Prefatory Note

This is the fourth annual issue of Delaware Notes. It is counted as of 1926, but its publication has been delayed by conditions over which the editor had no control.

The present issue of Delaware Notes is made up of articles of scientific interest, thus carrying out our present plan of grouping in each issue contributions of similar interest. The interest in the volumes already issued has been favorable and these editions are all but exhausted. We may believe therefore that this venture in publication is fulfilling the purpose intended by those interested in it.

EZRA B. CROOKS,
Editor.

University of Delaware,
Newark, Delaware.
January, 1927.
