VOLUME IX

NEWARK POST, NEWARK, DEL., OCTOBER 16, 1918

NUMBER 37

Loan Returns Encouraging

Bank Receipts Show Two Hundred Forty Eight Thousand

Hundred Must Raise \$30,000 in Three Days

Liberty Loan reports of the last week show splendid progress in this locality. Without parade or mass meeting the figures on the bulletin board advance steadily, filling with optimism the hearts of local committeemen. Not yet, however, is the town over the top, and workers and citizens alike are urged to put forth their greatest efforts in the remaining three days of the campaign. Up to noon today \$248,200 had been subscribed at the two Newark banks. Of this amount \$89,600 had been reported by the Men's and \$90,000 by the Women's Committee. It is estimated that \$10,000 of this amount comes from depositors in Mill Creek and Pencader Hundreds.

With a quota of \$269,000 White Clay has approximately \$30,000 to go. The hundred, the committees report, has been thoroughly canvassed. Who will be the first man to raise his loan?

Trustee of Delaware College Meets Accidental Death

Colonel Lewis W. Mustard at one time a student at Delaware College and a trustee of that institution for 18 years, died at his home in Lewes, as the result of a pistol shot received accidentally while handling the weapon.

Colonel Mustard was one of the wealthiest men in Sussex County, a public spirited citizen interested intensively in local and state affairs. He was a member of the staff of the late Governor Ebe W. Tunnell who was his uncle.

He is survived by his wife and three children—Marion, wife of Geo. Messersmith formerly principal of the Newark public schools, now consul at Curacao, West Indies; Helene, wife of Caleb S. Layton, a well known Wilmington attorney; and Lewis W. Mustard, Jr. who is with the Ambulance Corps in France.

WAR-RELIC TRAIN VISITS NEWARK

Trophies Viewed by Citizens and Soldiers

The war-relic train which was scheduled to stop for an hour at Newark Centre Station last week but which was recalled because of the "flu" epidemic arrived this morning at 8.15 and remained for more than an hour. Hundreds of citizens of Newark and vicinity visited the cars, viewed the war relics and heard the speeches of civilians and soldiers in the interest of the Fourth Liberty Loan. The soldiers of the Training Detachment marched to and from the train in a body. Guards were on hand to keep the sightseers moving so that at no time was there any considerable number together in one place.

James B. Borden, a civilian, explained briefly the purpose of the tour which this train is making through the State today and tomorrow and introduced the speakers, an American who had seen service with the Canadian Army previous to America's entrance into the war; a Frenchman and one of Pershing's boys both of whom have seen service in the trenches. All told thrilling and amusing stories of trench life and touched lightly on German atrocities and reprisals exacted of American prisoners of war.

The war relics excited much curiosity. Many of these it was explained were captured by American soldiers. German trench guns, "Minnenweffers," Boche rifles with bayonets, Austrian anti-aircraft guns, huge German 77's and many other implements used in trench warfare.

A Late October Wedding

Mrs. Harry Miller Campbell has issued invitations to the wedding of her daughter Marion Staton to Clarence Edward Keyes of Farmington. The wedding will take place on Saturday, October 26, at one o'clock in the First Presbyterian Church.

Miss Campbell is a graduate of the Women's College of Delaware, Class of 1918, and a popular member of the younger set in Newark.

Mr. Keyes is a graduate of Delaware College and was for several years coach for the track work at the college, and is at present manager of the Pom Ova farm near Farmington.

Championship Trophy on Exhibition

The championship trophy of the Maryland-Delaware baseball league, won by Rising Sun with a record of 11 games won and 4 lost, has been placed on exhibition in the window of Rising Sun Pharmacy. The trophy is a handsome silver loving cup from the Reach sporting goods house, engraved with "Championship Trophy, Season of 1918, Maryland-Delaware League. Won by Rising Sun."

Mrs. Taylor meets with Painful Accident

Mrs. William Taylor met with a distressing accident on Monday when in reaching up to a high shelf she dislodged a flat iron which in falling struck her on the head rendering her unconscious and inflicting a deep gash. She called to her neighbors for help as soon as consciousness returned. They administered first aid and summoned Doctor Aronowitz who made the patient as comfortable as possible. At last accounts Mrs. Taylor was making very satisfactory progress toward recovery.

Delaware Boys at Camp Grant

Lieutenant Draper Smith, Alfred Mackie and Henry Marston former Delaware College men, are in the same company, the 27th, 161st Depot Brigade, at Camp Grant, Illinois. In messages received by friends here recently the boys tell interesting incidents of their busy camp life. They state that in Camp Grant, as elsewhere, there are many kinds and conditions of men from all walks of life all working for one purpose—to fight for Uncle Sam.

HOSPITAL FEES NOW DUE

Subscribers Urged to Forward Contributions

Owing to the influenza epidemic which makes it difficult to find solicitors there will be no house to house canvass for funds for the Newark Branch of the Woman's Auxiliary to the Delaware Hospital, this year as formerly. All funds, however, are requested by October 25th, and regular subscribers are urged to forward their contributions at once to Mrs. Alfred A. Curtis, Treasurer.

WILL MAKE EXTENSIVE SURVEYS

State Council Employs Expert

With the view to making extensive reforms in the State, the State Council of Defense has employed the New York Bureau of Municipal Research to make various surveys. The surveys will include a survey of the State, of each county and of Wilmington, and of the State, county and city administrations, agricultural and accounting work, public roads, public health, charitable institutions, almshouses and prisons.

The surveys, which will be embodied in a war program, are considered by the State Council of Defense as highly desirable. The expert inventory and their recommendations will be submitted to Governor Townsend and the State Council of Defense on December 15 and transmitted to the General Assembly in January.

The bureau has made surveys in New York, Massachusetts, Minnesota, Iowa, Oregon, Richmond, Va.; Columbus, O.; Indianapolis, Ind.; Montreal, Canada; and other states and cities, in most of which places efficiency and economy have resulted from the recommendations.

Delaware Troops at the Front

The Delaware troops are on the front lines of the French front and have been actively participating in the recent battles in which the Allied forces have been driving the Germans back to their own territory, it was disclosed on Saturday by General Peyton March, Chief of Staff United States Army.

General March, in reply to an inquiry by the Washington correspondent of the Wilmington Evening Star, stated that the Seventy-eighth Division, in which there are some Delaware troops, recently was reported in the front line, the exact location not being shown. But as that division is in the First Army Corps, it is probably in the Woivre sector, he said.

The Twenty-ninth Division, also containing some Delaware troops, is in the front line in the Vosges sector, General March stated. (Continued on Page 5)

Busy Days On The Farm

Prices Prevailing in Local Markets

War Gardens Figure In Situation

The high mark for corn cutting was reached this fall when workers demand at the rate of \$6 to \$8 a day. Many farmers believe that the husking problem will be even more serious because of the pose themselves even after the "Flu" scare has subsided.

The tomato season is nearly over. The P. J. Ritter Company have been receiving only 600 to 600 baskets daily for the past week and the quality has become so poor that they decided to receive no more after yesterday. Few farmers can spare the time now for picking what few tomatoes ripen, for the fall plowing occupies all of their time just now.

Green tomatoes for pickling and preserving are in great demand and meet a ready sale at 30c to 40c a basket. Many housewives ask farmers to bring them tomato vines containing as many green tomatoes as possible. These are hung in a cool, dry dark place where the ripening goes on slowly so that at Thanksgiving time ripe tomatoes of fairly good flavor are on hand for salads, or for other uses. When ripening is retarded, the admittance of some light will hasten the process.

Owing to the poor condition of silo corn due to drought it was necessary in some places to make up the shortage from the regular crops. Earlier in the fall it was feared that the crop would be short but close observation during corn cutting time shows a better yield than was at first predicted.

Apples are plentiful in the local market and are selling for \$1.25 to \$1.50 per basket. Grimes Golden, Ben Davis and Stayman's Winesap are most in demand.

War gardens in Newark and vicinity are now producing well filled lima beans, belated somewhat because of dry weather during the growing period; late corn, cabbage, egg plants, beets, yellow beans and late potatoes. In the southern section of the town are a number of well kept gardens that are supplying the owners with an abundance of vegetables. Those of Dean E. L. Smith, Dr. E. V. Vaughn, Gilbert Chambers, Frank Moore, James Doyle, Women's College and the Garden Club are in fine condition now and will continue to produce for some weeks.

The early and the medium early potato crops have been harvested and show a decided decrease in comparison with last year's yield. Late potatoes, however, escaped the drought and will undoubtedly produce a greater yield.

Farmers in this section and throughout the state according to a statement issued recently by M. (Continued on Page 5)

DRAFTEES ASSIGNED TO FORT DuPONT

Thirty Local Men Leave October 21st

The following young men will be sent by the Local Board to Fort DuPont on Monday, October 21, on a train leaving Newark at 12.11:

Class of 1917
Angelo Imperiale, Henry Clay.
James B. Clark, Boothwyn, Pa.
William C. Pryor, Clayton.
Claude R. Voshell, Summit Bridge.
William G. Moore, Magnolia.
George Wadsley, New Castle.
Caecil Ferguson, Newark.
William P. Gregg, Newark.
Warren E. Collins, Hockessin.
Charles Hickman, Port Penn.
John L. Cannon, Newport.
Thos. M. Whiteman, Delaware City.

Class of 1918
Alfred Blanchfield, Smyrna.
William Hanf, New Castle.
Henry E. Kirk, Middletown.
Clarence H. Wilson, Newark.
Charles C. Chalmers, Newark.
Harry B. Williams, Marshallton.
Frederick Zimmerman, Townsend.
Harry Nickerson, Barclay, Md.
Walter P. Crouch, Newark (Alternate).
Alfred C. Dennis, Brandywine Springs (Alternate).
Ralph J. Crouch, Marshallton.
Ralph Ruth, Newport (Alternate).
Leroy E. Mahle, Middletown.
Earl Pleasant, R. D. No. 3, Townsend.
Edward H. Naylor, New Castle.
Clifford L. Pyle, Middletown.
Levin Irving Hutchinson, R. D. No. 3, Smyrna.

Great Council Meeting Postponed

Thomas A. McMullin, who was recently chosen Representative from Minnehaha Tribe, No. 23, I. O. R. M., to the Great Council scheduled to be held at Milford on August 23 and 24, has received the following message from Alexander C. Rogers, Great Sachem of the Red Men.

Owing to the severe epidemic of influenza the meeting of the Great Council of Delaware will be indefinitely postponed, and you will be advised later when and where it will be held. Notify your Representatives and Past Sachems to this effect as quickly as possible and have town papers notified so they can publish same.

"All great chiefs to hold office until their successors are elected and raised. Deputies and various committees to remain as at present and until further determined."

Supper Date Changed

The supper announced by the ladies of the Presbyterian Church to be given on November 7th, has been postponed owing to health conditions until Thursday, December 5, when it will be held in the New Century Club rooms.

Doctors Win Influenza Fight

Number of New Cases Decreasing Daily

Local Pharmacy Keeps Pace with Demand For Drugs

The influenza epidemic has reached the apex and is now on the decline. Such is the belief of those in close touch with the situation in Newark and vicinity. The doctors, druggists and volunteer nurses have put up a brave untiring fight and feel that now victory is theirs, for each doctor reports few new cases and the other patients with very few exceptions recovering satisfactorily. Dr. George W. Rhodes stated last night that business yesterday was more nearly normal than it has been for three weeks and that purchases of quinine, aspirin and other essential drugs and patent medicines used in fighting the epidemic, became fewer and fewer each day.

Lieutenant Aronowitz and Dr. Samuel C. Mitchell both stated that the "flu" had been practically banished from the Training Camp, only two or three patients remaining in the Infirmary and none in Harter Hall. No new cases have developed among the soldiers for over a week. Concerning the townspeople whom Lieutenant Aronowitz has been attending in an effort to relieve the over-burdened Newark physicians, he stated that only 3 or 4 cases had developed in the last week and those were among families who lived under crowded conditions and had already several cases previously developed.

The two cases remaining at Harter Hall were removed yesterday, Mr. Sperry to his home at Cooch's bridge, and Samuel Ellis to Wilmington. The patriotic townswomen who acted as volunteer nurses there for the last two weeks are now giving assistance in the homes of those afflicted. Dr. Walter Steel who has resumed his practice after a serious illness, reports only 3 new cases this week. Dr. Charles H. Blake and Dr. H. G. M. Kollock give encouraging reports. Only 3 or 4 new cases have been reported for the last few days by each physician, against 20 to 30 cases in a corresponding period last week.

Doctor Herbert Watson is convinced that the situation is much better and considers the death rate exceedingly low in comparison with the number of cases in the town. Little or no difficulty has been experienced by physicians or others in obtaining essential drugs, although the orders per person were several times limited for a few hours so that each customer might be served. In order to replenish his drug supply, Dr. Rhodes made daily trips to Wilmington for the past ten days.

Local undertakers have not been handicapped seriously in the matter of securing caskets nor have the unfortunate families experienced much difficulty in securing the services of an undertaker. Mr. E. C. Wilson and R. T. Jones with the help of Sergeant Barcus have handled the unusual situation with great efficiency.

Surgeon-general Blue warns communities that have apparently passed the crisis, against over-confidence and relaxation in the matter of health precautions. This warning cannot be urged too strongly.

OBITUARY

Mrs. Mae L. Cooper

Mrs. Mae L. Cooper, wife of Thomas C. Cooper and daughter of Squire L. W. Lovett, died at her home in Wilmington on Sunday, October 13, of influenza-pneumonia. The funeral will take place from her late residence, 423 West 26th Street, Wilmington, on Thursday, October 17. Services will be held at the house at 10 a. m., and interment at Riverview Cemetery.

BOYS' WORKING RESERVE ADDS TO FOOD SUPPLY

RECEIVES COMMENDATORY MESSAGE FROM PERSHING

The Call
"I call upon the able boys of the land to turn in hosts to the farms and make certain that no pains and no labor are lacking in this great matter."

Woodrow Wilson,
President of the United States.

"The greatest service that boys can perform in this war is the work in the fields to produce more food for the fighting forces."

Herbert Hoover,
Administrator,
United States Food

"One of the great benefits you confer is that of making the boy realize he is part of Uncle Sam's team; that he is doing his share in this great war; that he holds his service in trust for the nation."
Theodore Roosevelt.

The Answer

Approximately a quarter of a million American boys between the ages of 16 and 21 enrolled in the United States Boys' Working Reserve, a branch of the U. S. Employment Service, Department of Labor in 1918.

Many of these boys received a course of intensive agricultural training at training camps before being sent to farms. Others went direct to the fields, taking the places of men called the colors or into war industries.

It has been estimated that the work of members of the United States Boys' Working Reserve in 1918 added enough to the world's food supply to feed one million.

In Appreciation

"The achievements of the Boys' Working Reserve during the past year are beyond praise. The American Expeditionary Forces thank one and all for the support which you are giving us."

J. J. Pershing,
General Commanding,
A. E. F.

"The Department of Labor has reason to congratulate its Field Organization upon the achievement of the Boys' Working Reserve. I look forward with confidence to a still more wonderful record by the United States Boys' Working Reserve in 1919."

Wm. B. Wilson,
Secretary of Labor.

These boys have, as noted above, done an excellent work and will soon be wearing an official United States uniform. Secretary of Labor Wilson has authorized and the War Department has approved an olive drab uniform which may be worn by all members of the United States Boys' Working Reserve. Already there are many units of the Boys' Working Reserve throughout the country which have been awaiting the announcement of the official dress of the organization and many more units which will be organized as a result of the proposed expansion of the Reserve under the co-operation of the War Department will at once discard "mud" for the natty olive drab of the Reserve uniform.

FARM WOMEN KEEP HOME EXPENSE ACCOUNT

Simple Bookkeeping Essential to Economy

The modern farmer's wife is no longer satisfied with the old accepted idea that "The farm gives us a living," but she gets out her pencil and paper and asks, "How much of a living does it give us?" Generations ago neither the farm nor the farm household had any but minor dealings with the outside world. Under such conditions the need for accounts was slight. But those conditions no longer exist. The farm household, though still in many cases receiving its major support in farm products consumed at home, purchases far more extensively than ever before from outside sources. Farm household accounts have become essential to economy.

Household expenses on the farm are very intimately associated with the business of the farm itself. The farm normally supplies much material which otherwise would become a household expense. The household, in turn, very often furnishes board for farm labor, which otherwise would be a farm expense. Merely from the standpoint of keeping track of household expenses as related to the farm business, household accounts are desirable and should serve to supplement and round out farm accounts.

Simple Way of Keeping Records

The best way is to classify the purchases or money paid out when the record is made. Under this method, in addition to being entered all together in one column, the items are classified in separate columns. This method has the advantage of allowing for the distribution of the items of expenditure to the proper classes without the inconvenience of turning to some other page. The distribution may be left to moments of leisure if the farmer is busy at the time the entry is made. When the page is filled the next page is begun, the top line next to the heading being reserved for the total carried forward from preceding page. The items may be totaled at the end of the month and these totals carried to the summary page at the end of the book.

In order to simplify accounts it is well to group expenditures. If all individual items were listed in separate columns, it would require a great amount of detail work. The distribution of the different household expenditures into groups is largely a matter of individual viewpoints. The following 10 divisions should be satisfactory for the average farm family: Animal food, fruits and vegetables, cereal products, other groceries, clothing, household furnishings, running expenses, advancement, incidentals, and savings.

Mrs. C. P. Dickey, of Stanton, a member of the Executive Committee of the New Castle Farm Bureau, is in charge of the Home Record work for the county, and is prepared to supply record books for those who desire to place their housekeeping on a business basis. They may be obtained upon request from Mrs. Dickey, or from Helen L. Comstock, Home Demonstration Agent, Newark.

Bulletins Helpful to Housewife

The following leaflets and bulletins may be obtained by writing the Home Demonstration Agent, Farm Bureau Office, Newark, Delaware:

More Movies to Aid Food Drive

Plans of film production by the motion picture laboratory of the department call for an output of about 1,000 feet of negative each week during the next six months. The larger production is intended to help in the national campaign for more food production, plans for extensive distribution of the films, especially through the aid of the state colleges of agriculture, are being made. The themes to be treated in the films are of wide range, including, among others, the work of the department entomologists in fighting the "cutworm," and the production of wheat in the Northwest, but all having a relation to the activities of the Department of Agriculture and allied forces in helping to win the war.

Department of Agriculture motion pictures had part in the motion picture exposition held October 5 to 13 in Madison Square Garden, New York. The department exhibits included colored bromide enlargements of "stills" taken from agricultural films; charts showing films already on hand and those in preparation; and a map showing the proposed plan of distribution through State colleges and forest supervisors.

HOT DISH FOR THE SCHOOL LUNCH

Advocated as Health Conservation

Is your child doing as good work in school as you wish? Are the children in your district interested in their school work?

It has been found by investigation in many cities, that children

are able to do better school work, will remain in school for a longer period of time, when provided with a hot lunch than when the ordinary cold lunch is eaten. The rural schools in Delaware may with very little expense and labor provide for the children of that school one hot dish to supplement the cold lunch brought from home.

Our Government is urging that we do everything possible to conserve the health of our children. This is one very important method.

Any teacher or parent, who is interested and desires information as to cost, methods or dishes to be served, may secure same by writing to Miss Gertrude L. Blodgett, State Leader, Home Demonstration Work, Newark, Delaware.

American Soldiers Kind to French Kiddies

The French kiddies love the American Doughboys, and the American Doughboys are never tired of showing their friendship and sympathy for these little children of France. The thing that particularly appeals to the American soldiers is the fact that so many are fatherless and that time and time again they have been compelled to leave their homes and become fugitives before the Hun advances. But invariably when the reaction comes and the Boches retire the children in some mysterious way reappear. Nothing apparently frightens them. The progress of the American legions to the front excites their admiration, and they have a feeling of adoration for the big, strapping boys from the sister Republic across the sea, who never hesitate to share their "chow" with their little French friends.

A Thrift Center in Every Town

Massachusetts has a county that can boast of a thrift center in each town in it. Sometimes these centers are in homes while in other localities they are located in shops, as neighborhood conditions indicate. Each center is used as a point from which to distribute literature, to organize the work so members of the community may meet, ask questions of the home-demonstration agent, or of other qualified, learn of the different ways in which the Government asks thrift to be observed, and to make community plans.

Community Pledges Wool Conservation

One whole community in Iowa has pledged during the remainder

of the war to conserve clothing in every possible way, especially wool, by not buying new coats, suits, sweaters, and dresses unless absolutely necessary. The home-demonstration agent who reports the fact to the United States Department of Agriculture and pointed out to the community the possibility of making the limited wool supply go as far as possible toward meeting war needs.

We have specialized on a process which makes a matter how old a tire we can make it practically like new but give you a new tread and a new life. We also specialize in vulcanizing old tires. Write for literature. EMPIRE DOUBLE TREAD CO., 823 Shipley St., Wilmington, Delaware.

Stop! Think twice!

BEFORE you lift the receiver of your telephone won't you stop and consider that an unnecessary message may use the equipment and operators' services which should be available, always, for important wartime messages?

Then, on second thought I know you will find that many of your messages are not altogether necessary.

Think aloud before you make a call; "Is it necessary?"

Conserve your telephone usage and know that by so doing you are aiding directly in winning the war. Telephone communication is vitally necessary to-day. Let the war industries have the wires, equipment and the operators' services for their important calls.

By so lessening the volumes of telephone calling, women at home may be of still further help in the war.

AMERICAN REDSKINS ON THE WAR PATH

Back up Uncle Sam in the War Program

The war attitude of the Indians at large has been a revelation of patriotism. The Indian insists that he is merely following his traditions—that from the old days back in 1809, when kindly Indians relieved the starving settlers at Jamestown, he has always been a friend of the white man whenever reasonably encouraged. Indians have helped the United States in every war it has fought. Since 1831 they have been accepted as volunteers in the army and have written a soldierly, honorable record.

But in this war the spirit and blood of the race seem to have risen in the hot compound of militant Americanism.

Last December there took place at Bullhead, a settlement in South Dakota, near the scene of Custer's last fight and of Sitting Bull's death, a ceremony full of significance for the whole race of red men—full of meaning, indeed, for all Americans. Seven young full-blooded braves were about to volunteer for the military service of the United States in our war against the Kaiser. Even their names were redolent of the wild—Eugene Younghawk, James Weaselbear, Samuel Bravecrow, James Villagecenter, John Ironthunder, Joseph Leaf and Thomas Pheasant.

Over in France not long ago John Peters, a Menominee Indian serving with Company A, First Engineers, died of wounds received in a fight with the Germans. Back home in Wisconsin, at the Keshem Indian School, the American flag flew at half-mast. Through Shawano County antique women of the victim's tribe revived the age-old custom of wailing for the dead, which lasts for days. In the case of John Peters it is worth remembering, for he was probably the first Indian to enlist in the army after war came and was undoubtedly among the first Americans to cross the ocean in transports.

Down at Camp Bowie, near Fort Worth, Texas, Captain Walter Veach commands Company wholly of Choctaws, all volunteers. Through this camp alone there are scattered more than a thousand Indians. In Nebraska the Winnebagoes formed a company early in the war. For the most part separate Indian units are frowned upon, as it is the wish of the government to merge the aborigines upon an equal footing with our white soldiers. But wherever Indian soldiers are found they are reported as earnest, efficient, silently observant and equal to the best. Above all, they are anxious to fight.

Out of a total population of 330,000 about half of whom are citizens, there are less than 33,000 male Indians of military age. Yet there are over 6,000 Indians in the United States army, 85 per cent of them volunteers, and several hundred more in the navy, every one a full citizen.

Fourteen tribes are represented in the service, and when young enough the chiefs themselves have enlisted. In rank our Indian soldiers scale down from major to private, and almost every branch has lured some Indians. One Indian helps run a flock of balloons,

and there are many in the Aviation Corps. Some have become proficient in wireless telegraphy, and there are others scattered through various technical divisions of the army. A large percentage of the civilized Indians have received military training at the government schools and so enter the army with a certain advantage over raw recruits.

There are about twenty-five big Indian schools. Every one of them is an automatic recruiting station.

None of the many races which mingle in the American melting pot have a better Liberty bond record than the Indians. They are not the wealthiest people of the world, but on the three loans they have managed to subscribe more than \$13,000,000—between \$30 and \$40 per capita.

Chicken May be Canned

Few people seem to realize that chicken can be preserved as easily as fruits and vegetables, and that it pays handsomely to put it up. In fact it will be a valuable asset in the pantry store closet when meat prices soar even higher next winter, as they are predicted to do. Nothing is more delicious served cold in the jelly which surrounds

it when the jar is opened, or in salad, creamed on toast, in a vol-au-vent with mushrooms, etc., or in a humble chicken pie. In fact, it can be served in endless ways, and is delicate and delightful to an invalid's palate, while the bouillon is most tempting and nourishing. The following recipe is taken from an experience of several years. The smaller breeds costing 28 to 32 cents and are better for canning purposes as they are not so fat as the larger fowl, costing forty cents, while at that price it would not pay to can at all. It is economy to can 2 or 3 chickens at one time, weighing 3 1/2 or 4 pounds. A little onion, soup celery, parsley and okra, give a touch of flavor to the chicken and to the bouillon which might be called a by-product of the canning operation.

The method is as follows:

Cut the fowl into sections, as for fricassee, and boil slowly in a large preserving kettle until tender and the meat is ready to fall off the bones. Boil with it the soup celery, one small onion and the okra, cut small, salt and pepper. While the fowl is boiling wash and sterilize the jars and have them ready in the kettle in which the processing is to be done, as they

must be very hot when the boiling soup is poured into them, otherwise they will crack. When thoroughly cooked drain the chickens from the preserving kettle and leave the soup on, simmering slowly. To this add all the bones and skin, and let reduce until rich. Then strain. In removing the meat from the bones leave it in as large pieces as possible and pack the jars with the breasts on the outside and fill in the center with the smaller pieces. Then pour in the chicken soup (which should jelly when cold) half seal, fill the remainder of the strained soup into the quart jars, put all the jars into the sterilizer, see that the tops are covered with water, and keep boiling for two hours. Remove one at a time, seal quickly and invert to cool, being careful to stand the jars out of a draught. The result well repays for the trouble. Those who have their own chickens will do well to weed out the poor layers at this time of year and can them, which is more worth while than feeding them at present high prices for the sake of a few more eggs before winter.

ROLL OF HONOR

NEWARK BOYS IN THE SERVICE OF UNCLE SAM

The following names have been forwarded to this office to be entered on the service roster of this community now being compiled by the Post. The list is known to be incomplete. Relatives and friends of the "boys" are urged to forward notice of inaccuracies, with names and addresses of omissions noted, to this office.—Editor.

THE STORE THAT SAVES YOU MONEY
SNELLENBURG'S
MARKET AND SEVENTH STS.

Store Opens 9.30 a.m. Closes 5.30 p.m. Saturdays 9.00 p.m.

Yes, sir! Buy a Bond and then take advantage of these big Snellenburg Specials

We have arranged quite a number of good, substantial specials for this week-end. Every one of them represents a money-saving opportunity. Be sure to get your share.

They're just running away with these \$2.50, \$3.00 and \$3.50 American silk Four-in-Hands at only

\$1.65 each. 2 for \$3.25.

Extra big shapes, slip easy bands.

And Say---You know how a Boy enjoys a Good Looking Overcoat

Well, we have arranged a most pleasing assortment of such Coats as are sure to appeal strongest to the average boy.

Military models, of course, predominate, yet there are many other styles for those who do not care for novelty effects.

\$6, \$7.50, \$8.50, \$10, \$12.50, \$15, \$18, \$20

How about some medium weight Union Suits? Here's where you can buy regular \$4.00 wool

Reis Union Suits

at **\$2.50 each**

Extra well made and ideal for such weather as we are now having.

Or, if you prefer

Shirts and Drawers

just get in on this: Regular \$1.75 heavy cotton ribbed Shirts and Drawers

at **\$1.00 a garment**

This, we believe, is the most wonderful value in the city. Your choice of pure white or ecru.

First Floor---Rear.

Here's One for the Working Man!

Talk about values---well, right here is where you get 'em and then some.

We have on hand about 300 pairs of high-grade

Regulation Army Shoes

Worth today at least \$6.50.

Your Choice at **\$5.75 a pair**

These shoes were bought by us for the cadets at Delaware College, but owing to the government taking over the school, they have been left on our hands. Therefore this sale. Every pair has been government inspected and guaranteed to be A No. 1. All sizes. First Floor---South.

Shirt Specials? Sure---Two of 'Em How's This?

A lot of regular \$2.00 and \$2.50 fine madras

Fall Shirts

at **\$1.65 each. Two for \$3.25**

If you need shirts get a few of these. All neck sizes and sleeve lengths.

But---Oh, Boy

More of those beautiful and rich looking

Silk Front Shirts

at **\$2.65 each**

You know the kind we sell, and these are brand new, just in.

Genuine Velour Hats

A new shipment just received, and really they are exceptional values at

Address all communications to THE NEWARK POST. Make all checks to THE NEWARK POST. Telephone, D. & A., 22 and 23.

We want and invite communications, but they must be signed by the writer's name—not for publication, but for information and protection.

Entered as second-class matter at Newark, Del., under act of March 3, 1879. The subscription price of this paper is \$1.50 per year in advance. Single copies 4 cents.

OCTOBER 16, 1918

CONSERVATION PLAN APPLIED TO WEEKLY NEWSPAPERS

War Industries Board Submits Regulations

Bernard M. Baruch, chairman of the War Industries Board, has announced that the plan for the conservation of news print paper had been extended to include country weeklies, and contemplates a saving of 15 per cent in the use of news print.

The official announcement reads in part:

"No publisher may continue subscriptions three months after expiration, unless subscriptions are renewed and paid for.

"No publisher may give free copies of his paper, except for actual service rendered; except to camp libraries and huts or canteens of organizations recognized by the government, such as the Red Cross, Y. M. C. A. or K. of C., except to the Library of Congress, and other libraries which will agree to bind for permanent keeping; except to government departmental libraries which use said publications in their work; and except for similar reasons.

"No publisher shall give free copies to advertisers, except not more than one copy for those who follow the custom of checking up.

"No publisher shall accept the return of unsold copies from news dealers.

"No publisher shall print extra copies for stimulating advertising or subscriptions, or for any use other than those specified in these regulations, except not to exceed 1 per cent of his circulation, with a minimum of ten copies.

"No publisher shall send free copies in exchange for other publications, except to such other publications as are printed within the county, or within a radius of forty miles from his point of publication.

"No publisher shall sell his publication at an exceedingly low or nominal subscription price.

"No publisher shall offer premiums with his publication unless a price is put upon the premium for sale, separately and the combined price is at least 75 per cent of the sum of the individual prices.

"No publisher shall issue holiday, industrial or other special editions.

Publishers of papers of more than eight pages in size will reduce the pages in excess of eight pages 25 per cent. This reduction shall be an average reduction over one month's period.

"No newspaper shall be established during the period of the war, except those for which arrangements had been made and plants purchased previous to the issuing of this order, or unless it can be shown that a new newspaper is an actual necessity.

"A sworn statement will be required from each publisher on November 1 as to how many of these rules have been put into effect by him, and what results in the matter of reducing consumption have been obtained."

OBITUARY

(Continued from Page 1)

Newark, died at her home on Main Street, on Friday, October 11, from pneumonia. Funeral services were held this afternoon at two o'clock. The interment in Head of Christiana Cemetery was private. A husband and three daughters, Mrs. Casper Becker, Mrs. Harry Chambers, and Mrs. Bernard Becker, survive.

Harry A. Sullivan

Harry A. Sullivan, aged 38 years, died at his home on Choate Street, on Thursday evening, October 10, of influenza-pneumonia. His funeral took place on Monday, October 14, with interment at the Catholic Cemetery.

Mr. Sullivan is survived by his wife who was Miss Clay, daughter of Mr. and Mrs. Jacob Clay of Elkton, and four children.

Richard Ellis

Richard Ellis, aged 18 years, son of the late Richard and Bessie Ellis, died at Harter Hall on Wed-

nesday, October 9, of influenza-pneumonia. Interment was made at Head of Christiana on Saturday, October 12. This is the third member of the Ellis family to succumb to this disease. The father and mother were among last week's victims.

Ezekiel Smith

Ezekiel Smith, a much respected colored preacher, for many years a resident of Newark and owner of the property chosen for the site of the Federal post office, died at his home in Coatesville on Wednesday, October 9th. The remains were brought to Newark for burial on Saturday, October 12, and interred in the cemetery for colored people.

Mrs. Lillie C. Ware

Mrs. Lillie C. Ware, a resident of Marshallton, died at her home there on Tuesday, October 8, of influenza-pneumonia. The funeral services were held at her late home on Saturday, October 12, and interment made at the Presbyterian Cemetery in Christiana.

Frank Sanborn

On Tuesday, October 8, Frank Sanborn, aged 4 months, died of influenza-pneumonia at the home of his parents. Interment was made at St. John's Cemetery on Thursday, October 10.

Louis Thomas

Louis Thomas, aged 36, died at his home here on Monday, October 14, of influenza-pneumonia. The funeral will take place from his late home on Friday morning at 10 o'clock with interment at Newark M. E. Cemetery.

Mr. Thomas leaves a wife and two children, a son and a daughter.

Helen M. Walls

Helen M. Walls, aged 30 years, died on Saturday, October 12, of influenza-pneumonia. The funeral will be held this (Wednesday) afternoon at 2 o'clock. Interment at Newark M. E. Cemetery.

Mrs. Walls leaves a husband and three children, the oldest of whom is critically ill with influenza.

James A. Lafferty

James A. Lafferty, only son of Charles H. Lafferty, who has maintained a summer home at Maplehurst, near Newark for many years, died at his home 518 North 38th St. Philadelphia, on Wednesday, October 9, of influenza-pneumonia.

Funeral services were held at his late home on Tuesday, October 15, at 10.30 a. m., and interment made at Cathedral Cemetery.

Harlan Smith

Harlan Smith, aged 9 months, son of Estelle and the late Harry Smith whose death is noted above died of influenza-pneumonia Monday, October 14 and will be buried tomorrow afternoon at 4 o'clock at Silverbrook Cemetery. The child's mother, Mrs. Estelle Smith, is in a serious condition with influenza.

Mrs. Margaret Fox

Mrs. Margaret Fox, aged 28 years, died at her home in Newport on Monday, October 14, of influenza-pneumonia. The funeral will take place on Thursday afternoon at 2 o'clock with interment at Newport Cemetery.

Mabel Haigh

Miss Mabel Haigh, aged 28 years, died of influenza-pneumonia at her home in Newport on Saturday, October 12. The funeral was held yesterday afternoon at 2.30. Interment at Marshallton.

Harry Smith

Harry Smith of Stanton, aged 23 years, died at his home there on Monday, October 7, of influenza-pneumonia. Interment was made at Silverbrook Cemetery on Wednesday, October 9. Mr. Smith leaves a wife and a 9 months old child.

Maggie Davis Miller

Maggie Davis Miller, wife of Thomas Miller and daughter of Mr. and Mrs. Wesley Davis, died at the home of her parents on Wednesday, October 9. Mrs. Miller came home ill on Tuesday and died the following day. She leaves a husband who is also ill with influenza and one small daughter. The funeral took place on Satur-

day, October 12, with interment at Salem Cemetery.

Julia George

Julia George, aged 16 years, daughter of Otario George, near Glasgow, died on Tuesday, October 15, of pneumonia. Owing to the illness of the parents the body was brought to the R. T. Jones undertaking parlors. Funeral services will be held on Friday. Interment in the St. John's Cemetery.

George James

George James, a colored man, aged 25 years, employed for many years by Dr. Watson, died on October 6 and was buried on October 9.

Remembering the Preacher

By the will of the late J. Monro Hageman, of East Amwell township near Ringoes, Hunterdon County, N. J., which was probated, recently, and, in which several churches were remembered, Mr. Hageman's pastor, the Rev. J. W. Lowden, pastor of Kirkpatrick Memorial Church, Ringoes, was mentioned as one of the legatees and will be the recipient of a very neat legacy from this estate. With the exception of his church, Mr. Lowden was the only person, in Ringoes who was thus remembered. Mr. Lowden, in his New Jersey home is "doing his bit," and has served as chairman of his district, in the third Liberty Loan, and, at present, is acting in the same capacity in the fourth. He was formerly pastor of the White Clay Creek church.

Archie Dempsey, Jr.

Archie Dempsey, Jr., aged 28 years, died of influenza-pneumonia on Saturday, October 12. Funeral services will be held at his late residence this (Wednesday) afternoon, at 4 o'clock. Interment will be made at Head of Christiana Cemetery.

A wife and one son survive.

Richard B. Chillias

Richard B. Chillias, aged 63 years, died at his home in Philadelphia on October 11, of pneumonia. The body was brought to Newark on October 14, and interred in the Head of Christiana Cemetery. A wife, formerly Miss Bower, of Newark, a son, R. B. Chillias, Jr., and a daughter, Miss Marie Chillias, survive.

Aged Colored Woman

Burned to Death

Mrs. Annie Smith, an aged colored woman who made her home with her brother, George Watson, for years an employee of Delaware College, met death in a tragic manner on Monday night. In attempting to light a lamp, she dropped a match which set fire to a rug and to her clothing before it could be extinguished. She called for help and her brother rushed to her rescue but was unable to ex-

tinguish the blaze before she was badly burned. Dr. Aronowitz was summoned and gave what aid he could but the unfortunate woman died in a very short time.

PERSONALS

Miss Agnes Medill who has been critically ill for the last week with pneumonia, is slightly improved today.

George Chambers who is stationed at Washington, D. C., in the Ordnance Department, is spending a furlough with his parents here.

Miss Elizabeth Wollaston is in a Wilmington hospital recovering from an attack of appendicitis.

Miss Marion Campbell spent the week-end at Pom Ova Farm, Farmington, Delaware.

Miss Helen Steele spent Tuesday in Wilmington.

Mrs. Clara Wickerson of Camden, Del., whose daughter is a student at Women's College, has leased a portion of the Rachel Thompson house on Delaware Ave., and has taken up residence there.

Mrs. L. K. Bowen spent Tuesday with Elkton relatives.

Misses Florence and Katherine Steele spent the week-end in Philadelphia.

Mrs. Charles Lyndall Penny who has been spending several months in Nashville, Tennessee, is expected to arrive at her home in the West End tomorrow.

Miss Quaesita Drake left yesterday for a visit to her home in Philadelphia.

Mrs. Rowland Herdman visited the family of Harlan Herdman last week.

Leon Major of the U. S. S. Constellation, Newport, R. I., has been spending a furlough at his home here.

Dean Winifred Robinson spent Tuesday in New York attending a meeting of the Women's Land Army of America.

Mr. and Mrs. W. E. Holton and Mr. and Mrs. J. Pearce Cann returned on Monday from an auto trip to Gettysburg and Blue Ridge Summit, Pa.

Mrs. Norman C. Stiles of Salisbury, Md., visited Miss Alice Evans over the week-end.

Mrs. Estella Campbell has leased the property of Mrs. William Taylor on Depot Road and will occupy it in a few days.

Edwin Armstrong of Philadelphia, who has been working all summer with the U. S. Boys' Working Reserve Corps, is visiting Mrs. J. O. G. Duffy, Cooch's Bridge.

Card of Appreciation

Mr. and Mrs. Wesley Davis and family wish to extend their thanks to friends and neighbors for flowers and automobiles for their daughter, Mrs. Thomas Miller.

Lieutenant Taylor Weds

A pretty and quiet wedding took place at Dover Wednesday afternoon at 2.30 o'clock when Miss Elizabeth Kyle Martin, youngest daughter of Mr. and Mrs. Frank Martin, became the bride of First Lieutenant Harry Vandom Taylor, son of Mr. and Mrs. John H. Taylor of Dover and now located at Camp Lee, Va.

The couple were unattended and only the immediate relatives and a few personal friends of the couple were present. Rev. Floris Ferwerda, pastor of the Dover Presbyterian Church of which the bride is an active member, performed

the ceremony and Mrs. J. A. Downes, of this town, played the wedding march.

The bride was most becomingly dressed in a travelling suit of dark blue velvet trimmed with grey fur and wore a large blue picture hat. She also carried a bouquet of orchids. A reception followed the wedding, after which the couple left for New York, Washington and Camp Lee, Va.

Lieutenant Taylor, familiarly known as "Bake," was a member of the class of 1916 at Delaware College and a star member of the football team. Mrs. Taylor was a frequent Newark visitor.

BUSY DAYS ON THE FARM

(Continued from Page 1)

O. Pence have sown an increased acreage of wheat for the 1919 crop. Fully 80 per cent of the crop is now in the ground and has had an exceedingly favorable start.

Lime has been little used on wheat this year because of the difficulty experienced in obtaining it. Potash is impossible to obtain, therefore, a fertilizer containing 2 parts of nitrogen to 10 parts phosphoric acid has been used extensively by farmers in this section. Stable manure has also been used to a greater extent because of the scarcity and high price of commercial fertilizer.

The filling of the two large silos at the Experimental Farm was completed on Monday.

Several boys from Newark High School have been spending their enforced vacation very patriotically helping the farmers of the surrounding district to move corn from prospective wheat ground, to fill silos, pick tomatoes and other chores in the food conservation plan.

Local merchants quoted the following prices for fruits and vegetables last night: Potatoes, 75 to 90 cents a basket; lima beans, 15 cents a quarter peck; tomatoes, 15 cents a quarter peck, or 25 cents a half; cabbage 4 cents per pound; celery 10 cents per stalk; peppers 20 cents a dozen; egg plants, 8 to 15 cents, according to sizes; turnips, 20 cents per half peck; lettuce, 8 and 10 cents per head; onions, 20 cents per quarter peck; apples, \$1.25 a basket, or 25 cents per quarter peck. Oranges at wholesale are selling for \$13.50 per box of 200. Allowing for cartage, rots, and overhead, retailers must charge \$1.10 to \$1.25 per dozen. Grapes are selling at 20 cents a pound.

Scarce Items, Plentiful Here

The difficulty of securing lines of merchandise is not being overstated in many instances. We are singularly fortunate in having many lines that are reported scarce elsewhere. Early placing of orders gives us this very enviable position. Here are a few notable offerings:

- Handsome Broadcloths in all the desirable shades. French Serges. Lustrous Satins in black and colors. Distinctive novelties in skirting Silks. Damasks, Napkins, Cloths, Towels and small Linens that are ALL-LINEN. Several hundred pairs of Blankets just received, giving us an assortment second to none. Down, wool and cotton filled Comfortables. Complete showing of knitting Wools. French Kid Gloves just arrived. Warm Mocha and washable Kid Gloves. Our Hosiery department reflects our early preparations. We are showing the best values obtainable in Silk, Lisle and Cotton Hosiery. Knitted Underwear in its new quarters on main floor is fully equipped to meet every requirement. Our notions and small wares department has been doubled in size and efficiency.

Second Floor Announcements

- Daily arrivals in our Garment section merit your interest in our lines of plain and fur trimmed Coats and Suits. Novelty Skirts of unusual beauty. Our showing of Georgette and Charmeuse Dresses at \$27.50, \$35.00 and \$37.50 each are marvels of the designer's art. Wonderful models in wool jersey Dresses. Dependable Fur Scarfs, Muffs and Coats. Silk and Muslin Underwear and Corsets.

Our two new departments, Art Goods and Infants' and Children's lines have already found a place in the eyes of the public, though only a few days in existence. Nowhere are assortments and values better.

We solicit charge accounts from those of established credit, and prepay delivery charges on all purchases within a reasonable distance.

Some Meat and Wheat-Saving Recipes

The following are some tested and fit recipes that make excellent luncheon dishes and in addition to being delicious are wheat and meat savers.

Rice and Wheat Bread

- 1 cupful scalded milk
- 1 cupful boiling water
- 3 tablespoonfuls butter or oleo
- 3 teaspoonfuls salt
- 1 yeast cake, dissolved in water
- 1/2 cupful lukewarm water
- 3 cupfuls wheat flour
- 3 cupfuls rice flour

Add sugar, salt and fat to the hot liquid and when lukewarm add the dissolved yeast. Add nearly all of the flour and mix thoroughly. Gradually mix in the last of the flour, place on a floured board and knead until elastic to the touch. Return to the bowl, cover, and allow to rise until double in bulk. Sixty-five degrees Fahrenheit is the proper temperature for bread overnight. When double in bulk, cut down and knead lightly. Shape, place in buttered bread tins, allow to double in bulk once more and bake in a hot oven.

Baked Bread and Cheese Omelet

Any of the breads are very good to use in connection with this recipe—oatmeal bread being particularly good. Soak one scant cupful of fine, stale bread crumbs in one pint of milk, to which has been added a tiny pinch of baking soda, dissolved in a teaspoonful of hot water. When thoroughly soaked add two lightly beaten eggs, one-quarter of a teaspoonful of salt, a pinch of paprika, one tablespoonful of melted oleo and a small cupful of grated cheese. Turn quickly into a deep, greased pudding dish and bake in a hot oven.

Baked Tomatoes

- 4 large ripe tomatoes
 - 3 thick slices bacon
 - 1 large onion
 - 1 tablespoonful butterine
 - 1 ear corn or 1/2 cupful of canned corn
 - 1 cupful bread crumbs
 - 1 teaspoonful chopped parsley
 - Salt and pepper
- Wipe tomatoes and cut top to form lid. Take out seed and pulp. Cut bacon in pieces and fry in pan five minutes, then add chopped onion, and brown. Add pulp of tomatoes and the corn (cut from cob), cook five minutes, season to taste with salt and pepper, add butter, bread crumbs and parsley. Cook till blended. Fill tomatoes with mixture, place in pan with small amount of water, and bake in hot oven for twenty to thirty minutes.

Hominy Waffles

To one cupful of cooked hominy freed from lumps add one pint of milk that has been scalded and cooled, one tablespoonful of melted oleo, half a teaspoonful of salt, one tablespoonful of maple or brown sugar, one pint of Victory flour and one-third of a yeast cake dissolved in a few spoonfuls of warm water. Beat well, cover and let rise overnight. In the morning add one egg, the white and yolk beaten separately, and bake in hot, well greased waffle irons. Serve with ground cinnamon and sugar or strained honey.

Macaroni with Peanut Butter

Baked macaroni with peanut butter is novel and very good. To prepare this dish, cook one cupful of macaroni, broken into one-inch pieces, in boiling salted water for twenty minutes. Drain in strainer, pour over a quart of cold water to prevent pieces from adhering and place in a buttered baking dish. Heat two cupfuls of milk in the upper part of the double boiler, blend gradually with three and a half tablespoonfuls of peanut butter, add a scant half teaspoonful of salt and pour over the macaroni. Bake, covered, in a slow oven for forty minutes; then cover with crushed dried bread crumbs, dot with bits of oleo and bake until well browned. Serve in the baking dish.

Rice and Cheese Fritters

Put one cupful of cold boiled rice in a colander and stand over hot water until soft enough to be broken with a fork. Add to it half a cupful of grated mild cheese, three tablespoonfuls of milk, two tablespoonfuls of flour and one teaspoonful of baking powder. Let stand to thicken well and fry by small spoonfuls in deep, hot fat. Season the rice with salt only, or add paprika, a few drops of Worcestershire and a pinch of mustard if preferred.

YANKEE NATIONAL GAME FOLLOWS THE FLAG

Soldiers Turn to Baseball at First Lull of Battle

E. A. Batchelor sends the following interesting message from the front:

Saturday morning the Germans had held the position. Sunday afternoon American artillerymen were playing ball there. Thus the Yankee national game follows the flag.

It might seem strange that soldiers after days and nights of battle, hours of fatigue and danger, should turn to baseball the very first moment there came a lull, but this has been the rule rather than the exception all summer in France.

Sometimes the play starts while an occasional enemy shell is still shrieking overhead, though the officers do not encourage that sort of reckless exposure to danger.

The explanation for the soldier's love of play at the extreme front is that his nervous system has been so upset that he needs action. He cannot go from the excitement of battle to the calm of complete repose all at once. He must let himself down gradually, just as men who have been working in compressed air must go through the air lock before it is safe for them to breathe the atmosphere at its normal pressure.

Baseball serves the purpose admirably. It gives them something to do with their bodies while nature is adjusting itself, and something to think about that will enable them to forget the horrors they have just passed through. It is both a physical and mental tonic.

In the particular case mentioned above a group of artillerymen were firing two big "165" rifles placed beside a road. The two pieces, served with the regularity of clockwork by a part of the battery were harassing the retreating Huns. The men not actually engaged in shooting sat and lay around with nothing to do but think. They were too tired and excited after the advance to sleep.

A Y. M. C. A. van came along the road and one of the men in it called out to ask whether an indoor baseball could be used there.

With one voice the artillerymen answered "yes." The "Y" man threw out a new ball and one of the soldiers caught it.

"First hitter!" he yelled. "Second hitter," yelled another. "Pitcher," shrieked a third. And so on until all the desirable places were claimed.

A pick-handle answered for a bat. In a minute the game was in progress. The batter stood between two guns and the fielders were spread out in front, so that they got the full force of the terrible blast when the pieces were fired.

They paid no more attention to the ear-splitting crack of the guns than to the buzzing of the flies around the mess tent. War was forgotten and they were just American boys at play, instead of men engaged in the business of slaying.

An officer saw the game and smiled. He knew that the morale of that battery would go far over par as a result of the play. It was just the thing that they needed.

What the Department of Agriculture is Doing

With silage in the ration, dairy cattle can be kept in the condition of health common to animals on pasture. The digestive system of a cow is well suited for the utilization of large quantities of green grasses and other coarse succulent material. Silage is palatable, and no other feed will combine so well with dry hay and a little grain to produce maximum, economical results.

The preservation of the mature corn crop or the saving of one which for any reason must be harvested before maturity by placing it in silos is deservedly increasing in popularity. About 40 per cent of the total food material in the corn plant is in the stalks and leaves. When only the ears are harvested nearly one-half of the crop is lost; on the other hand when the crop is put into the silo the losses are very small. When drought, frost, or insects attack a field of corn before it is ripe the entire crop may be lost unless a silo is at hand in which to preserve it.

No feed crops can be so successfully harvested under widely varying conditions as those that are put into the silo. Only in case of drought or frost is it necessary to rush the filling of the silo; rain or dew on the forage does not injure the silage.

PSYCHOLOGY OF WAR ON WOMEN'S CLOTHES

The Girl in Uniform.
Every war has had its influence upon women's clothes. Sometimes it has been a color that has sprung into fashion with the bugle call to arms, sometimes it is a feather, as the coque feather; sometimes it is braid and a military swing to the lines of a suit or dress.

Before the United States entered the war Russian Cossack suits, coque feathers, braided jackets, snappy suits with a military dash to them that almost sang "Listen to the band" were the vogue. War muffs, fabulons in price, but economical in use, French bibe, brass buttons and any number of adoptions from male military attire were seized upon by Paris designers and shipped to America as the style.

But since the United States entered the war American women have joined the workers of the world. The influence of war on their clothes was first noticed when feathers began to disappear and the Russian Cossack suit and high French toque gave place to the plain American tailored suit with sensible pockets and the useful sailor hat.

Blue Triangle Series
Miss Mary Dingman, who is at the head of Y. W. C. A. work with French women munition workers. Miss Dingman is wearing the official uniform of the Y. W. C. A. war workers in France.

with its bit of ribbon and no furbelows.

Women are showing in their clothes that when they work they must dress accordingly. Hence the new demand for uniforms.

Everywhere women are adapting uniforms as an answer to the vexing question of "What shall I wear to work?" The suits of the women conductors, women farmers, signal corps girls, and the recently adopted uniform of the Young Women's Christian Association all point to a new simplicity and beauty in clothes for women in this country.

The Y. W. C. A. has designed a uniform peculiarly adaptable to the needs of a woman in business. It is a uniform that combines common sense and utility with undeniable style. It is already known in France for overseas work.

The coat is finger length and belted, with big Kitchener pockets that are a

WHITE PLAGUE KILLS MORE MEN THAN BULLETS

It seems longer, but it was less than four years ago that the nations had not yet started in to wipe each other off the map and that the only times when one heard of the Red Cross were times of flood or disaster and at Christmas time, when the peaceful little Red Cross tuberculosis seals made their annual appearance.

Perhaps, in fact, it was the long, ardent fight in America against the White Plague which, in spite of the war's enormous new demands, is responsible for the especial interest being taken by the American Red Cross in France a frightful struggle against consumption.

This scourge seems to mark the French fighter for its own. It kills more men than do bullets and poison gas combined. Until the American Red Cross was permitted by the French government to start its drive against tuberculosis it looked as if, even with a victory over the Hun, France might eventually be conquered by this deadlier foe.

Already things are looking brighter. The Red Cross has taken over old hospitals and built new ones. More than 500 tuberculosis dispensaries are to be opened throughout the country, and Red Cross doctors and nurses—scores of them—are devoting themselves exclusively to this fight, doing over there exactly the same kind of work which is financed in America by the little Christmas seals. It is one of the ways in which our contributions to the Red Cross American seal comes to the debt to France.

Will Designate "Victory Farms"

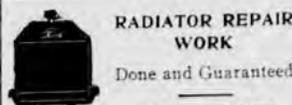

Iowa farms which put in their quota of the Liberty wheat crop are to be designated as "Victory Farms," according to announcement by the county farm bureaus of the state. Posters with the legend "Victory Farm" will be given to the farmers by the school district co-operators late this fall. Those who sow spring wheat will be given their posters next spring. The wheat quota is 1 acre out of every 8. Allowances will be made on farms having an unusually large amount of tillable land.

Fashion Show for War Year

A fashion show in tune with war-time economy was recently held in Allegan County, Mich., under the direction of the home-demonstration leader of that locality. This show was given in connection with the county fair. Instead of wearing, as is usual at fashion displays, creations from Paris or New York, the girls wore made-over gowns constructed from out-of-date garments.

Cheaper Meals for Country's Defenders

Announcement came on Monday from Washington establishing a 75-cent table d'hote meal on railway dining-cars. But this meal, which is 25 cents cheaper than the standard dining-car meal, will be served only to men in the uniforms of American military service.

AMERICA'S MESSAGE TO GERMANY

The Republican Organization Makes Fourth Liberty Loan first Business

To Republican State Chairmen, District Chairmen, County Chairmen, and all Republican Workers:

The mission of America is about to be accomplished.

American soldiers in France are at this moment demonstrating to the world the reason for America and the stuff of which this Republic is made.

Their complete success and the consequent eternal establishment everywhere in the world of the integrity of American rights, interests and honor and the right of men to govern themselves, are all assured with the proper performance of the plainest duty of the citizenry at home.

The Fourth Liberty Loan is our next objective.

There is no geography, political or physical, in the patriotism of this country. Democrats and Republicans alike love their flag and are ready to die for it. We continually insist for all parties that the war be kept out of partisan politics and that partisanship be kept out of the war.

Just as in Congress the Republicans led the fight that made possible the passage of the great war measures, so now the Party membership and organization has an immediate, definite war task in the accomplishment of which it can fully function. I repeat, let there be no contest in this country as to anything that touches the war except that contest—who best can serve, who most can give.

The success of the Fourth Liberty Loan shall be the Republican Party's supreme motif of thought and action until that objective is attained.

Wherever Republicans are together, by two or two thousand, it shall be a win-the-war meeting. Let us as the Republican Party's first action at all times has been and shall be determined solely by how we can contribute most to the war's success, so now our every thought and action shall be determined entirely by how we can secure the quick over-subscription of the Fourth Liberty Loan.

This is a united country's next message to Germany.

The entire Republican organization in every voting precinct in this country shall be a fighting

force in this Liberty Loan drive. This is the Republican organization's business.

This is the real business of every man, woman and child in America. "Everything else is chores."

Three Ways of Increasing Food Resources

Industry overshadows agriculture in Allegheny County, Pa., where large quantities of ammunition and shipbuilding materials are manufactured, but the Allegheny County farm bureau has found at least three ways of increasing the county food resources and thus diminishing the demand on the reserves of other communities. One result is that members of the Pittsburgh Field Club now sit on the front veranda of their clubhouse and see 150 sheep grazing on their golf links. Another result is that Pittsburgh garbage is being converted every day into pork by 400 hogs. The garbage is heated in tanks under pressure for 8 or 10 hours, freeing it from poisonous and foreign material. About 150 bushels of garbage are fed daily, producing pork at an estimated cost of 10 cents a pound live weight. The hogs will be finished with corn. A way also has been found of saving farm produce which might go to waste. A truck equipped with a complete canning outfit and accompanied by over a dozen experienced women is sent into the country districts to can surplus fruits and vegetables. This work is being done by the Women's Committee of the Council of National Defense, with the aid of the farm bureau.

Incandescent Lamp Dubbed "Inefficient"

The Fuel Administration has prohibited the making of the cheap light in the interests of fuel conservation.

In a letter explaining the action of the National Fuel Administration, Charles H. TenWeegels laid the matter before the Public Utilities Commission recently in a letter supplementing the order by "inefficient," as the order terms the cheap incandescent, is meant the carbon filament lamp which is secured gratis in exchange for old burned out lamps. It is taken that as a matter of fuel conservation the carbon filament will become a matter of history, even after the war, as it is an obvious waste of power to use the cheaper lamp.

THE SOURCES OF TIN SUPPLY

Production and use Greatly Increased in Recent Years

It is said when Caesar with his legions was sailing westward he sighted what he thought was a tremendous cliff of silver. This proved to be what we now know as the famous Cornwall tin mines, of Wales. Since then, this cliff has disappeared, and the miners are today thousands of feet below the surface and miles out under the bed of the ocean, still mining tin. It is known that tin was used before the Stone Age and in all prehistoric countries implements, utensils and weapons have been found that contain some tin.

Until modern times the use of tin commercially was very limited, but in the last twenty years its production and use have both increased tremendously.

Tin is found in every quarter of the globe. There are numerous so-called tin mines located in our own country, but none of them so far has proved to be of any commercial value.

The greatest source of supply is in the Straits Settlements. The next most important source of supply is Bolivia, then come the Dutch possessions in Java. There is also considerable tin mined in Siam and China, BIRTON, Nigeria, Australia, Cornwall, British-protected Malay States and the Union of South Africa.

All tin that is used in this country comes from overseas. Formerly all the tin which came to this country from the British possessions in the Far East, came via London. Since during the war it has been subjected to the submarine peril, all tin intended for America, coming from the Far East, comes now via the Pacific and overland from the Pacific Coast, thus obviating the submarine menace.

Tin is a mineral that is used in almost every branch of industry conceivable. It has been stated with proof that we could not operate a steamer on the ocean, we could not build a railroad car, we could not do anything to carry on this war, if we did not have tin. It might be said that the entire industry of the United States is dependent on tin in some form or other.

The War Industries Board's estimate of supplies of virgin tin for 1918 from present sources is approximately 75,000 tons, leaving a deficit of some 5,000 tons, which must be made good either by developing new sources of supply, as for instance in Bolivia, or by effecting further economies in the use of the metal. Such further economies it will be extremely difficult to make, as probably 75 per cent. of the tin used at present is directly or indirectly for military purposes and the remaining 25 per cent. for the most essential civilian uses. It is highly desirable, therefore, to develop new sources of supply.

An Afro-American Victory

Representative Bland, of Indiana, brings this back from Europe:

An American lying wounded in a wheat field was somewhat taken aback by the spectacle, in slow and stately approach, of a German officer. He was magnificent with medals and he wore a monocle. Every once in a while his impressiveness was spoiled by a nervous turn of the head and the suspicion of a squirm—just as if some one were tickling him in the rear with a bayonet. Some one was, for looking beyond, the wounded American saw a great big husky American negro prancing along, showing every tooth in his head. "Hi-yi, boss," he called out jubilantly, "Ah don't know what Ah's got, but Ah's bringin' it along."

Seven Reasons for Saving

Save for your country's sake, because it is now spending millions a day and must find most of the money out of savings.

Save for your own sake, because work and wages are plentiful, and, as prices are high now, a dollar will buy more after the war.

Save, because when you spend you make other people work for you, and the work of everyone is

needed now to win the war.

Save, because by saving you make things cheaper for everyone, especially for those who are poorer than you.

Save, because by going without you relieve the strain on ships, docks, and railways, and make transportation cheaper and quicker.

Save, because by saving you set an example that makes it easier for the next man to save. A saving nation is an earning nation.

Save, because every time you save you help twice, first when you don't spend and again when you lend to the nation.—The Commonwealth.

The Horse Drops in Informally

A London correspondent tells of a pleasant-faced girl who drives a mail van—one of many engaged in such work. This one always saves from her very small ration of sugar a lump for her horse, and when the air raids begin, she goes to his stall and keeps up his courage. She has to leave on her route at 6.30 each day, often in fog, cold or rain, and her day is 14 hours long. The men, scolding and laughing together, say that they can do nothing with the horses since the girls came on the force; they come right into the offices in search of their feminine drivers.

The Home Front

The battle front in Europe is not the only American front. There is a home front, and our people at home should be as patriotic as our men in uniform in foreign lands.

Every American soldier who has fallen in France, every American sailor who has died for his country's cause has given his life for his people. Surely we, their people, can lend our money to our Nation, their country.

The Fourth Liberty Loan is the fighting loan. Its great success will bring comfort an encouragement and a deep sense of pride to our Army and our Navy, and to our allies; it will bring discouragement to our enemies. Its suc-

cess means American victory, Prussian defeat.

The fourth loan is the fighting loan, the soldiers' loan. Only three days left—back your own with the bond you own. Save for your country or slave for the Hun.

A New Training Camp Sport

Cage ball, one of the latest additions to the long list of training camp sports conducted by the war department commission on training camp activities, bids fair to become one of the most popular athletic diversions among the soldiers and sailors.

Cage ball combines the play value of several games. It has the rush and drive of football, the exciting moments of basketball and the rough hustle and tussle of the class rush.

The game can be played by a dozen, a hundred or a thousand men; there is no limit to the number of players. Thus the weak and undeveloped may have the same experience, pleasure and profit that is given to the skilled athlete who plays on a team whose players are limited. And the aggressive fighting spirit, so invaluable on the battlefield, is stimulated.

FARMERS' PLEDGE ON MILL FEEDS

Conservation by Producer Necessary to Save Lives of Children Abroad.

Owing to the extension of the drought area, the shortening of the corn crop, the larger animal population in the country, and the Allied demands upon us for feeding stuffs for their own animals, because of their own shortage in production of food grain, it is necessary that we should exert every effort in the proper conservation of feeding stuffs during the next twelve months; yet we must maintain our own animal production. It is necessary that we should ship a larger proportion of wheat as compared with flour during the next twelve months than during the last twelve months to the Allied countries, because their own shortage of feeding stuffs is such that if they are to keep alive their dairy herds, they must have a larger supply of grain wheat.

Already, the milk supply in the Allied countries has been limited practically to the supply of children and other vitally necessary national uses, and any failure on our part to supply them with necessary feed stuffs for their dairy herd means that we shall cut into the actual safety of the children amongst the Allies. On the other hand, both our own population and the Allies are dependent upon our production of animal products, and we do not in any way wish to stifle this production. What we must secure is the utmost elimination of waste by the careful feeding of animals and the use of all the roughage available.

One of the difficult problems is the distribution of wheat mill feeds, and this is made more difficult by the fact that the Food Administration, in an endeavor to protect the farmer, is maintaining an artificially low price on these feeds. One consequence is that a great deal of mill feeds are now going unnecessarily into work animals or beef production. Every farmer will recognize that the wheat mill feeds are vitally necessary for the dairy cattle, to some extent for the poultry, and for young pigs. Owing to the absorption of mill feeds at local points near the mill, considerable sections of the dairy industry are practically without mill feeds and our dairy production is thereby in danger. In this view, we are asking every buyer of wheat mill feeds, outside of the acute drought area, to sign a pledge of honor not to use the wheat mill feeds for any purpose except the essential use in dairy, young pig and poultry production, and not to purchase or hold at any one time more than 60 days supply. Unless we can secure this careful and specialized use of mill feeds, our dairy production in the congested Eastern areas of the United States is bound to fall and to jeopardize the food supply of our people in that section. Otherwise it will be necessary to release the price restrictions on mill feeds and allow them to take their natural course.

With a view to securing this cooperation from the farmers all over the country, in the interests of their industry as a whole, the mills and all dealers in feeds are instructed to secure from the buyer of wheat mill feeds the following pledge:

"In order to assist the Food Administration in the distribution of mill feeds, I hereby undertake on honor not to use wheat mill feeds for any other purpose than the feeding of dairy cattle, poultry, young pigs or young calves, or the preparation of a weekly bran mash for work animals. I will not feed any more wheat mill feeds than is customarily fed to such animals and I further agree not to have at any one time more than a 60-day supply of wheat feeds on hand."

The Food Administration is also requiring the millers and feed jobbers to distribute their wheat mill feeds in such manner that each state receives the same proportion of the mill's or jobber's shipments as it received in the same quarter in 1917.

PUNISH GROCER

Who Sold Sugar to Housewives in 10-Pound Lots.

Evasion of the sugar regulations has led to trouble, for George N. Fries, a grocer in Center market, Washington, D. C. An investigation by the Food Administration showed that Fries had been selling sugar in 10-pound lots to individual customers, and to conceal his violation of the Food Administration regulations had been having his patrons sign receipts marked merely "O. K." instead of signifying that they were for sugar. An unnumbered "order" has been placed against him, the Food Administration instructing all dealers to discontinue all business dealings with him in licensed commodities.

The Food Administration was led to investigate this case because of statements recently made by the owner of a boarding house, who had been summoned before the Federal Food Administrator for the District of Columbia, to explain why her boarders were receiving unlimited amounts of sugar. She said that she had been making 10-pound purchases from Fries.

For Them "Over There"

Service flags in the windows--
 Silent prayers on every lip--
 Liberty Bonds in every home--
 Think--- and trust--- but above all, act!
