### PREFATORY NOTE

*The third number of Delaware Notes, due in 1925, appears now much belated, owing to difficulties of printing. This is one of the science numbers of the series of studies by members of our faculty.*

*The investigation in aerodynamics which is here reported was made under the auspices of The National Research Council. The University of Delaware has shared a portion of the expense of publication with The Annals of the Astronomical Observatory of Harvard College. The printing was done under the direction of the Director of the Astronomical Observatory of Harvard College and the Director of the Blue Hill Observatory of Harvard University.*

EZRA B. CROOKS,  
Editor.

*University of Delaware,  
Newark, Delaware.  
January, 1926.*
