic energy Mr. Dean and Mr. Pilling went to work immediately to make the necessary changes and additions required under the new organization. The present main mill of two stories is to be raised another story, and an additional mill is to be built of 50 by 226 feet in dimensions; also, large additions are being made; among others, a new engine and boiler house, and additions to the dye house and other out buildings. The dimension of the present two story mill are 60 by 160 feet. When all the contemplated changes are finished, there will be required almost double the present number of employes.

It is expected that the changes to be made will so reduce the cost of the manufacture of the goods, that a saving equal to the interest on \$100,000 of capital will be secured. The water power, too, can be more effectually used, so that none will be wasted, thereby saving in cost from \$1000 to \$2000 per annum. As we write the work is going on briskly, and before the end of the year it will be completed and the increased facilities for the business will no doubt prove lucrative to all concerned.

Mr. Joseph Dean was in many respects a very remarkable man; of much more than ordinary ability, and of untiring physical and intellectual energy. A brief sketch of his life may prove interesting and instructive. He was born in Sandbach, Cheshire, England, in 1783. Very early he displayed remarkable talents for mathematics, and whilst still very young, almost unassisted, he had worked through every arithmetic he could lay his hands on. He had but few advantages from the schools, relying for the most part upon his own unaided exertions, natural

ability and determined perseverance to acquire the knowledge for which he thirsted. In 1810 or '11 he came to this country, landing in New York without a dollar in his pocket. He immediately sought work, and for a month was engaged in the humble task of delivering bread with a push cart, for a baker, attending to the fires around the bakery, and other odd jobs. Accustomed to country life, this city occupation soon became irksome, and he went over into Long Island and engaged in harvesting. The farmer for whom he worked was greatly pleased with the intelligence and dexterity of the sturdy young Englishman, and after harvest was over, he secured him a school in the neighborhood. He taught school for about a year, and liked the occupation very well, but the system of boarding around from house to house, which was in vogue, became so disagreeable to him, that he determined to pursue some other employment. He then started on an extended pedestrian tour; he walked across New Jersey to Philadelphia, from there to Lancaster, then to York, and from York to Baltimore. From Baltimore he tramped it back to Philadelphia, passing through Elkton, Newark, Christiana, and other places, which afterwards became so familiar with his name and labors. Arriving in Philadelphia again, nearly out of money, he was fortunate enough to meet a man who had come over in the same ship with him. This friend insisted upon his spending the night with him, and the next morning took him to the woolen mill where he worked and persuaded Mr. Dean to accept a position there, and commenced by teaching him to spin. Not very long afterwards Mr. D.'s friend was offered a position in one of the numerous manufacturing establishments then starting up, and Mr. Dean took the position he vacated.

Meanwhile the war with England—the war of 1812—had commenced, and he was put to considerable inconvenience on account of being an alien citizen, born in the country with which the war was raging. He was forced to go to New York and there declare his intention to become a citizen; and further, he was required either to move inland forty miles from tide water navigation, or report monthly his whereabouts to the United States Marshall of the district in which he should be. He chose to do the latter, and suffered this inconvenience during the whole struggle; but soon after its close he was naturalized.

During the war, great difficulties were experienced by our manufacturers, whose business was in its infancy, and who were greatly in need of skilled labor. At one time there was not a dye house in the country. Mr. Dean had always taken a deep interest in chemistry, he had studied it very earnestly for years, and conducted experiments with such appliances as he could command. He took the position of dyer in the mill, invented his own system of dyeing, which was eminently satisfactory to his employer as well as himself. He erected a dye house and carried it on with great success. But he was not satisfied with understanding only one or two branches of the process of the manufactory of woolen goods; he learned thoroughly and systematically every process from beginning to end required in the manufacture of cloth and woolen goods generally. Whilst at this mill, at which he remained until 1816, he invented the first self-acting mule that ever spun a thread of yarn by power. He built the machine himself, from the ground up, and it was used for many years by mills all over the country, but he never secured a patent for it.

(To Be Continued Next Week.)

Two Major Advantages Studebaker Alone Offers

1-One-Profit Value 2-Unit-Built Construction

THERE are (as you probably know) only two manufacturers who actually build their cars complete — make all their own bodies, engines, clutches, steering gears, differentials, springs, gear sets, axles, gray iron castings and drop forgings.

One of these is Ford—in the low priced field. The other is Studebaker in the fine car field.

Because we eliminate the extra profits and overhead that many other manufacturers have to pay to outside parts and body makers—we are able to use finer materials and workmanship—yet charge no more than competing cars.

But there is another side to One-Profit manufacture—a feature that no careful buyer can afford to overlook.

Under this One-Profit policy the entire car is designed, engineered and manufactured as a complete, coordinate harmonious unit in Studebaker plants. Being Unit-Built it functions as a unit. And this adds years to its life—gives you scores of thousands of miles of excess transportation—greater riding comfort—minimum repair costs—and, finally, higher resale value.

Examine the Standard Six Coach closely—make detailed comparisons with other cars—and you will understand the full meaning of One-Profit value.

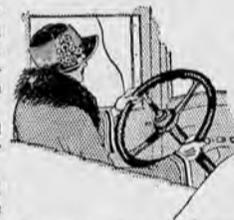

A Coach of quality

It is called a coach only because it is the lowest priced closed car ever sold by Studebaker. But it is a quality car through and through.

Do not buy this coach with the expectation that you'll have to trade it in at the end of a year or so. It's not a one-year car.

Instead, it has been honestly built to give you scores of thousands of miles of dependable service.

Notice the durable wool upholstery. See the heavy ornamental hardware; the plate glass windows and windshield; the fine trim to hide all tacks; the clock and gasoline gauge on dash; automatic windshield cleaner; stop light; locks on ignition, steering gear, door and spare-tire carrier—all operated by a single key.

The steering mechanism is especially designed for easy driving with the big balloon tires.

These are all features that you can easily see. But down underneath that glistening coat of metallic enamel you'll find the same quality of materials and workmanship that are out in the open.

The sturdy frame for the body is built from the fine northern ash and hard maple. Slam the door and the sound says quality. Underneath the upholstery you'll find two layers of washed, quilted cotton, one layer of genuine curled hair and extra long springs closely held together by small coil springs. This is the identical cushion and seat construction used in the highest priced cars.

Long resilient springs made of special chrome Vanadium steel give greater buoyancy and protection from road shocks.

The crankshaft is completely machined on all surfaces to eliminate vibration. And the motor is the most powerful in any car of this size and weight, according to the rating of the National Automobile Chamber of Commerce. It is a motor built for smooth, trouble-free service at 5 to 55 miles an hour—not for excessive speed or spectacular stunts.

The body is smart in appearance — yet provides ample room to seat five passengers in real comfort. Ample room to enter or leave without disturbing occupant of folding seat.

Make comparisons before you buy

These are advantages made possible by One-Profit manufacture. Check them off point by point—in comparison with other coaches.

Only after you have seen this One-Profit Studebaker with its Unit-Built construction, will you realize why it offers a value that cannot be obtained in any other car. It is the automobile equivalent of Pullman transportation.

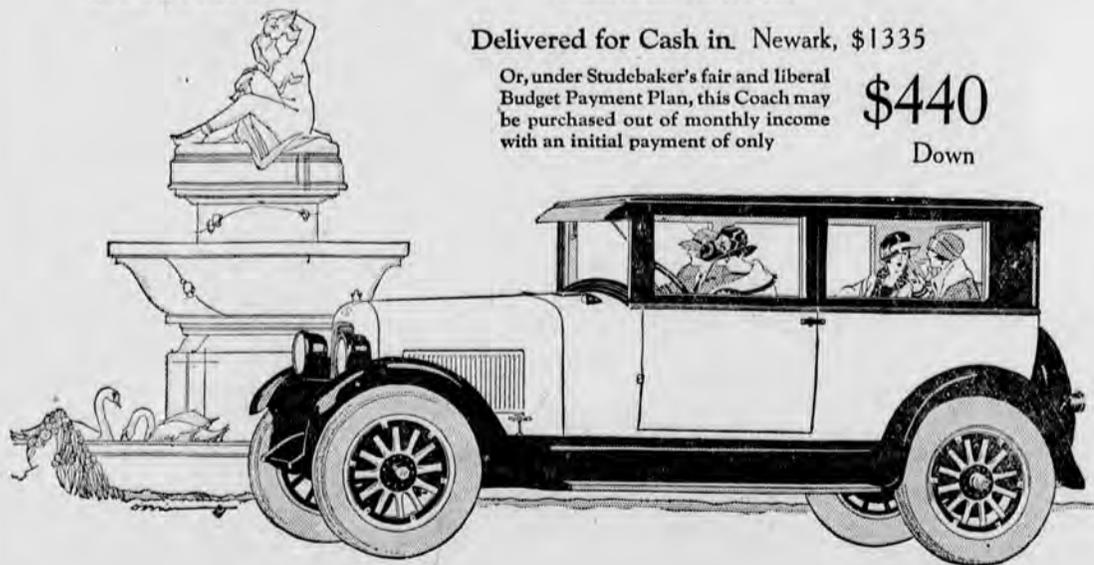

The Studebaker policy of "no yearly models" is a further protection to owners. Under this policy Studebaker cars are always up to date—we add improvements from time to time and do not save them up for spectacular annual announcements which make cars artificially obsolete.

Come in—let us demonstrate the Standard Six Coach without obligation on your part.

Delivered for Cash in Newark, \$1335

Or, under Studebaker's fair and liberal Budget Payment Plan, this Coach may be purchased out of monthly income with an initial payment of only

\$440

POULTRYMEN ATTEND NEW JERSEY MEETING

University Experts Accompany Group To Atlantic City This Week.

This week will witness an important meeting of poultrymen from all sections of New Jersey at Atlantic City. The poultry raisers will give one or two days to an inspection of certain large flocks and then will assemble at the shore on Friday for their convention.

Delaware At Poultry Meeting
Attending this convention will go Dr. Hare, Ralph S. Wilson, secretary of the State Board of Agriculture of Delaware; Dr. H. S. Palmer, of the University of Delaware, and many poultry growers from each of the three counties in Delaware. One of the important papers at the convention will be one relating to accredited flocks, the new method of aiding poultrymen which Delaware, through Dr. Hare, is putting into effect this year. It is anticipated that the New Jersey poultry raisers will ask from the Delaware State Board of Agriculture and its staff how the plan for examining all flocks for white diarrhea is proceeding. New Jersey has not inaugurated this forward step in poultry raising, but the growers of chickens there are deeply interested in any idea that will make their chickens healthier and in more demand and which will give eggs from accredited flocks, a higher price and stronger demand in the market.

Because of his experience in other states in poultry work, Dr. Hare's discussion of the plan will be most valuable.

County Agent's Report For September

(Continued from Page 9.)

weighed a plot and made a determination of the yield of potatoes on the New Castle County Work House Farm. The yield per acre was 192 bushels. However, the plot weighed was seeded with non-certified seed. The portion of the field seeded with certified seed had previously been dug. It is conservative to estimate that the certified seed produced a yield that averaged well above 200 bushels per acre. This field of potatoes was cultivated consistently twice a week and after they were laid by, the weeds were pulled regularly. It is, probably, not practical for the average farmer to put this amount of work in tilling potatoes. However, it is interesting to note the response potatoes make to tillage.

Soy Bean Demonstrations

The soy bean demonstration plots

have been cut and in a few days will be ready to thresh. The yields this year will not be large, due largely to the dry season. However, reports from Sussex county and other soy bean growing sections indicate that the yields will be consistently low in the East. This information should indicate that the price would be such as to offset the low yields.

Poultry Demonstrations

Two poultry demonstrations were held on the farms of John Nivin of Newark and Eugene Minner of Middletown. The purpose of these meetings was to select birds for breeding purposes. The demonstrations were conducted by Mr. H. S. Palmer, Extension Poultryman of the University.

Farm Business Bulletin

The farm business bulletin is practically complete and will go to press within a few days. Tentative plans are made for a farm business tour in the Middletown Area the latter part of October. The systems of farm organization and management that will be discussed during the tour will be based upon the farm business survey taken in the Middletown Area.

Wheat Smut Control

Demonstrations were held at Mt. Pleasant and Middletown showing a simple but effective method of controlling smut in wheat. The demonstrations were arranged by the County Agent and were conducted by Dr. T. F. Manns and Dr. J. F. Adams. The treatment of seed wheat with formaldehyde for the control of smut has been recommended for years. Due to the difficulty in using this method, it has been adopted only in a few cases. At these demonstrations the use of the copper-carbonate method was shown. The copper-carbonate is inexpensive and the method of application is simple. Apply two ounces of copper-carbonate per bushel of seed wheat and stir well with a shovel. Although the copper-carbonate method has not been used on practical farms in this state, yet its use in many states in the Middle West is so prevalent and effective that the Extension Service feels warranted in advising it.

COMMON SENSE NOTES ON FIRE PREVENTION

1. Avoid throwing lighted cigars, cigarettes and matches into wastepaper baskets or other places containing inflammable materials.
2. Avoid the filling of lighted lamps.
3. Clean your chimneys by sweeping or otherwise, now that it is time to make up the winter fires.
4. Provide a sufficient number of metal cans near stoves and furnaces to receive hot ashes.
5. Keep a good Fire Extinguisher in a convenient place in your home.

He was now an honorary member of the faculty at Harvard, with all of the privileges to which such a position entitled him.

In 1920, he returned to Harvard. Here he remained as Research Physicist until 1923, when he came to the University of Delaware. Here he has completed his papers for the National Research Council. He had received his Doctor's degree from Wisconsin in 1918. He now considered himself ready to start teaching physics in earnest. This is Dr. Paine's third year at Delaware. During his time here he has built up a physics department from what was formerly merely an excuse for such a department. He has worked in his offices in the Physics Building from eight in the morning until nine and ten at night. Be-

cause of his interest in his students and his enthusiasm in their progress, he has had to sacrifice his own scientific work until an assistant is provided for him. He did have another investigation under way to verify some mathematical theory, but he had to drop it because he did not care to neglect his students, either collectively or individually.

On the top of a bookcase, which bulges with books, in Dr. Paine's little study in his home, there is an old violin, with broken strings and dusty face. Below it are rows of books, books on physics and mathematics, whose covers appear bright and shiny from constant handling. With its broken strings in wild disarray, the old violin lies untouched on the bookcase.

MEGARY

Here's An Exceptional Offering of Bridge and Floor Lamps

They're a very special purchase and are offered at unusually low prices for such good-looking, attractive lamps.

And because they are a special lot we can't promise any more at these prices when these are gone.

There is a bridge lamp that has a pull socket and an adjustable arm. The standards are gracefully turned and finished in black and gold and polychrome. The bases are of heavy cast metal. The shades are of georgette with deep fringe and in a number of colors. They are all triple lined and mostly with rose underlinings.

THIS LAMP AND SHADE IS A VERY GOOD VALUE AT \$15.00.

BUT THEY'RE SPECIALLY PRICED FOR THIS SALE—\$8.25 COMPLETE.

To match this bridge lamp there is a specially priced Junior. The bases are also in black and gold and polychrome. They have a two-light fixture, cast brass top ornament and pull tassels. The shades are deep fringed and of triple-lined georgette in the newest of colors and shapes.

THIS LAMP WOULD USUALLY SELL FOR \$21.00.

THEY'RE SPECIALLY PRICED FOR THIS SALE, \$11.75 COMPLETE!

Among the finest of bridge and floor lamps are some new metal base ones. The bases are enameled and colored in dull red or blue or green. The shades are made to match exactly in coloring.

They're priced in the Bridge Lamps, \$29.00 complete.

In the Junior Lamps, \$36.00 complete.

New table lamps have pottery bases, two light fixtures. The bases are finished in the English Crackle effect, the shades are hand-painted and beaded.

\$16.00 and \$20.00 complete.

And there are here, in this lamp sale, some very low-priced boudoir lamps.

The bases are of pottery in blue and black and gold. The shades are hand painted and beaded.

Specially priced at \$5.00 complete.

There are also some of the new doll lamps. The bases are of china with painted figures in blue, purple and rose. The shades are of double-lined silk or hand painted and beaded.

Complete, \$4.00, \$7.00, \$9.00 and \$20.00.

You can add cheerfulness to any room with well-chosen lamps and the winter nights are coming when you'll enjoy the convenience and the cozyness of a well-lighted living-room.

Why not select that wanted lamp now at these low prices?

Who's Who At Delaware

(Continued from Page 9.)

After giving up his career as a musician, Paine took a position at a piano warehouse in Boston, but discovering that he was spending all of his money on concerts, he looked about for a position with greater remunerative considerations. For a time he was employed by the Steiwert people.

Then he decided that he would go to Harvard. Taking a year at home, he successfully prepared himself for the entrance examinations, including those in languages and mathematics, with no outside assistance. He received all A and B grades in his entrance tests, and because of his splendid showing was permitted to take up several advanced courses.

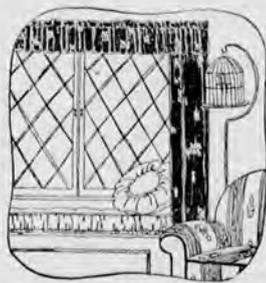

Before entering college, he had had no physics. The only courses in physics offered were all advanced ones, and physics was essential to his program. Paine was up against a difficult proposition right at the start. He enrolled for one of the advanced courses in physics and started to instruct himself in the rudiments of this science outside of class. What happened in 1905 tells the whole story: he was graduated from Harvard with honors in mathematics.

At this point in his career, Paine was undecided whether he wanted to teach philosophy or physics; but he did know that he wanted to teach something. However, he went ahead and secured his Master's degree from Harvard. He then received and accepted an offer to go to Ripon College, in Wisconsin, as head of the mathematics department. After accepting this position, Paine held a conference with himself and during the meeting a motion was made that he learn mathematics as nearly perfectly as possible before he attempt to teach physics. The motion was carried unanimously.

He went to Ripon in 1907 and stayed there two years. During all of this time he continued his private self instruction in mathematics. In 1909, he accepted a position on the staff of the University of Minnesota, where he remained until 1912. Next he took up work in the mathematics department of Middlebury College. After staying here a couple of years, he went back to Harvard for advice, and was advised to go to the University of Wisconsin. Consequently, in 1914, Paine became associated with the State University of Wisconsin as a research instructor.

During his stay at Wisconsin, he taught and worked in his spare time for a Doctor's degree. His thesis on "Dynamic Meteorology," which was published by the Weather Bureau, attracted a great deal of attention and eventually resulted in his leaving Wisconsin, when it led to an appointment as Research Physicist of the National Research Council in 1919.

The Council, which is supported by funds from the Rockefeller Foundation, arranged to have Paine go to Massachusetts Institute of Technology, where he was to carry on some important experimental studies for a year. His recent papers contain some of the results of his studies conducted in the Wind Tunnel at Massachusetts "Tech."

What Will we Choose for the Draperies?

Quaker Lace nets are always popular, both in designs and prices—conventional designs and small block effects in ivory and ecru—very much in demand for fall window and door draperies, 70c to \$1.25 the yard.

Made curtains ready to hang come in a wide range of prices.

There are the dainty little ruffled curtains in yellow, and pink and blue blocks with tie backs—very attractive and priced, \$1.50, \$2.50, \$3.50 and \$3.75 the pair.

Quaker Lace Curtains in cream and ecru, with reinforced edge, are \$2.75, \$5.00, \$5.75, \$6.00 and \$8.50 the pair.

A new and unusually handsome Quaker Lace product is the Radiant Lace and Panels. In a rich gold coloring, soft and shining, it is by far the prettiest of all draperies this season. The lace by the yard is \$1.50. The made panels for door and window are \$5.50 and \$6.75.

Striped silk draperies are here in many colors—they're priced, \$1.25, \$1.75, \$2.25 and \$3.25 the yard.

And we have almost every kind of fixtures—Kirsch rods and brackets to fit almost any window.

MEGARY SIXTH AND TATNALL

Serve as you have been served

¶ The needs of the Physicians and Surgeons Hospital command the attention of the public. The present plant in which the hospital is operating is entirely unsuited to practical and efficient hospital work.

¶ It consists of two buildings, neither of which was built for use as a hospital. The more modern of the two was constructed on the plan of an apartment house, in order to secure a loan from a bank sufficient to provide for the cost of its construction. The hospital has two operating rooms; neither is equipped with the proper studio skylight. The general kitchen is not much larger than that of the average home, yet it must provide an average of more than two hundred meals a day.

¶ The dispensary department, the work of which is shown in three scenes below, has only a single room allotted to it. Patients must wait for treatment in a narrow hall, for there is no waiting room for their use. The nurses' training school has a single small classroom, which must serve also as a demonstration room and a dietetic laboratory.

¶ These deficiencies in the hospital's equipment must be corrected in order to make it possible for the management to give the high grade of service it has striven, in the past, to provide the public.

Everyone may join

¶ In this great community-wide enterprise to remove the handicaps under which the Physicians and Surgeons Hospital is laboring.

¶ Cash donations to the fund are not being sought. Instead pledges are being solicited, payable in six, equal, semi-annual instalments. The first payment is due November 15, 1925.

¶ The Physicians and Surgeons Hospital serves all of Wilmington's neighboring towns. Newark, with a population of 2,183 has, during the past four years sent 43 patients to the hospital.
