

NEWARK POST

VOLUME III

NEWARK, DELAWARE, WEDNESDAY, OCTOBER 23, 1912

NUMBER 39

COLLEGE QUESTION BEING ADJUSTED

DEFINITE CONCLUSIONS AT JOINT MEETING OF TRUSTEES AND BOARD OF EDUCATION

A committee of the State Board of Education and a committee of the trustees of Delaware College held a joint meeting on Friday afternoon in the chambers of Chancellor Curtis in the Court House, to consider the matter of higher education of girls in connection with Delaware College. There were present Superintendent G. W. Twitmyer and Professor Harry Hayward, on behalf of the Board of Education, and Dr. George A. Harter, Daniel W. Corbit, William T. Lyman and Chancellor Curtis, on behalf of the trustees of Delaware College.

It was stated by the members of the State Board of Education that the General Assembly of Delaware has instructed them to formulate a plan for the higher education of girls, and that in discharge of their duty they decided that this ought to be done in connection with Delaware College. After some discussion of the general plan for meeting what appears to be the needs in the State, certain tentative conclusions were reached.

In order to bring the matter definitely before the joint committee it was decided that it was the sense of these committees that the State of Delaware should provide three courses of instruction for young women of the state in an affiliated institution at Delaware College, these courses to be:

1. Arts and science leading to a degree of bachelor of arts.
2. Course of domestic science, leading to a degree of bachelor of science; and
3. A course in pedagogy of from one to four years in length.

Entrance requirements for the courses in arts and science and the course in domestic science to be held as are now in force for the course of arts and science and general science at Delaware College; all courses to be of same length and of the same requirements for graduation as similar courses now provided at the college; and also the idea that at the present time the boys and girls should not be

in the same classes. It was thought that with some small additions to the number of the faculty this instruction could be furnished.

Having determined the kind of instruction needed, the next subject under consideration by the committee was the kind of building that would be required for housing 100 girls in class rooms and a home. In order that something definite can be reached in the matter of buildings, wherever located, a joint sub-committee, consisting of Prof. Hayward and Chancellor Curtis was appointed to obtain from an architect tentative plans for a building or buildings to accommodate 100 girls in such an affiliated college, and to obtain an estimate of the cost of construction thereof. It was also considered that there should necessarily be a building which would not be only a dormitory, but a home centre for women, including a residence for a dean for women and other women instructors, and the other building should be devoted to recitations, laboratories and library. The same committee was also given the duty to make some investigation as to a desirable location for the buildings.

It is apparent that the two committees are working in harmony in an effort to solve what is a serious problem, but one which should be solved for the women of this State. There is a great need for opportunities to instruct women who are prospective teachers in the public schools of the State, for the reason that the experiences of the State Board of Education show the inadequate training and insufficient education possessed by many of those who have applied and submitted to examinations for teachers.

When the plans of the two joint committees are carried out, they will be submitted to the State Board of Education and the trustees of Delaware College and something definite and practicable will be ready for submission to the General Assembly.

State Farm and Experiment Station

The Inter-Collegiate Dairy Judging team, consisting of W. L. Brockson, Paul Emerson, L. O. Russell, all of the class of 1915, with Professor Hayward, started today for Chicago, where they will compete with about ten other land grant colleges at the National Dairy Show on Friday.

Mr. W. F. Williams of the Department of Farm Management, United States Department of Agriculture was a visitor at Delaware College on Saturday.

Professor Manns and Mr. Tanbush spent Friday of last week at Seaford, studying diseases of the sweet potato in that region.

The College Farm received three fine Ayrshire cows and an imported bull calf from northern Pennsylvania on Sunday.

In the Dairy Judging Contest held last week at Hagerstown Fair, Delaware College defeated the team from Maryland Agricultural College, by a wide margin.

The annual inspection of the Experiment Station was made last Wednesday by Dr. A. C. True, director of the office of Experiment Stations. Dr. True spent the entire day at this work, and at its close expressed himself as well satisfied with what is being done, saying he had actually no criticisms, either in regard to accounts or as to the manner of conducting the many experiments under way. He was very much impressed with the appearance of the orchard on the State Farm.

The sub-committee of Delaware College Trustees and the State Board of Education have engaged Brown and Whitesides, the well-known architects of Wilmington, to make plans and obtain estimates for buildings adapted to the use of the proposed affiliated college for women at Delaware College.

Yearly Meeting at Welsh Tract Church

The Yearly Meeting of the Primitive Baptist Church at Welsh Tract, convened on Saturday and Sunday last. Services were held in the morning and afternoon of each day. Elder John G. Enbanks, pastor, was assisted by visiting ministers, who were Elders Fenton and Mallett, of Philadelphia, and Elder Wm. Alexander, of Wilmington. Quite a number of visitors were present from Wilmington, Philadelphia, Baltimore and nearby churches.

WEDDINGS

Derrickson-Ginn

Crisis have been received announcing the marriage of Miss Ethel Derrickson of Townsend and Mr. G. Arthur Ginn, on last Wednesday, October 16th. Miss Derrickson, during the last school year taught the eighth grade, Newark Grammar School.

Mr. and Mrs. Ginn will reside on a farm near MacDonough, Del.

Hill-Mitchell

On Wednesday evening, October 16th, Nellie May, the only daughter of James J. Hill of near Christiansburg, and John W. Mitchell of the same town were quietly married at the home of the bride's father by Rev. D. J. Moore. Only a few of the friends of the family were present. The happy couple has the best wishes of a host of friends. They will reside in Christiansburg.

Republican Mass Meeting

Plans are complete for a large mass meeting to be held by the Republicans of White Clay Creek Hundred, in the Opera House, Newark, on Tuesday evening, October 29th. Hon. Charles R. Miller, gubernatorial candidate, Hon. Ruby Vale, and others will address the meeting. A cordial invitation is extended to all.

Supper at White Clay

The annual supper held in the White Clay Creek Presbyterian Church was given last Monday and proved the usual social and financial success.

The church was tastefully decorated with a profusion of autumn leaves and flowers and afforded an attractive setting for the appetizing supper which the ladies served.

Among the many interesting things displayed for sale were the dahlias grown by Mrs. William Peach, at her home near Newark. The blossoms ranged in coloring from the deepest shades of the most delicate tints, and included some rare specimens of this hardy plant family.

Old Folks Service

Great interest is developing in the Old Folks service to be held in the M. E. Church next Sunday morning. The pastor will preach an appropriate sermon. A cordial invitation is extended to all, and especially the older people of the community. If notice is given the pastor not later than Saturday evening conveyances will be provided for all old and invalid persons who desire to ride to church. If the day proves stormy the services will be held the Sunday following.

Lecture at Christiansburg

Next Wednesday, October 30th, Rev. Geo. W. Bounds will deliver his lecture entitled "How to get a wife and the art of keeping her" in the Methodist church at Christiansburg. Admission will be 25 cents. Mr. Bounds is one of the best speakers in the Wilmington Conference and his lectures are hard to beat.

Visits College Farm

Rev. John O'Connell of the St. Joseph's Industrial School, Clayton, Delaware, spent Monday of this week at the College Farm, in consultation with the heads of the various departments, concerning work and methods in practice there.

Runaway on Elkton Road

Clifford Spotts was seriously injured yesterday afternoon in a runaway accident on the Elkton road about two miles from Newark. He was riding in a two horse team with Monie Dunbar and an automobile in passing the team turned into the road too sudden, striking the horses, causing them to run away. The occupants were thrown out. Mr. Dunbar escaped uninjured but Mr. Spotts was not so fortunate. Dr. Walter H. Steel was sent for and after giving the injured man temporary relief removed him at once to the Elkton Hospital. It is thought that his collar bone as well as one rib was broken.

TABLET PLACED ON ACADEMY BUILDING

The tablet erected through the efforts of Mrs. Walton Hilton and friends of the old Academy in commemoration of the part played by the old institution in the educational history of the Peninsula, has been purchased and placed beneath a window to the left of the center of the main building. Three signers of the Declaration of Independence were educated at the old Newark Academy.

Mrs. Hilton expresses sincere thanks to all those who have made the Academy Tablet a reality.

Leave for Baltimore Synod

The Baltimore Synod, composed of the Presbyteries of New Castle, Baltimore and Washington, will convene in the New York Ave. Presbyterian Church, Washington, D. C., on Monday, October 30th. Rev. W. J. Rowan and E. B. Frazer of the Newark church, Rev. A. Van Overen and Robert Cook, of the Head of Christiana, and Rev. J. S. Gillilan, Presbyterial Evangelist, will attend.

The Ladies Missionary Societies will hold their annual convention at the same time. Mrs. A. Van Overen will represent the Head of Christiana church.

Church Supper at Christiansburg

The annual supper given by the Ladies Aid of Christiansburg Presbyterian church is held to-night and to-morrow evening. Oysters and poultry are prominent items on the bill of fare.

Interesting Matinees

The entries for the matinee races to be held at the Glasgow Driving Park on October 29th, have been announced on posters and judging from the horses entered it will be one of the best matinees of the season. There will be five events as follows:

Class A—Nettie Dewey, b. m., Mr. Rose, Delaware City; Archens b. s. Mr. Warren, Delaware City; Red Rock, b. g., Mr. Harlan, Elkton.

Class B—Bessie Patchen, b. m., Mr. Lafferty, Newark; Torine Wilkes, b. g., Mr. Kibler, Chesapeake City; St. Elmon, br. g., Mr. Lester, St. Georges; Buster Brown, br. g., Mr. Warren, Delaware City.

Class C—Queen Admiral, g. m., Mr. Lester, St. Georges; Blanche C. blk. m., Mr. Cannon, Porters; Michael, s. g., Mr. Lester. One of Mr. Lafferty's horses of Newark will also race in this class.

Class D—Elkton Roy, b. g., Mr. Karl, Elkton; Poosing, b. g., Mr. Cozier, Kirkwood; Browne, b. g., Mr. Price, Mt. Pleasant; Mr. Lafferty and Mr. Salmon of Summit Bridge will also enter their horses in this race.

The fifth event, Class E, will be for three-year-old and younger and those who have entered their horses are Mr. George of Summit Bridge, Mr. Price of Middletown, Dr. Cana of Kirkwood, H. Wilson Price of Porters and H. M. Price of Porters. There will also be five events at the second matinee to be held at Hubers Driving Park, next Saturday. They will be colt race, 2:50, 2:35 and 2:30, all mixed classes and free-for-all. A special feature will be a motorcycle race and entries for this race should send their names to L. G. Stolle, Newark. An automobile race has also been suggested but it is thought the track would be too narrow.

THE KING STREET MARKET REFORMERS

JUDGE COCHRAN ORDERS INVESTIGATION TO FARMERS' ADVANTAGE

No court decision of recent date will be received with more interest by the farmers of this community as that handed down by Judge Cochran of Wilmington City Court when he took occasion to pass opinion on the violations of the law in the Farmers Market.

Judge Cochran, in City Court imposed a fine of \$5 and costs on Aaron Holdolky, a fruit dealer, at Seventh and King streets, for obstructing a public street. The case as been under advisement for some time, argument being presented by Philip L. Garrett, attorney for the defendant, and Assistant City Solicitor Lynn last week. In handing down his decision, Judge Cochran gave orders that all vendors in the street markets, other than farmers, as well as those farmers who purchase supplies here and sell it as their own raised products, be arrested.

The opinion follows: "The defendant is charged with violating the city ordinance by extending into a street a stand kept by him on Seventh street, beyond the space allotted by the city ordinance.

"The defendant claims and has so testified, that he, in renting space on said street from the clerk of the market, had granted to him by said clerk, the privilege of extending his said stand beyond the space allotted by the ordinance, into the street, and has paid the clerk of the market for such extra privileges.

"The street and spaces to be rented by the clerk of the market to persons, and to be occupied by them for the purpose of selling certain vegetables, meats, produce, &c., are all provided by the ordinances of this city. The duties, powers, &c., of the clerk of the market are also clearly defined.

"The clerk of the market has no power or authority to rent any space, stall or stand in any of the streets, which are not set apart by

the ordinances or legislative acts, to any person, for the purposes above mentioned.

"He has no more authority to give this defendant the privilege to extend his stand into the street at the place in question than he would to rent him a stand on French St. or some other street not set apart for market purposes. As the space over which the defendant had extended his stand is not by ordinance allotted for market purposes, the defendant is therefore, guilty of the charge.

"His ignorance of the law does not excuse him, nor does the lack of authority in the clerk of the market protect him.

"He had been warned by the police that he was violating the law. He should have made inquiry, and ascertained his rights.

"From the great number of complaints made in regard to the practices in the markets of this city of letting space to persons not entitled to the same, and of a system of extortion by compelling persons to pay a bonus for stalls and stands in the markets, and many other irregularities in the way of buying privileges not granted by law, it seems to this court that there should be a strenuous effort made to rectify these wrongs and punish the offenders. In conclusion I might say that I am informed on reliable authority that there are other serious irregularities going on in the market; one of which is that some farmers in the market are selling produce other than their own, making a regular business of buying produce, especially eggs and cold storage eggs, too—selling them as their own and as fresh eggs, which I consider a great imposition on the public and should be broken up. I hereby order the Police Department and would like all other officers of the law and those in authority to keep a sharp lookout for all such offenders and bring them before the court.

Bull Moose and Wilson Mosquito pass through Newark

A young Bull Moose, Herbert Hoover, and a Wilson Mosquito, W. B. Henderson, passed through Newark Monday on a tramp from New York to San Francisco. They left New York October 14th and expect to land in Frisco by the last of January. They intend to start immediately from there to Seattle, Washington, thence via British Columbia route through Canada returning to New York by July 1st.

The young sports are earning their way selling post card views. On inquiry they disagreed on the political situation, the Mosquito claiming Wilson first with Taft and Teddy running about even. The young Moose said his observations showed Teddy in the lead with Taft still in the Woods.

To Visit Sparrows Point

Professor Merrill Van Geisen Smith, instructor in Mechanical Engineering at Delaware College, will take seven members of the Senior class on a trip to Sparrows Point tomorrow. They will inspect the large plant of the Maryland Steel Company.

Little Red Riding Hood attracts large crowd

Before a large crowd in the parish house of St. Thomas' Church last night the playlet "Little Red Riding Hood," was given under the auspices of the Women's Guild of the Children. The childer had been trained by Mrs. Ruth Rhodes and took their parts well. The characters were as follows: Red Riding Hood, Marjorie Rose; Mother of Red Riding Hood, Anna Sanborn; Wolf, Robert O. Hayes; Woodman, Charles Smadwood; Queen of the Fairies, Mary Warren; Fairies, Charlotte Hossinger, Katherine Reed, Helen Reed, Isabelle Dobson, Dorothy Hayes, and Pauline Widdow. Dorothy Hayes, and Pauline Widdow.

Newark and Field Club Play Interesting Game

The benedicts and bachelors did not play the much talked of baseball game on Saturday because a number who were down to play failed to appear. There was an interesting game, however, between two teams with "Vic" Willis and Hogan, doing the pitching. Hogan allowed but three scattered hits and his team won 8 to 1. The score follows:

Dr. Albert Robin of Wilmington lectured before the students of Delaware College this morning.

THE RURAL SCHOOL OF TO-MORROW

THE NEW IDEA IN PRACTICE IN PAGE CO. IOWA

The following interesting clipping is taken from "The Rural School of To-morrow" by Herbert Quick in LaFollette's Magazine. The article discusses the demand for organized social centers and believes the solution of the problem lies through the rural school.

After regretting the absence of the neighborhood fellowship that exists in the old countries, or even that which existed in pioneer days in our own land, which the writer attributes largely to the trolley, the motor car and the daily mail, Mr. Quick proceeds as follows:

THE NEED OF CO-OPERATION.

Rural communities need to get together, but the American farmer is too much of a utilitarian to yield to the attraction of amusement for his own sake, or offered education, or debates or lectures. He is hard-headed and rather cynical about new things. Companionship with his fellows may be needed, but the need is not fully confessed nor keenly felt. He is rather single-minded in his pursuit of profit in the material sense. Like all self-respecting people, he objects to the process of being "uplifted," by the people who take a position above him. If social centers are to succeed in the rural community, their success must come through their ability to serve the farmer and the farmer's wife along the lines of thought and endeavor which appeal to him.

For these reasons the church does not seem able to furnish the nucleus of the rural social center save in rare instances. Here and there, the rural church is doing good work in building up again the lost sense of neighborhood; but on the whole churches are losing ground in the country. One of the gravest problems which confronts the churches is the problem of the ebb-tide which is leaving stranded and abandoned churches on so many countryside. Moreover, the church cannot do the whole work. Many people do not belong to any church. Those who do belong are divided among many denominations, which, if not warring at each other are not co-operating, and are in no position to co-operate. The church cannot call in aid the powers of taxation, nor the assistance of the state. It may be a social center for the community, but it can never be, and should not be, the social center.

The neighborhood club and the co-operative organization are doing good work in places. Women's clubs have worked great changes in some rural neighborhoods. I know of some places where clubs of farmers' wives have kept up for many years successful meetings of a character very similar to the gatherings of people interested in literature, current events and music in cities. Some of these communities are admirably served by these clubs. But on the whole I feel that there is less of this social activity than there was 30 years ago. The clubs are better, perhaps, than were the old spelling schools and "literaries," but they are vastly fewer. The need for social centers everywhere, as a potent force in American life, as universal as the practice of agriculture, has no hope in these communities that most need working are incapable of feeling utility or amusement in these rather sophisticated and "highbrowed" affairs. Something more elemental and elementary, more useful and more profitable materially, must appear.

WHAT KNOWS THE RURAL SCHOOL?

Along with this demand for rural centers comes the admitted need for a new kind of rural school. The rural school of today is apt to be in the main a bad copy of a poor city school. It is not related to the country life. It proceeds as if on the theory that farmers' sons should all become clerks or professional men engaged in urban employment, and all country girls stenographers, shop girls, factory employees, or the wives of such city dwellers. This bias of the rural school against rural life is the one great scholastic blunder of this nation. It has acted as a powerful wind blowing the self same way with the baneful tide of allurement and economic pressure which has been for so many fatal years, and still is, emptying the farms into the cities.

"RURALIZE THE RURAL SCHOOL."

Our eyes are becoming opened to the destruction which such schools work on our national life. The word has gone forth that the rural school must be ruralized. It must be correlated with rural life. It must open the eyes of the country children to the beauties of that field of nature in which the farmer sets with and is rooted upon by scientific truth. Our arithmetic must deal with the quantities of soil constituents, farm inventories, eggs, poultry, cow-testing, and generally with the computation of problems related to scientific agriculture. Every problem in mathematics must be a problem in rural life. Our nature studies must deal no more with the kookoo, the nongoose, the tomcat and the arctow, but rather with the cow, the hen, the hog, the horse and the sheep. Our physiologies must abandon the useless anatomies and terminologies of yesterday and become comparative. The physiology of the domestic animals must be considered with that of the human being to the end that we shall know our animals while knowing ourselves, and each the better for knowing the other; and our hygiene must take

the nutrition of these friends of the backyard and pasture.

Thus the rural school shall become a school of animal husbandry. Geography must so far include the study of soils that the child may know of the plant food in his father's farm, whether he knows the capital of his state or not. Reading and spelling must be related to the life of the farm. History must tell of the movements of agriculture, rather than of battles or political contests. Pupils will do their language work in reporting the results of experiments in farming, rather than in the diagramming of sentences or the parsing of words. And where such work in systematic grammar is done, the sentences chosen will be such as to possess a background in the real life of the pupils, rather than in mythology or the classics. The school will be completely ruralized.

PUTTING IDEAS INTO USE.

And in the process the cultural efficiency of the schools will be increased tenfold, because the children will not only imbibe ideas, but will use them. The dreariness of most of our purely "cultural" studies lies in the feeling on the part of the child that the whole matter is in an unreal world of school and quite aside from the world of life. When the rural schools become real laboratories of farm life, when the boys and girls study in the schools the very things their parents are laboring with on the farm, the habit of thinking about things rather than about words will give vigor to every phase of thought. If I desired to produce a generation of poets, artists, mathematicians and statesmen I would begin by giving to the minds of the young the real grain of scientific truth to grind, trusting to the insatiable hunger of the mind which grows by every morsel of truth consumed by it. I once saw in one of these new rural schools a boy sitting with a rack of agricultural bulletins at his elbow, writing on raspberry culture. I asked him why he chose that topic for his essay. "I'm growing raspberries for the market," said he. Language for this boy was a medium for expressing thought, rather than for getting marks. He was interested in the essay, but more in next year's crates of berries. Out of such conditions will come pupils who will make the language glow with meaning, as do Caesar's Commentaries and Grant's Memoirs—and for the identical reason that gives immortality to these works as literature. In each case the writer will have something to say.

WHAT ABOUT THE RURAL SCHOOLS? Out of this kind of country school, I believe, will grow the new kind of rural social center. Already the Babcock milk tester, the weed cabinet, the trap nest, the experimental plot of grain, vegetable or flower are to be seen in and about the rural school. Wherever these schools are correlated with rural life, the social center springs up in the school spontaneously. I am convinced that if it is to live and serve it must spring up.

A farmer in Page County, Iowa, was rather opposed to the new-fangled notion of teaching agriculture in the school. But after the milk of his cows had been tested in the school, as a part of its regular exercise, he changed his mind. For by this test he discovered that cows which he thought as good as any, were actually being kept at a loss. The simple classroom experiment in natural philosophy had made it possible for this farmer to live a fuller and happier life. The school reached on the home, and the home felt it. To this man the school became as much a part of his life as it had been of the life of his children.

The correlated rural school thus becomes a continuation school for every man in the district.

And for every woman too. The girls who compete in the cooking and sewing contests bring their mothers into the work of the school room inevitably.

A link is established connecting every farm with every other farm, and binding them all together. A social center comes into being with or without meetings. But the meetings are inevitable, and with the fact of meeting come social relations, debates, lectures, moving-picture shows and perhaps dances and games. The people meet because they have something to consult about and do not because some well-meaning person has said, "Go to now—let us be social."

THE RURAL SCHOOL IS THE NUCLEUS.

I am convinced that the school must furnish the nucleus of the rural social center of the future. It must do so by making its work a part of the farm work of the community. It must do so by an appeal to the economic sense of the people. It must do so by taking over and performing a great deal of work that can be done by the pupils to their great educational advantage, and to the financial benefit of the farmers. The schools are equipped or can equip themselves, to perform a great many such tasks. They may carry on cow-testing work for the upbuilding of dairy herds. They may work out balanced rations for the live stock and poultry of the neighborhood, in each case furnishing the farmer the instructions for mingling feeds, and telling what he should lay for the purpose of balancing the diet. For these things are a matter of investigation

which any advanced class in a country school may do. They may keep records of the egg production of the various flocks to the end that the best local strains may be known. They may record increases in weights of different lots of animals being fed that the best rations and the best conditions and the best breeds may be recognized. They may analyze every lot of seed of any kind brought into the neighborhood, for foul seeds and for variety. They may test the seed corn of the neighborhood, ear by ear, or if this seems impracticable they may make and send out the cabinets for such testing at the homes. This work alone would add millions to the corn crop of any of our corn-growing states if it were universally carried out. They may test new vegetables and flowers. They may make garments for the homes. They may develop the art of cookery to the great satisfaction of the housewives. They may make war on flies and vermin. They may make the hookworm in our southern states a thing of the past. Some schools may do all these things now, and any school may do some of them. And as soon as this work starts the social center is well on the way to flourishing life, whether it is intended or not.

BEST BUSINESS COLLEGE IN THE WORLD.

There are other and higher tasks to which the rural schools may address themselves as they gather strength by contact with truth—tasks beyond the power of the ordinary farmer to perform. One of the greatest of these is the task of keeping the farm accounts.

Many will be surprised at the statement that no satisfactory system of farm accounts of a statistical nature has as yet been worked out. So many agriculture economists are now at work on this matter, however, that we shall soon have, I doubt not, as good a cost-system for the farm as we have for the factory. But it is certain that when the system is perfected it will be found too complex for the farmer to keep. A proper cost system for the farm is vastly more complex than the books of a bank. The farmer cannot keep it if he knew how—it would take more time than he could give to it. But there seems to be no reason why the perfected rural school should not be able to keep the perfected accounts for the farm. It would constitute work of the highest educational value for the older pupils of the school. It would gradually accumulate a mass of facts as to the profits and losses in farming which would be of priceless value to economists, now, if accessible. In connection with the tasks I have mentioned, with soil analysis, and things generally which can be better done collectively than individually, it will make the rural school the best business college in the world.

A LABORATORY FOR THE FARM.
The rural school will thus become a

farm laboratory and a domestic science school. As a continuation school in which the grown people as well as the children are enrolled—in fact if not in form—it will command the constant attention, and attract the intense interest of every patron. New buildings will be required, better grounds, and a stronger teaching force; but these will be eagerly furnished when in addition to giving to the children and young people a broad and practical education, the school's work will have a great, a growing, and a measurable money value. Such a school will be merged in the general society of its community, and ceases to be a thing apart. The life of the school and the life of the farm will be one.

Nobody who has seen the uplift which has come to a considerable number of our rural communities through a correlation of rural school instruction with rural life can, I believe, condemn this picture as impossible. It is so far from being in the realm of the impossible as to be, in its beginning, already in existence. Several of the states already require the teachings of agricultural and domestic economy in the rural schools. This teaching is in most schools most inadequate; but it is doing a great good even in its imperfections. The elements of agricultural science are not more difficult than are other studies which have been from time to time imposed upon our unprepared teaching force; and such is the grip of real truth related to actual life that this teaching possesses a gratifying vitality already. In several school systems rural life and rural sentiment have been profoundly affected by the timid beginnings of the new kind of rural school. I have in mind the conditions in Page county, Iowa, as best known to me personally. In Barnes county, North Dakota, the social center seems already in promising growth from the rural schools, and is assuming the very significant form of economic co-operation—that greatest need of rural life. In parts of the south the schools are taking hold of the eternal varieties of Mother Earth in a wonderful way. And all over the nation the school activities in corn, tomatoes, flowers, live stock, sewing, cooking, sanitation, debating, entertainments, picnics and all the useful factors of a full social life are manifold and increasing. The social center which I now here suggest will inevitably grow from these seeds, if the schools themselves take up their true work, that of making themselves the social and economic laboratories of their communities.

WHAT IT MEANS.
The dream to me is a wonderful one. It means the ennobling of the rural teacher, and the ennobling of his functions and emoluments. It means the coming into his own of that long-condemned officer, the county superintendent of schools. It means more money for schools and money expended with actual financial

profit to the community. It means that the school work shall be in large part economically productive work. It means a school system in which the people will spend their money with the same sense of good business judgment which they now feel in building barns. It means a longer school life for the farm boys and girls, for the reason that their work will be necessary as well as educative. It means in every way a more contented and a more efficient, fuller rural life.

It will tend to arrest the drift of the rural population to the cities. On incident in proof of this, and I am done. Years ago in Wright county, Iowa, 157 boys and 174 girls in rural schools were asked their plans for life. All but seven of the boys, and all but 11 of the girls declared that they would have nothing to do with farming. During the next three years the teaching of agriculture and domestic science was introduced. Another vote was then taken in the same schools, with 174 boys and 178 girls voting. All but 11 of the boys and but 17 of the girls declared their intention of remaining on the farm.

This is a revolution in sentiment, and it means much. Once let these new schools complete their work of social regeneration and the drift will turn from the cities to the farm. We shall have opened to all eyes the attraction of rural life, as well as its material rewards; and out of the co-operative intercourse of the farmers of the nation will grow the new democracy which has been the dream of reformers and humanitarians.

Cholera Costs

MILLIONS OF DOLLARS every year to poultry and hog raisers. Last year thousands of Hogs and Poultry were saved from cholera and other diseases during the hot weather by the use of

Cal-Sine
The Greatest Cholera Preventive Known

Prevents and cures the cholera, but don't put it off until they are over. Give it to them now—mixed with feed. It regulates the workings of the bowels, disinfects them, keeps them cool and healthy.

Cal-Sine Powder for Poultry
and another for hogs, packed in metal cans, easy to stir up, has strength or equal the others and costs no more. It is all medicine and guaranteed ton.

How to Tell
Written to be understood by all grown from the long stock owners, our 50 page illustrated book, by consulting Veterinarian, showing how to know and showing how to cure diseases in Horses, Cattle, Sheep, Swine and Poultry, together with over 14 up-to-date Cal-Sine Remedies, including:

RESORBINE
Our guaranteed remedy for King Bones, Spavin, Scurvy or any bony enlargements.

Christmas Green

The gathering of cedar and holly and the shipping of them has become an important industry in the neighborhood of Seaford, Sussex county. The prospect for a large output is unusually good and contracts are already being made for the delivery of these evergreens. Dealers state that the holly is beginning to look fine, with plenty of the red berries which make it so attractive to the city buyers. The cedar trees are also full of berries, a sign, so the old weather prophet states, of a severe winter. Although the shipment last season was a record breaking one the supply this winter promises to surpass all of former years.

The End of the Oldest Newspaper in the World

The president of the Chinese Republic, Yuan Shih Kai, recently suppressed the newspaper King-Bao, which undoubtedly was the oldest paper in the world. For 1,500 years it has reported the more important news not only in China, but also of foreign countries. At a time when the art of printing and journalism was as yet unknown in Europe, the Chinese Gong-Chung invented a means for making types from lead and silver, and in the year 100 A. D. the paper King-Bao was printed, and has since been issued regularly until recently. The first edition was printed on ten sheets of yellow silk, neatly tied together, and was thus sent to all the high officials of the Chinese Empire.

Post gets a Tip—its Result

A friend of POST PRINTING because it is worthy of friends, gave us a tip to an outside of town firm who is sort-of-particular about his printing. We got a letter of introduction and send-off something like this: "These Post people, I mean the men who do the work, are artists in that they know how, they are business men in that they deliver the job when its promised or they don't take it. They never make a promise in the office they go ask the foreman first. And the prices—well you get value received. Give them a trial."

Now you can rest assured we will attend to that customer.

Say, by the way, if you happen to know any one in Wilmington, or Philadelphia, or anywhere, who is likely to need printing, give us his name.

We will appreciate it and so will he, when we deliver the job.

And that means more business for Newark.

What's good for Newark is good for you.

EGG CENSUS TAKEN—STORAGE INCREASE OVER LAST YEAR

Uncle Sam's crop reporting experts have been taking an egg census.

They announced that, although there were only 1,119,096,000 eggs in cold storage at this time last year there are now in the warehouses waiting consumption some time next winter, when prices get high enough to induce the "egg kings" to dispose of them, exactly 1,173,133,800 eggs. This is an increase over last year by some 54,000,000 eggs.

If the production of a western expert that eggs will reach the price of five cents apiece comes true, the warehouse men will be able to sell their product for \$58,656,690 not including the millions of eggs that will be gathered and put in cold storage before cold weather comes.

Church Notes

The W. C. T. U. will hold their regular meeting next Friday at 2 p. m., at the home of Mrs. Price, South Chapel street.

The ladies of the Presbyterian Church will hold a Rummage Sale about the first of December. The ladies of the congregation are requested to bear this in mind during the house-cleaning season.

All the ladies of the Presbyterian Church are requested to meet in the lecture room of the church following the regular Wednesday evening prayer-meeting, to discuss the final arrangements for the supper to be held in the Opera House on November 7th.

Locals

Many of the down State towns have already made arrangements for a Chautauqua week for next Summer.

The Parent-Teachers Association of Milford resumed regular meetings last week. An article from the Child Welfare Magazine, on The Co-operative Influence of Home and School, was recommended for profitable reading, and an article that cannot fail to arouse parents to the responsibility they should assume in helping the teacher in the education of their children.

Plans are progressing for the State C. E. Convention to be held in Laurel, Delaware, November 7th and 8th.

TOMORROW COMES THE SUN

After the storm the calm;
After the night the day;
After the frosts the flowers;
After the work the play.
After the grief the joy;
After the stress the rest;
After the loss the gain;
After the worst the best.
Look for the good and hope;
Strive till the right is won;
Smile at the clouds and wait;
Tomorrow comes the sun.

—Sarah K. Bolton

Want Ads for Farmers

Only a comparatively few readers of newspapers realize the benefit of the Want Ad Department. It is a cheap form of advertising odds and ends. For the farmer it is always a paying proposition. Suppose you have a cow, few pigs that you would be willing to sell. Put it in the Want Column and rest assured you will get the customers. Then again, a farmer often sees where he could handle a heifer or calf during the winter. With a little extra forage, he has on hand, he can by feeding it make a dollar or so without any extra work. But he has not the time to hunt them up. Run in an Ad something like this:—

WANTED—Calves. Would buy 3 or 4 calves, if price is right.—

You will get an answer. There isn't a farmer in this community but what could have an Ad in our Want Department at a profit to him.

Service is the paramount issue when a new plumbing equipment is under consideration. You want the fixtures to retain their original beauty for many years and the plumbing system must retain its sanitary security also.

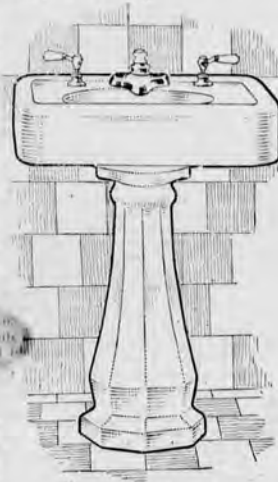

The tearing out of new equipment is not desirable and would more than waste any amount saved out of first cost by having the work done cheaply with imperfect materials.

You avoid such a catastrophe when you give us your order, for the skillful workmanship, the high grade materials and "Standard" fixtures we use insure a permanent satisfactory equipment; it further means your

OCTOBER 23, 1912

OPENING OF DELAWARE COLLEGE

OFFICIAL REPORT—REVIEW OF CHANGES AND IMPROVEMENTS

(We are enclosing our special this week in order to print the official Report of the opening of Delaware College.)

Delaware College has entered on the present academic year with a Freshman class of 61 and a total enrollment of 163. The Seniors number 24; the Juniors, 28; and the Sophomores, 51. Of the Freshman class 10 students have enrolled in the Arts and Science course, 18 in the Agricultural, and 33 in the Engineering course (Civil Engineering, 18; Mechanical Engineering, 8; and Electrical Engineering, 10). All of the Arts and Science Freshmen are from Delaware; the Agricultural and Engineering courses have drawn somewhat from surrounding States. Wilmington sends to us 20 new students, rural New Castle county, 10, Sussex county, 10, and Kent county but 5. Sixteen Freshmen come from Maryland, Pennsylvania, New Jersey, and New York. The average age of the Freshman class is 18 years, 9 months. Twenty-eight of the new men are graduates of high school; 33 are non-graduates.

Three changes have been made in the Faculty. Mr. Thomas Mayo Roberts succeeds Mr. T. L. Sturges, Jr., as Professor of Electrical Engineering; Mr. H. K. Preston succeeds Mr. Joseph M. McVey as Instructor in Mathematics and Engineering; Mr. M. O. Cooper comes to us as Instructor in Animal Husbandry. Professor Roberts received his college education at the University of Oregon, where he taught mathematics for a year after graduation. With a degree of A. B. from "Oregon," he took the complete Electrical Engineering course at the Massachusetts Institute of Technology, graduating in 1898 with the degree of B. S. The Master's Degree was taken three years later. Immediately after the Spanish-American War, he was employed for one year in the U. S. Engineer Corps in fortification work in Portland (Me.) harbor. He was one year with the New England Structural Steel Company and two and a half years with the Edison Electric Illuminating Company of Boston in general station power work. The past ten years, he has been assistant engineer with the General Electric Company; and during the past two years, in addition to his engineering work, he has taught in industrial electricity at the Franklin Union, Boston, Mass. He is a member of the American Institute of Electrical Engineers.

Mr. Preston was graduated from Lafayette College in 1909 with the degree of C. E. For two years after graduation he was Instructor in Mathematics at Lafayette. In 1911, he accepted a position in the engineering department of the Delaware, Lackawanna and Western Railroad. Mr. Cooper was graduated from Iowa State College in 1912 with the degree of B. S. in Agriculture. He has had a great deal of practical experience on the best stock farms in the United States.

Various changes or improvements have been made in the departments of instruction. In the Department of History and Economics, almost a complete reorganization has taken place. Delaware History has been put on a satisfactory basis. A reasonably satisfactory collection of books for its study is available. The new courses in History are Modern Europe, American Government, and Current Topics; and the special courses in Socialism and Taxation are offered. One of the most gratifying features of the work of the department is the marked interest that is manifested by the students in economic problems. A first class reference library is being established for the history work in all branches. Arrangements are being made for a series of four lectures by men who are recognized specialists in their respective fields.

Several changes have been made in the work of the English department. A new course in American Literature, elective for Sophomores and Juniors, is being given by Mr. Dutton. Most stress is laid on Irving, Hawthorne, Poe, and Howells. The course in Technical English for Engineers has been advanced to the Senior year, where it is possible to correlate advantageously the work of the two departments of English and Engineering. A new course in Composition is required of Sophomores in Civil Engineering.

Two new courses are offered in Chemistry, a course in Industrial Chemistry and one in Chemical calculations. Two new analytical balances for the use of students in Quantitative analysis have been added to the equipment. The laboratory was so overcrowded last year that additional room became necessary; portions of the Dormitory have been fitted up as working laboratories—temporary, it is hoped—and these will be for the use of students specializing in Chemistry.

The enrollment of Freshmen in the Civil Engineering Department is unusually large, fifteen new students having entered the four years course. The field equipment and illustrative material for class use have been largely added to. In the Senior year the department has provided an option between structural work and sanitary work. The efficiency of the course has been increased by the moving back of Highway Construction to the Junior year. In this year also is offered a preliminary course in Framed Structures.

The new Mechanical Engineering laboratory was finished last year and part of its equipment was installed by the students. Some new apparatus has been added to it this fall and it is now in efficient condition for practical instruction in steam and gas engineering and allied subjects. During the summer a new engine, boiler, and dynamo were put in. This new power plant, which normally is used to run the machine and wood-working shop and furnish power for the Electrical laboratory, can, in case of emergency, be used to furnish light for all

We want and invite communication, but they must be signed by the writer's name—not for publication, but for our information and protection.

the college buildings. Furthermore the new plant has been designed with especial view to its availability for testing. The exhaust steam from the engine can be exhausted into a surface condenser from which it can be collected and weighed. The amount of coal and water supplied to the boiler, the electrical output of the generator, and all other data pertaining to the complete test of a power plant can readily be determined.

Several new units of apparatus are being added to the Electrical laboratory, among which are six one-K.W. transformers and a three-phase 3-K.W. motor generator set. These will be used by the students in power transmission studies. Several pieces of auxiliary equipment have been added, such as circuit breakers, rheostats, and measuring instruments. The old switchboard in the engine and generator room has been thoroughly renovated so that every part of it is readily accessible from the back and each connection easily traced. A new Westinghouse 30-K.V.A., three-phase generator with a direct connected exciter has been installed in the engine room. This is to be run by belt from the new Ames engine.

It will deliver current at 240 volts to the new Westinghouse panel to the left side of the old panel. The current before entering the laboratory is transformed from 240 volts to 120 volts by means of three 15-K.W. transformers connected in delta. The wiring in the engine room will soon be entirely in conduit and thoroughly up-to-date in every respect. The old three-wire 230 volt direct current generator also belts from the Ames engine, and, controlled through the old panel, will deliver current at 115 and 230 volts. When the engine is running every phase of flexibility is provided for in the study of theoretical and practical electrical engineering. At other times, the town current can be used by motor-generators for either alternating or direct current work.

A number of important improvements have recently been made in the Agricultural Department, which will make the work of this department more attractive to the students and more satisfactory to the instructors. These improvements have been made possible partly by the liberality of the trustees in setting aside a larger portion of the College funds than heretofore for agricultural instruction, and partly by the maturing of certain plans which the Experiment Station has had under way for several years, and which, although, of particular value to the Station, will also help in instruction.

One new instructor has been added to this department, Mr. M. O. Cooper, who has brought a great deal of enthusiasm and inspiration to the work in Animal Husbandry. He is a graduate of the Iowa Agricultural College, and has the degree of B. S. A. in Animal Husbandry. He is giving considerable time to the training of a team in stock judging, which will compete in the inter-collegiate contest at the National Dairy Show at Chicago next week. A similar contest was held last week at the Hagerstown Fair, in which the representatives from Delaware College were victors.

At the College farm a new silo has been erected, the dairy barn completed, and a new dairy house built. On the second floor of the latter are rooms to be occupied by students taking the Agricultural Courses, who, by working in the barns nights and mornings will not only be able to get a great deal of practical experience that will stand them in good stead later on, but also will be enabled to pay a part of their expenses.

The College orchards are now coming into bearing and furnish the students with practical experience in the picking, packing and marketing of the various kinds of fruit. This is a decided addition to the equipment of the department, and supplements in a desirable manner the class-room instruction in Horticulture.

The work in Soils and Agronomy is being strengthened by the progress that is made each year on the 500 experimental plots at the farm. Many of these have produced six crops under controlled conditions. The results are becoming more valuable each year. A large part of the student demonstration work in soil treatment and in field crops is taken from these plots.

The experimental plots will also furnish valuable data in Soil Bacteriology, which study has just been added to the course in Agriculture.

During the summer a number of important additions were made to the live stock on the farm. Of these mention should be made of an imported Hackney mare, four fine Ayrshire cows, and a number of pigs and sheep of different breeds. The variety and quality of the live stock available for the use of students at Delaware College is not excelled by any of the Land Grant institutions in the East or South.

That the opportunity in Agriculture is being appreciated, is evidenced by the fact that a large proportion of the two last entering classes are taking the Agri-

cultural course, the equipment for which—with the exception of an agricultural building—must now be considered quite satisfactory.

The outlook, this year, for the Corps of Cadets is encouraging. The officers are displaying unusual zeal, and have aroused the best efforts in everyone to attain the greatest possible efficiency in the limited time and space at our disposal. The Corps is organized as a battalion of four companies, with a band and signal detachment, and numbers 163 cadets: 20 Seniors, 28 Juniors, 51 Sophomores, and 61 Freshmen. On October 9, the battalion took part in the "Old Home Week" celebration at Wilmington, and received the applause of a large host of friends. The band especially attracted much attention. The detachment have taken hold exceedingly well—and the whole command made a striking appearance in their khaki uniforms. The Corps will also attend the inauguration of the Governor in January, and it hopes to make a sufficiently good impression to warrant a desire for their presence at the Presidential inauguration in March. The War Department attaches great importance to small arms firing, and each year asks if the cadets have had any out-of-door practice. Several years ago a range about one mile from the college was used jointly by the local militia and the cadets, but was abandoned because of a misunderstanding. This range includes the only ground in the vicinity suitable for target practice, and it is hoped that the owner will release it at an early date. Every American boy should be taught the proper use of firearms, and the commandant is making every effort to secure the range for that purpose. Besides increasing the efficiency, this would enable the College to take an active part in the Inter-Collegiate League. This organization has the highest endorsement of some of our best citizens, and offers handsome prizes for the encouragement of rifle practice.

The Delaware eleven has played just one half of its schedule and has yet to win a game. There are many reasons for this. The main one seems to be the lack of material. The team is very light and cannot be compared favorably with the fine team which represented the "Blue and Gold" on the gridiron last year. We started out with Lehigh University, which was entirely out of our class; consequently, we were defeated 45-0. The next week we lost to Haverford 14-0, the defeat being due principally to lack of generalship on the part of the quarterback. Lebanon Valley held us to a 6-0 score because they were our equals in knowledge of football. Washington College was our conqueror the next week, although we outplayed them in the first three periods. We lost out in the last two minutes, 7-0. The team played at its best and showed a fighting spirit which will, it is hoped, help us win a majority of the four remaining games. Cann, Huston, Hirschman, and Kelly have done the best work so far this season. This quartet is hard to beat and with all of them going at top speed now, it is very likely that Delaware will after all have a successful football season.

Delaware looks for a very prosperous basketball season this year, although four of last year's quintet were lost by graduation. Hamel, captain elect, has resigned from College and as yet a captain has not been elected; but the choice will probably fall on Wallace Sawdon, the plucky substitute guard of last year's team. Cann, the steady Varsity guard, is back in College and will be ready to do his best when the whistle blows to start the season. Dean, '14, McNeal, '14, Foster, '13, Gilbey, '15, McCafferty, '14, and Hoch, '14, the substitutes of last year's Varsity, will be out again this year fighting hard for a Varsity berth. But what Delaware really looks for is a successful basketball season on is the fine material brought in by the Freshman class. Among the Freshmen are some of the best basketball players in the State. Most of them are from Wilmington. Harty, Daley, Kyle, Foster, Hirschman, Weimer, and Rigney have all won fine reputations for themselves as basketball stars in "prep" school and should furnish Delaware with enough material to enable her to win the majority of her games.

The prospects for a successful baseball season are not as bright as they might be. Five of last year's Varsity graduated last June. Their loss will be keenly felt, especially Knopf, Taylor, and Harvey. Jolls and Geoghegan will probably have to bear the brunt of all the pitching this season. There are many pitchers among this year's Freshman class, but only one who has the ability to make the Varsity the first year. The Freshmen have some fine material for the other positions on the team. Doherty, Harty, Hill, Dawson, Hirschman, and Taylor are all fine players and many of them will find place on the Varsity this year. Walter Hoch, a brother of our captain and star first sacker, is a fine all around player, but will most likely try out as pitcher, at which position he is said to be a star. Huston, Hoch, and Lind will be on hand to do their best for the team. If they use the willow with such force as they did in the latter part of last season, perhaps our baseball season this year may prove more successful than we expect. Much depends on the Freshman material, and it is hoped that all of the first-year men who possess any talent at all will come out for the team in season to wipe out the memory of the bad season that we had last year.

The Joe Frazer field is now approaching completion. The concrete-tile fence, with the manual gate at the main entrance and the smaller gate at the entrance for automobiles, is finished. As soon as the tile for drainage is laid, and the ground leveled for the sowing of grass seed, the quarter-mile track with the 220-yard straightaway will be built.

During the summer the interior of the Gymnasium was painted with cream-colored enamel, adding greatly to its attractiveness.

The literary societies, the Delta Phi and the Athenaeum, held their first meeting this week. The Y. M. C. A. has issued its annual handbook giving the various important bits of information concerning the college and the student associations.

Anniversary of First Regiment of Dela. Volunteers

The fiftieth anniversary of the First Regiment, Delaware Volunteers, was observed in Dover on Saturday. Only nineteen of the men who originally left Hares Corner, responded to the fiftieth roll call.

The regiment numbered 1000 men under the command of Colonel John W. Andrews, and a full set of field and staff officers. It was actively engaged in the operations conducted by different commanders of the Army of the Potomac from that time until the surrender of General Lee to General Grant, at Appomattox Court House, Virginia, April 9, 1865. The regiment's record for bravery, heroism and strict attention to duty is the equal of any regiment participating in that great war for the maintenance and preservation of the Union.

Heavellow, Mr. and Mrs. Alfred Whiteman, Mr. and Mrs. Fred Robinson, Mr. and Mrs. William Benson, Mr. Harry Benson, Harry, Charles and Clarence Whiteman, Richard, Springer and Raymond Benson, Albert and William Edmondson, Robert Frist and Edward Heavellow.

Washington College defeats Delaware

The Delaware foot ball team was defeated last Saturday by Washington College, at Chestertown. Delaware outplayed her opponents in the first three periods, but appeared to weaken in the final session.

The sensation of the game occurred during the last two minutes, when Brown, the Washington College back, running back a punt, went through the entire Delaware team, making the score 7 to 0 in favor of Washington.

Twice during the course of the game Delaware had the ball over the opponent's goal line only to lose the count of six points by an unfortunate fumble.

The chief reliance of the Delaware team lay in the working of the forward pass, various new plays, having been drilled into the men during the course of the week's practice. Practically all of the plays which were tried were successful, the two slippings occurring, however at crucial moments, when, had the plays not gone wrong, the Blue and Gold would have been credited with a touchdown. Camu and Seddittler, the two ends, were practically good at the open style of attack, and time after time they tore off gains for good distances and broke up plays of their opponents which looked like sure ground-gainers.

With a little more drilling Delaware adherents should look for two

victories at least out of the games which remain to be played. Line-up Delaware. Washington. Schlittler, left end, Wallace Kelly, left tackle, Garrett E. Loomis, left guard, Davis Rudolph, center, Long Vandergrift right guard, Meredith Dean, right tackle, Wilkinson S. Loomis, right end, Lewis Huston, quarterback, Meekins Hirschman, fullback, Biddle Camu, right halfback, Brown Carswell, left halfback, Strong

Substitutes for Delaware. Pepper for Dean, Harty for Vandergrift; Washington, College, Bowen for Strong, Branham for Strong, Pittsesh for Wallace, Lister for Pittsesh; referee, Saylor, Harvard; umpire, Brennick, Harvard; head linesman, Back, U. of W.

"Why Cultivate Mountain or Swampy Land when you can get Good Land with Improvements, Elegant Water and Near the Eastern Markets, in Southern Chester County?"

CHOICE FARMS

One of the most desirable farms in Southern Chester county, in Upper Oxford township, two miles north of Elkview and Lincoln, containing 94 acres, in high state of cultivation. 14-room house, roofed with Peach Bottom slate, heated with steam, hot and cold water, good soft water supplied by windmill, cement cellars, house built with unusual care, no contract work, newly painted this Spring. Barn 70x65 feet, outside shed 30x56 feet, wagon house 18x24 feet, chicken house 22x24 feet, and stabling for 28 head of stock. Ice house, also smithshop, wood house, two story, roofed with slate; all other necessary outbuildings. Also apples, peaches, pears and all small fruits. This home must be seen to be appreciated. Telephone and rural mail. Price \$11,000; \$7,000 first mortgage, 5 per cent.

A snap of 85 acres, 4 miles from Keltown and 5 from West Grove. A farm to enjoy life on. 16-room stone and brick house for two families, slate roof; barn 40x56. All other necessary buildings, including windmill. Price, \$7,500; mortgage, \$5,000, 5 per cent.

203 acres, within a mile and a quarter of West Grove; a fine 16-room brick homestead and brick barn. Everything one can desire. Price, \$14,000, with a mortgage of \$10,000 at 5 per cent.

2 acres, house and lot, in London Grove township, one mile west of Chatham; well set in small fruit; stable for 3 animals. Five room stone house, small home for small family in fine neighborhood. Price, \$1,600; \$500 first mortgage, 5 per cent.

143½ acres in West Marlborough, 1½ miles to Clonmell, 20 acres good pasture, 20 or more acres timber. Apples and other fruits, 10 room stone and brick house. Barn for 28 head stock, both watered by ram. Very good 6 room tenant house, good wagon house attached to barn, good cement floor hog house and other needed buildings. A desirable farm. Price, \$12,000; \$8,000 first mortgage.

44 acres, mile from Elkview, on Baltimore Central Division, P. R. R. Well set with fruit trees. 11-room brick house, Barn, 55x60 feet, for 20 to 25 head of stock; good well and spring. Fine old homestead, commanding a view of Big Elk Valley. Price, \$6,000; \$4,000, first mortgage.

184 acres in Franklin township, ¾ mile from Landenberg; 25 acres timber, 5 acre meadow. First-class 12-room stone mansion; barn, 80x60; granary, 40x60. Everything on the place to one's desire. Up-to-date farming in all its branches. One of Chester county's finest farms. Price, \$20,000; mortgage, \$12,000, 5 per cent.

40 acres in London Grove township, 1½ miles south of West Grove. 4 acres fine meadow, good apple orchard, 10 room frame house, barn 40x50 feet for 15 head of stock. One of the very desirable farms near railroad and trolley. Price, \$5,000; first mortgage, \$2,500.

House, lot and one acre land in Chatham; also a good business proposition one mile from same village for a butcher; one frame and one brick house, besides stable and slaughter house. Sold cheap. Price \$3,500; mortgage 2,500, 5 per cent. This should be a good place for chickens and mushrooms.

107 acres in Franklin township, 2 miles south of West Grove; 15 acres meadow and 10 acres timber. Variety fruit trees. Two houses, 10-room stone on beautiful elevation, and good 8-room frame one. Pump in kitchen. Barn 40x60, and straw house, 32x50; barn for 40 head of stock. A very healthy location. Soil the best. Price, \$8,500; \$4,000 first mortgage at 5 per cent.

One of the prettiest central farms of the smaller sort in the county. 31 acres on stone road, near New London; 5 acres timber, 9-room brick and frame house; barn 40x50, and cabinetmaker's shop. The place for a happy home for the purchaser. Price \$4,750; \$2,500 mortgage, 5 per cent.

50 acres near Singlerly, Md. A fine family homestead for fifty years. Was never rented. 3 acres meadow, all tillable land, six fields accessible to a spring of water. Apple, pear, cherry and plum trees in bearing condition. 7-room frame house. Barn 40x44 (for 16 head), all necessary outbuildings for a well appointed farm home. Price, \$3,000. Leave mortgage of \$1,500.

LESS INDUSTRIES UNDER THE DEMOCRATIC ADMINISTRATION

DISCUSSION OF THE TARIFF BY T. J. JONES OF NEWARK

(This review is based on personal investigation of official records at Washington.)

If you commence to talk with a neighbor about the Tariff you will generally get the reply from him, "The Tariff is something I don't know anything about,"—and yet he should, for it certainly is one of the most important parts of the legislation entrusted to the Congress of our Country.

And it is the *Huge Earners* of the country whose interests are most directly involved.

Many thoughtless people will say, "A tariff is to protect the rich manufacturer." But think awhile. Isn't it to enable him to pay his employees the difference between the wages they receive and that paid the man in the Foreign Country?

We have been living under tariffs, some Protective and others for Revenue, only since 1815. Previous to that, between 1800 and 1810, it was the non-intercourse and embargo policy of Jefferson. By 1810 our manufactures had reached a per capita of \$27 (in a population of 7,239,881), or 195,000,000. During the war of 1812 our industries very rapidly reached \$47 per capita, or \$400,000,000. After the war the tariff of 1816, Democratic and for Revenue only was enacted, which by 1820, with a population of 9,633,822 had reduced our manufactures to \$52,000,000 or a per capita of five dollars.

This threw 348,000 workmen out of employment, upon whom depended 1,740,000 persons. So much for the result of the first Democratic Tariff for Revenue only. Then followed the Tariff of 1824, which increased our manufactures to \$112,000,000 or \$8.60 per capita. Then came the good old Whig Tariff of 1828, which by 1835 had increased our manufactures to \$60 per capita or \$902,000,000 and every laboring man was employed at good wages, when lo! the Democratic Party must get in its work again with its Tariff of 1835 for Revenue only. This by 1840 had reduced our manufactures from \$902,000,000 to \$441,000,000, and thrown 459,000 workmen out of employment, upon whom depended 2,295,000 persons for their living. Fortunately, the Whigs by the highly Protective Tariff of 1842 had restored the prosperous times and by 1845 had reached the sum of \$1,400,000,000 or \$70 per capita. Then the Democratic Party for Revenue only, got into power, and by the tariff of 1846 reduced our manufactures to \$48 per

capita or 1,055,000, with 800,000 workmen thrown out of employment upon whom 4,000,000 persons depended for support. What do you think of that, Mr. Wage Earner? Don't you think the best thing a wage earner can do is to vote with the Republicans, whose policy is to protect by a suitable tariff the American wage earner?

Then came the Crimean War and Famine in Ireland, all of which gave employment to men, and created a market for our goods, so that by 1860, our manufactures had grown from \$46 to \$64 per capita. By the Protective Tariff of 1862 we had reached the per capita of \$150. Then came the Wilson Bill, Democratic, and for revenue only. Let us ask, How does the Tariff help the wage earner? Suppose our wage earner is getting two dollars per day for his labor. And the Foreign Man is getting only one dollar per day and we have Democratic Free Trade, or tariff for revenue only. Whose goods will be used by us? Naturally the foreign goods. And our men must drop. And now here you are, capitalists, salaried officials, wage earners, women and children, all in the same boat. At the mercy of a new and green Congress. One, it is said you, O ye Wage Earner, elected. Had you forgotten that a Democratic Tariff for revenue only, leaves you out for any assistance to protect you from the low priced labor of the old foreign countries? And that their goods can be sold here right under your nose at less cost than your employers can produce them? And that in consequence of the same kind of legislation in 1815, 348,000 workmen were thrown out of employment, in 1835 459,000, and in 1845 800,000. And yet you blindly will make history repeat itself if you quietly let your Democratic representative do as they please with you. This is not the country where we want to see the workman cut down to the lowest possible figure. The farmer has a good market for his produce if the factories are busy. The merchant has a ready sale for his stores, and so the house builder, the rail road company, and every conceivable seller of goods is busy when the factories are going full blast.

So why is it that our Democratic candidate for President, and wise men, our representatives and senators are so wild to give us a tariff for revenue only, which deprives us of the very power that starts the wheels of industry in motion, from which prosperity spreads itself to every respectable calling in the land?

Let all the people understand that a good Protective Tariff means prosperity to all of the people of our country, because it ensures them employment at a living wage rate. A Tariff for Revenue only pays the expense of running the Government, while wage earner and business man suffer the humiliation of idleness. There has not been the discharge of workmen by the thousands since the Republican Party has been in power.

—T. J. Jones.

New High School Course

The following is the course adopted by the Pittsburgh, Pa. board of Education for Ralston High School, an institution offering a two years course to the pupils of that city and designed to answer, to some extent, the growing demand for something more worth while than some of the studies now on the average high school list. It is not ideal but it is an important attempt to improve the present course. Notice the place given to English, local industries, commercial geography and commercial law. These, though not wholly new, are evidently given unusual attention and the absence of Latin, geometry and other abstract subjects is also noticeable.

A Bit of Sunshine

'Tis the songs ye sing and the smiles ye wear
That make the sunshine everywhere.

—Riley.

"If each man or woman could understand that every other human life is as full of sorrows, of joys, of base temptations, of heartaches and of remorse as his own, which he thinks so peculiarly isolated from the web of life, how much kinder, how much gentler he would be."

"Life is dull to no one; but life seems dull to those dull persons who think life is dull for others, who see only the drab

and gray shades in the woof that is woven about them."

"Have something to work for—and then work for it."

"Faith is the better of the free air and the sharp winter storm in its face."

To cultivate kindness is a great part of the business of life.

"Keep silent. Are the fates against you—Hemmed in on every side? Are friends untrue? Is the world averse? Does its jestings hurt your pride? Why then, all the better reason, When everything else is wrong"

For the sake of some who are crushed and dumb,
That you should be brave and strong."

New Voters

It is estimated that there will be about five million new voters this year—three and two-thirds million young men who will be enfranchised by age, and one and a third million women and newly naturalized citizens. That will make about twenty-six million persons who will have the right to vote for President in November. In 1908 there were about twenty-two million voters, but less than fifteen million of them went to the polls.

Protracted services commenced at Wesley church last Sunday evening.

Pennsy Rushed to Supply Car Demand

The heavy freight tonnage which the Pennsylvania Railroad is handling at present is being moved with unprecedented rapidity, but according to officials of that road, the demand for cars seems unquenchable. The Pennsylvania is spending enormous sums to provide equipment and to keep the present equipment in good repair, yet new cars and those from the company's own shops are swallowed up at once.

It is significant to learn what the Pennsylvania is doing to provide the possibility of a car shortage in its lines when the heaviest fall traffic is offered for movement.

In 1910 the total freight car equipment of all the railroads in the United States was 2,297,020 cars. Of these, the Pennsylvania System East and West of Pittsburgh and Erie held by ownership of about 250,000—more than 11 per cent of the total.

The entire railroad freight car equipment of the United States increased 888,445 cars from 1901 to 1910, inclusive. Of this increase the Pennsylvania System supplied more than 8 per cent.

It is thus seen that the Company provides more than 11 per cent of the freight equipment, and in the past ten years has provided over 8 per cent of the increase in the number of cars.

No longer has the Pennsylvania Railroad been to anticipate the demands of its traffic that since January 1, 1912 it has ordered 12,817 cars to be delivered as soon as they can be turned out of the shops.

To insure shippers on its lines adequate equipment for handling business, the company is waging an active campaign to get the greatest possible service out of each of the 263,300 freight cars owned by the System.

One of the Pennsylvania's precautions against car shortage is to prevent, as much as possible, the holding of loaded cars at sea ports. The moment notice is received of an accumulation of cars loaded with freight for export, quick steps are taken to have cars released at the earliest possible time. This is only one of the expedients employed by the Pennsylvania Railroad; in cases where loaded cars accumulate because of free storage time in warehouses, new rules are made to keep traffic moving through the warehouses, thereby permitting the prompt unloading of cars.

In addition to requesting shippers to load and unload cars promptly, and to load them to capacity, the railroad has announced that unusual efforts were being made to reduce the amount of equipment awaiting repairs and to complete unfinished work on new cars and locomotives.

There are at present approximately 27,000 employees engaged on the rush order to put all cars and locomotives in A-1 shape, and to get them out on the road so that patrons can have the ad-

Standard Bell Equipment

All the Bell instruments, all the Bell lines and all the Bell equipment are tested, tried and standardized—the same here, in Philadelphia, San Francisco and Everywhere. This assures the best transmission and keeps the service always up to the highest standard.

The Bell standard telephone equipment is the best known today and it is used the world over by people who demand quality.

Of the \$58,000,000 that will be spent by the Bell System for new construction and equipment during the present year, over \$2,800,000 will go for enlargements and improvements of the Bell plant in our own and adjacent cities—all within a radius of eighty miles of Philadelphia.

We can point with pride to our fine telephone plant in this vicinity and in all the surrounding sections of the country—each locality with standardized equipment sufficient to handle any emergency and to take care of prospective growth within the next few years, and additions and improvements are constantly being made to maintain the high Bell standard. That we are aiming still higher is evidenced by the unusual further investment made during 1912.

Here is evidence that the Bell System's policy is one of continuous improvement and expansion.

Does it not follow that the Bell must give standard service?

Absent Ones

Absence makes the heart grow fonder but the memory of the absent one becomes vague and dim. You long to picture in your mind just how "HE" or "SHE" would look, but there's a mysterious something which makes the mental picture impossible.

But if you had a photograph before you, then you could recall the forgotten face, yes, even the kind acts, the gentle words.

Wouldn't that "ONE" so far away appreciate your photograph too?

CECIL COUNTY LETTER

Edward W. Taylor, the well-known liveryman of Elkton, is recovering from his recent illness, due to complications following an attack of appendicitis.

Dr. Daniel Bratton, a popular young dentist of Elkton, has been troubled with hemorrhages of the lungs of late, and has ceased practicing pending his recovery.

Young men of Elkton announce a masquerade dance, in Mechanics Hall on Halloween, with music by Jacob's Orchestra.

Mr. and Mrs. Joshua R. Witworth will receive their friends at their home on West High street, Elkton, on Friday evening, October 25th.

Mr. Frank Shiverg, of Elkton, and Miss Florence A. Spence, of Childs, were married on Wednesday evening, at Trinity Rectory, Elkton, by Rev. William Schouler.

Mr. Harold C. Souder, of Wilmington, and Miss Esther Banks, daughter of the late County Treasurer John Banks, were married on Wednesday evening, at the home of the bride's mother in Chesapeake City, by Rev. William Schouler, of Elkton. The ceremony was witnessed by a large number of guests and the couple received an array of elegant and useful gifts.

They will be at home at The Adams, Wilmington, after November 25th.

An event of interest to Catholic congregations of Cecil and New Castle counties will be the dedication of the new St. Francis Xavier Church, near Warwick, built in place of the historic church erected by Jesuits in Colonial times and burned on last New Year's Day.

The funeral of Mrs. Elizabeth Watson, widow of Amos Watson, was held from the home of Joseph Watson, in Lewisville, last Tuesday, with interment in St. John's Cemetery. Mrs. Watson, who was 77 years of age, died on the previous Saturday, of general debility. She was a sister of Jordan Wright, of the Fair Hill section.

John R. Hogg, a well-known resident of Elkton, who for many years operated a farm near Glasgow, died on Thursday morning at his home at Bow and High streets, of a complication of diseases, aged 72 years. A sister, Miss Emma Hogg, survives him. His funeral was held on Monday with interment in Elkton Cemetery.

Miss Agnes Smith, daughter of Thomas Smith, died at her parents' home at Singery, on October 14th, of paralysis of the brain, aged 20 years.

Sheriff J. W. Perkins has purchased from the Messrs. Deibert a portion of the base ball grounds, opposite the Elkton railroad station, as a site for a factory to be erected by a company headed by himself.

Centerville, Md., M. E. Congregation has tendered its church for the next annual session of the Wilmington Conference.

The Cecil Farmers' Club held its October meeting on Wednesday at the home of Joseph F. Grove, near Calvert, where the members and other guests were hospitably entertained.

Revel services in progress in St. John's M. E. Church, Lewisville, will continue throughout the month.

A notable record for peeling tomatoes was made by a Polish girl at W. T. Fryer's cannery at Colona, this county, this season. She peeled often as many as 100 buckets a day, at five cents per bucket, and earned \$135 at this work.

Mrs. J. Harvey Graves and Mrs. Thomas W. Williams represented Elkton Chapter at the annual convention of the Epworth League, of Wilmington district, held in the New Castle M. E. Church on Thursday and Friday.

Charged with breaking into several freight cars at Perryville, George Jennings, John Thomas, George Burke and Thomas Gallagher, all of Trenton, N. J., were given a hearing at Elkton jail on Thursday. They were acquitted of the charge but were adjudged guilty of trespassing on the property of the P. B. & W. R. R. and were given six months each in the House of Correction. J. W. Keys and Peter McKean were also lodged in jail, charged with illegal riding on freight trains.

The Democratic mass meeting held in Elkton Opera House on Friday evening was largely attended. Former Congressman James H. Higgins, of Rhode Island, and Congressman Covington, of Easton, gave forcible addresses, chiefly on the "trusts" and the tariff.

Progressives announced a rally in Port Deposit for last evening, with N. Winslow Williams, Secretary of State under Governor Crothers, a converted "Christian Soldier," and J. Booker Clift, a Republican member of the last legislature, as speakers. But one "Bull Moose" announced his party preference at the recent registration in the county, but others are to be found here and there, it is reported, and will show up to be counted on Election Day.

Charles Wilson, colored, is lodged in Elkton jail charged with breaking into and robbing the store of R. H. Duhamel at Earleville. Thieves also broke open and robbed the store of E. T. Doreus in Port Deposit, one night last week.

Tome and Laurenceville Schools' elevens lined up on the former's gridiron on Saturday, and in an interesting contest the later won by a score of 6 to 0.

North East High School on Saturday, defeated the Chelsea School team, of Wilmington, by a score of 13 to 0.

The results of the October registration of voters in the county show that 391 names were added to the lists and 391 erased, leaving a net loss of 70 in the total list. For the Third district 79 were added, 138 erased in both precincts. Net loss, 59. For the Fourth district 10 names were added and 23 erased. Net loss, 13.

Frederick T. Haines, of Elkton, has been appointed by the Court of Appeals a member of a State Board of Law Examiners (for admission to the bar) vice the late John Wirt Randall, of Annapolis.

The newly organized Elkton Banking and Trust Company has purchased, in addition to the Metcalfe or Dregman office building on North street, the adjoining one occupied by Joshua Clayton, Esq., who will remove to the room in the Gilpin Building, next door to the Post Office. The two office buildings will be razed, and on their sites a home for the new financial concern will shortly be erected, as it is proposed to begin business by the beginning of the New Year.

A team driven by a son of P. D. Clark, the miller of Covantown, and an automobile owned and driven by a Mr. Kirk of Rising Sun, collided on the public road, at Marley Paper Mills, near Childs, on Saturday night. The wind shield of the car was broken, and the machine was otherwise damaged. The Clark horse was somewhat injured and was treated by Dr. Lowery of Elkton. The number of the car was noted, and the owner was found by reference to the list of State licenses.

Thrown off his bicycle while attempting to avoid striking another boy, when rounding the Howard House corner, one evening last week, Walter Dubose, an Elkton lad, step-son of the late Dr. George E. Morrow, was severely jarred and broke a small bone in his wrist.

"That fellow's no good!" And you pass him by.

And you do not hear how he heaves a sigh.

And you do not give him a second thought.

You do not know what a fight he's fought.

You do not know how he yet may rise, To the chance that before him—a failure—lies.

"That fellow's no good!" And you pass along

With a careless laugh and a whistled song:

But maybe the mire of his days will blow Away in dust, that the good will glow

From his heart at last, and he'll take his chance

When the soul awakes and he hears "Advance!"

A Football Hero

The train had run off the track and plunged down a steep embankment. Engine, baggage-car, coaches and sleepers were piled in terrible confusion. Jones, the world-renowned half-back, lying at the bottom of the wreck, came partially to his senses.

Three passenger-coaches were piled on top of him. A piece of pipe was coiled about his neck. The rim of one of the great driving-wheels of the engine rested on his face. His legs were pinned down by a heavy beam. A pillow had been forced against his mouth and nose, making it impossible for him to breathe.

His arm was pressed against his sides, and he tried in vain to move. But willing hands were at work upon the wreck, and at last Jones, the world-renowned half-back, was dragged out. Looking round in a dazed sort of way at his rescuers, he asked, "How many yards did we gain on that 'down,' boys?"

Rummage Sale and Bake

The ladies of the M. E. Church will hold a rummage sale and bake in the Pemberton store-room on Main street, October 31st and November 1st and 2nd. The sale will be open Thursday and Friday afternoons and evenings. Saturday afternoon and evening the bake will be held. Persons having contributions of articles will kindly inform the pastor or some member of the committee.

Vacation in Adirondacks

Richard Whittingham is spending a couple of weeks deer-hunting in the Adirondacks. Mr. Whittingham is the guest of Mrs. Murray Gibson of Philadelphia, at Camp Kokowa Oojinagwa, a Delaware Indian word, meaning "Owl's Nest." His return will be by way of Newton and Boston where he will visit the manufacturing plant of the Stanley Steamer cars. Mr. Whittingham is agent for this company on the Delaware, Maryland and Virginia Peninsula.

Don't forget to attend the Republican mass meeting next Tuesday.

Charles R. Miller, Republican candidate for Governor, Hon. Ruby Vale, of Milford, perhaps the greatest political orator of the state will address the meeting.

It requires nerve for the ordinary citizen to take the lead in a sewer question movement in Newark, but it is a solemn duty for the local Board of Health to bring this question to an immediate issue. To neglect it is to be morally derelict of the duty of their office.

REPUBLICAN MASS MEETING

NEWARK OPERA HOUSE

Tuesday Evening, October 29th, at 8 o'clock

HON. CHARLES R. MILLER, Republican Nominee for Governor

HON. RUBY VALE, of Milford, and Other Prominent Speakers
Will Address the Meeting

THE PUBLIC IS INVITED TO ATTEND

By order of

WHITE CLAY CREEK HUNDRED REPUBLICANS

A Personal Invitation

We desire to make this a PERSONAL INVITATION to you to come and inspect our line of Men's and Boys' Clothing, Furnishings, &c., for fall and winter wear.

Consider it a PERSONAL invitation quite as much as if we were taking you by the hand and talking face to face.

Our line of fall and winter goods is very complete, and very attractive. Measured by stocks as offered in other large stores we believe you will be able to make comparisons in our favor.

Not alone is the assortment large, but every garment has been selected with the utmost care, and with due regard to the desire of the man who likes to dress well at a moderate cost.

We are showing a splendid line of Suits and Overcoats for boys—the kind that will please the boys as well as the parents.

Come and see us.

CONSTITUTIONAL AMENDMENTS

Constitutional Amendment.

An Act proposing certain amendments to Article IV of the Constitution of this State, relating to the number of Judges constituting a quorum in the Superior Court, the Court of General Sessions, and the Court of Over and Terminer, the sessions of said courts, and the distribution of the business therein, respectively.

Be it enacted by the Senate and House of Representatives of the State of Delaware, in General Assembly met, two-thirds of all the members elected to each House agreeing thereon:

Section 1. That Section 5 of Article IV of the Constitution of this State be, and the same be, amended by striking out all of said section, and substituting therefor the following new paragraph, to-wit:

The said five Judges shall divide equally among the several Counties. No more than three of them shall sit together at any of said courts, except each of the said Courts the Chief Justice, who shall preside, and in his absence the senior Associate Justice shall preside.

One shall constitute a quorum in the said Court, respectively, except in the Court of Over and Terminer, where three shall constitute a quorum, and except in the Court of General Sessions sitting in try cases of prosecution under Section 5 of Article V of this Constitution or sitting to hear contested applications for license, and intoxicating liquors, when two shall constitute a quorum.

One judge may open and adjourn any of said Courts.

Section 2. That Article IV of the Constitution of the State be, and the same be, amended by striking out all of Section 5 thereof and substituting therefor the following new section, to-wit:

Section 5. Subject to the provisions of Section 3 of this Article, two or more sessions of the Superior Court, or Court of General Sessions, or one or more sessions of each of the said Courts, or one Session of the Court of Over and Terminer, and one or two of either, or any of said Courts, or other of the said Courts may at the same time be held in the same county or in different counties, and the business in the several counties may be distributed and apportioned in such manner as shall be provided by the rules of the said courts, respectively.

D. W. CAMPBELL,
Speaker of the House.
JNO. M. MENDINALL,
President of the Senate.

Approved March Twentieth Nineteen Hundred and Eleven.

SIMON S. PENNIPACK.

I, Charles S. Richards, Secretary of State of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of the bill No. 12, entitled "An Act to amend certain amendments to Article IV of the Constitution of this State, relating to the number of Judges constituting a quorum in the Superior Court, the Court of General Sessions, and the Court of Over and Terminer, the sessions of said courts, and the distribution of the business therein, respectively," as the same appears on the original bill filed in the office of the Secretary of State, and approved by the Governor, May eighth, A. D. 1911, which said bill proposing an Amendment to the Constitution of the State is published in accordance with the provisions of the Constitution of the State.

IN TESTIMONY WHEREOF, I have hereunto set my hand and official seal at Dover, this twenty-third day of July, in the year of our Lord one thousand nine hundred and twelve.

CHARLES S. RICHARDS,

I, Charles S. Richards, Secretary of State of the State of Delaware, do hereby certify that the above and foregoing is a true and correct copy of the bill No. 12, entitled "An Act to amend certain amendments to Article IV of the Constitution of this State, relating to the number of Judges constituting a quorum in the Superior Court, the Court of General Sessions, and the Court of Over and Terminer, the sessions of said courts, and the distribution of the business therein, respectively," as the same appears on the original bill filed in the office of the Secretary of State, and approved by the Governor, May eighth, A. D. 1911, which said bill proposing an Amendment to the Constitution of the State is published in accordance with the provisions of the Constitution of the State.
