

E D U C A T I O N

B. Fulton County, Arkansas, March 18, 1899; A.B. degree, East Central State College, Oklahoma; M.S. in Education, Oklahoma A. & M. College; Ed.D., Stanford University; High School Principal, Muskogee, Oklahoma; Director of Instruction, Salt Lake City High Schools; Field Coordinator on the Commission of Teacher Education of the American Council on Education; Dean of College, Ohio Wesleyan University.

W. EARL ARMSTRONG
Dean of the School of Education

The ultimate purpose of the School of Education is to improve the schools of Delaware. To accomplish this multiple purpose the School of Education helps to prepare teachers, serves as a connecting link between the whole University and the schools, works with the State Department of Education on educational matters, and provides inservice education for teachers out in the field.

There are in Delaware approximately 1600 teachers. Resignations, retirements, and deaths usually require about 150 replacements each year. At present the replacements needed are nearer 300 per year, and conditions indicate that this demand will continue for several years. Not all of these teachers are prepared by the University of Delaware; some are imported from other states. However, in as much as the University is the only institution of higher learning in the State for the education of white teachers, the University feels obligated to prepare as many teachers for other states as other states prepare for Delaware. There has never been a surplus of good teachers in Delaware.

The School of Education is interested in both the subject-matter and professional preparation of teachers. It provides the professional courses and advises the student concerning the subject-matter courses best suited to his

future needs as a teacher. Between eighty and eighty-five percent of the teacher's preparation is in the various subject-matter fields and from fifteen to twenty percent in professional courses.

Programs are available leading to preparation for teaching at both the elementary and the secondary school levels. The student preparing to teach in the elementary schools takes a broad program of subject-matter courses, while the student preparing to teach in the secondary schools concentrates his subject-matter preparation in two teaching fields.

The School of Education became a full-fledged School equal in status with the other four Schools of the University in September 1945. Since that time two members have been added to the faculty, one with specialization in human growth and development and the other with specialization in the development of reading ability. A curriculum laboratory including the most up-to-date textbooks, reference books, courses of study, testing materials, and audio-visual aids has been established.

Plans for the future include, in addition to further changes in the curriculum and improvements in the curriculum laboratory, the addition of faculty members in the areas of community development and evaluation.

DEPARTMENT HEADS

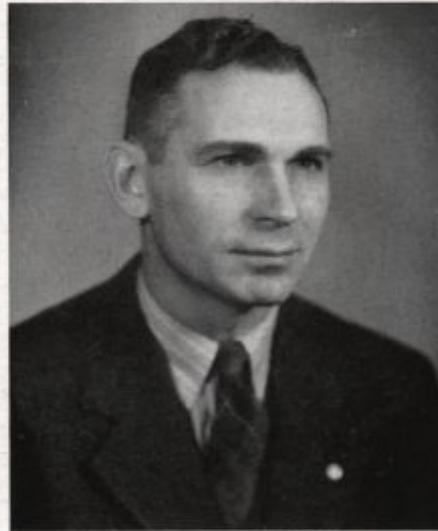

DR. A. VAN de VOORT
Secondary Education

DR. G. MURPHY
Secondary Education

MISS RENA ALLEN
Elementary Education

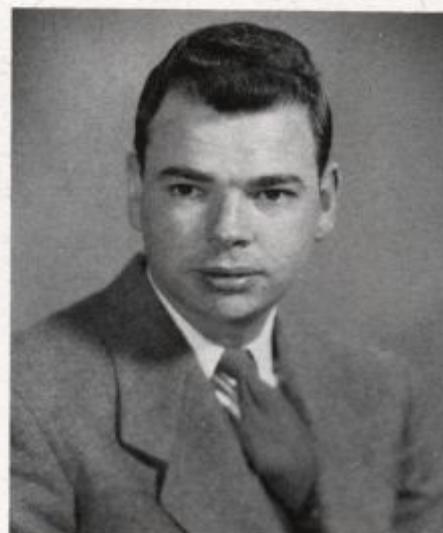

MR. K. STEERS
Men's Physical Education

MISS B. HARTSHORN
Women's Physical Education

MISS E. EHLERS
Elementary Education

DR. H. G. MORGAN
