## Police Reject Council's Plan For Revised Pension Program

Members of Newark's Fraternal Order of Police reject present veterans in service; 20-year, half-pay retirement sought similar to State, Wilmington Police

Members of Newark's Fraternal Order of Police rejected last Thursday night a council proposal for a police pension plan that would provide 31-year veterans with a monthly pension of \$212.

Council rejected a police request for pension changes, including 20-year retirement at half pay and higher disability death benefits.

The council plan would make it mandatory for officers to retire at 55, with voluntary retirement at 50.

An officer's pension would be based on one per cent of his pay on Jan. 1, 1968, multiplied by the number of years he served before 1968 — plus two per cent of his average annual earnings after Jan. 1, 1968. The officer would contribute two per cent of his salary each year toward his pension.

### 32-Year Veterans

An FOP spokesman said council's formula means an officer who will reach mandatory retirement age soon will get \$212 a month — after almost 32 years' service.

Several other men on the force with long pre-1968 service will suffer if the proposed plan goes into effect, the spokesman said.

The police said they are standing firm for a 20-year, half-pay plan — the same as state, Wilmington and New Castle County police have.

Besides the basic pension police want 75 per cent disability pay and 50 per cent death benefits for widows of men killed on duty.

Council's plan offers 100 per cent of accrued pension to the date of disability and \$100 a month for a widow plus \$25 for each child up to 18, with a maximum of \$200 a month for both.

### Special Hazards

Police say disability and death proposals are out of line because no other municipal employees are required to face a man with a gun, and an officer should have the peace of mind that if he is killed his family will be cared for.

Councilman William M. Coverdale asked council last Thursday night to reconsider police requests with an eye toward financing them with state funds.

Coverdale proposed to ask for legislation to create a state agency to set up a pension program for all police in the state, or bills to refund liquor tax receipts in the state, or to refund liquor tax receipts to municipalities for the sole purpose of funding police pensions.

He said he asked for the reconsideration "in order that . . . Newark obtains the best in police protection for its citizens."

## Dr. Yi-Chun Chang To Address LWV Meeting On China

Public Invited To Attend Wednesday Night Meeting On Mainland China Turmoil

Dr. Yi-Chun Chang will speak on "The Current Turmoil in Mainland China" at a public meeting of the Newark League of Women Voters next Wednesday at 8 p.m. at the Unitarian Fellowship, 429 Willard Road in Newark.

Assistant professor of political science at the University of Delaware, Chang was born in Peking, leaving mainland China in 1949 and arriving in the United States in 1950.

He received his PhD from Northwestern University and before coming to Delaware, spent three years as an analyst with the U.S. State Department.

"Dr. Chang can help us put together pieces of the 'China Puzzle,'" Mrs. John Worthen, chairman of the LWV China committee, said.

The League of Women Voters in 50 states has for the past three years been studying the background of events taking place in China.

In 1966, the LWV national convention voted to put this item on its program in response to feelings of members that they did not know enough about China.

Three years of study have served to show the complexity of the problem, but according to Mrs. Worthen, some of the "pieces of the Chinese puzzle are beginning to fit."

After his lecture, Dr. Chang will answer questions from the audience and coffee will be served.

VFW Commander

J. A. O'Daniel Post Urges Preference With Hiring Vets

Commander of Newark's J. A. O'Daniel Post 475, Harold 'Butch' Wilson, called on local employers to give returning veterans preference when they have jobs to fill.

In reporting on the "Employ The New Veteran" resolution passed by his post last Thursday Commander Wilson said that action by employers in Newark would benefit the community and veterans as well as employers.

He pointed out that prompt employment of veterans helps a community retain stability and the employer gains "dependable men with a strong desire to begin their careers, establish households and settle down and raise families."

Wilson said that President Johnson in a special message to Congress, called for a Congressional resolution asking employers to voluntarily give veterans preference in hiring. Both houses of Congress responded without dissent.

The VFW Post 475 resolution was an endorsement of the Congressional resolution, he said.

## Council Considers Three Key Issues With New Zoning

Abandoning its format for discussing the proposed zoning ordinance section by section last Monday night, Newark City Council singled out three major problems for settlement — building height, the University of Delaware and the Newark Board of Adjustment.

Outgoing President F. Racine Stafford Cites Chamber

Chamber of Commerce last week emphasized on the total community, the chamber's stated goal of commitment to the entire community, not just any one segment of it. This theme was in evidence throughout the evening in the varied background of the audience, the diversity of those at the head table, the types and scope of displays, and the speech of outgoing president F. Racine Stafford.

### Special Guests

With 375 persons attending the annual chamber of commerce banquet in the Acton Fire Hall on Ogletown Road Tuesday night, guests included Gov. Russell Peterson, Newark Mayor Norma B. Handoff, County Executive William C. Cenner; Harry Bissell, president of the Delaware State Chamber of Commerce and the featured speaker of the evening, Dr. E. Arthur Trabant, president of the University of Delaware.

James Collins, vice-president and general manager of the Budd Co. Polychem Division was toastmaster.

Accenting the chamber's drive for commitment to the total community, outgoing president Stafford said "The Greater Newark Chamber of Commerce is now ready and properly equipped to be the catalyst for action in our total community. With our new office and full-time staff, the chamber can do many things which other organizations with only volunteers cannot do."

"It is now the policy of the chamber to assist other groups whenever and wherever possible. We have worked with the YWCA, the Greater Newark Recreation Association, Junior Achievement, League of Women Voters, Newark Symphony Orchestra, Newark Civic Association, Boy and Girl Scouts, and many other fine groups.

**Strength in Unity**

"Much has been accomplished over the years in the greater Newark area by individual groups and different segments of the community. But too often there has been overlapping and lack of strength because the groups have been small. This condition has existed because we did not know one another. And when we do not know one another we create all kinds of misunderstanding."

The Greater Newark Chamber of Commerce has done and is doing much to correct this. Many members of various community organizations now sit on chamber committees, thus giving the committees a much broader knowledge from which to make decisions."

The outgoing chamber president also noted that "the membership of this chamber, directly and indirectly, represents approximately 10,000 people. Groups that do not belong to the chamber but work with us and support what we are doing, represent another 5,000, making a total of approximately 15,000 men and women working together for the total community."

### Where The Action Is

Incoming President Alden C. Bugher invited those in attendance to "Go where the action is — the Greater Newark Chamber of Commerce."

Bugher called for a commitment from everyone seeking a better community. He emphasized that the chamber can be the catalyst for such work.

Executive vice-president of the chamber, Mack Emmert said he was delivering the "commercial" message of the program.

Emmert noted the Greater Newark Chamber of Commerce's support of the two Junior Achievement companies and encouraged those in attendance to buy the products, a telephone note pad and a car flare kit.

The other "commercial" concerned a project of the chamber — to encourage attendance at Newark Symphony Orchestra concerts, and Emmert reminded those in attendance that tickets for the concerts were available at the door and would be

The Farmers Mutual Insurance Co. of Mill Creek Hundred held its annual meeting last Saturday afternoon at Harmony Grange Hall where William H. Naudain was reelected for his 24th year.

Stock Outlook: 1969

Let's talk about the stock market, including a thought or two on the overall market—and a comment on the general configuration, within which you and I will have to select stocks for 1969. First, let me touch briefly on the supply/demand factor as related to common stocks.

The underdeveloped nations are in a race with time. While they struggle to catch up with modern progress, mankind's oldest enemies do their damage now.

Hunger and malnutrition kill 10,000 persons a day, stunt their bodies, deaden their minds. Needless diseases cripple and weaken many more. Lack of education and training doom young people and adults to a hopeless cycle of poverty.

America would not be America if we closed our hearts to human agony at home or abroad. CARE is a way to reach the needy in countries whose resources are far less than our own.

Your contribution does more than keep people alive. CARE's Food, Self-Help and

Medico programs help the hungry grow self-sufficient. Health, education, food production, job training, construction of community facilities from schools to roads and water systems—these are the supplies and services CARE provides in the name of the American people.

Your dollars are multiplied by those you help: local governments share operating costs, and community groups give what they can in materials and volunteer labor. Our Government gives farm abundance for many of the feeding plans.

Every dollar can serve lunch to 90 children... \$10 treats 14 patients at a clinic... \$300 per classroom can buy materials for parents to build a school.

## Hail To The Chief!

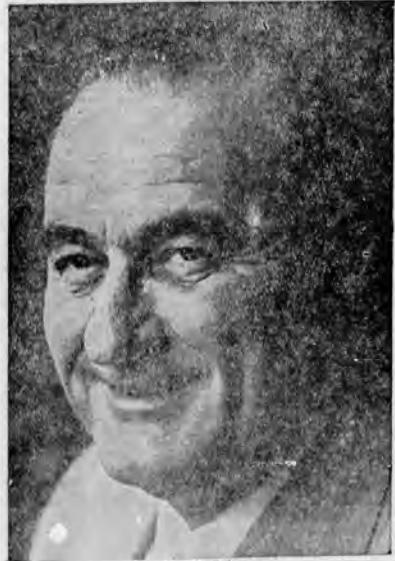

Richard M. Nixon

It takes a mighty man, or a megalomaniac to seriously seek the highest office in the world — that of President of the United States. And President Richard M. Nixon is a mighty man in a mighty big job, for which all Americans have good reason to be thankful, regardless of politics. He is our President — the 37th in our happy history of Herculean heroes — and with his oath to perform the duties of President of the United States to the best of his ability, we owe him the respect and support necessary for his successful leadership.

As vice-president for eight years; as a near winner of the Presidency in 1960; and as the successful campaigner for President in last November's election, Richard M. Nixon may be more fully aware of the problems of his new office than were any of his illustrious predecessors.

We believe he will measure up to the challenge, and wish him well. Hail to the Chief!

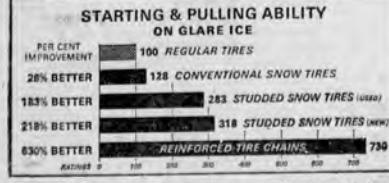

## And Thank You Mr. President!

Lyndon B. Johnson

To Lyndon B. Johnson, who was catastrophically catapulted into the Presidency, and then went on to win the next Presidential election on his own merits, we express deep gratitude and appreciation for a job well done. The trials of your tenure in office were infinite — we cannot begin to comprehend the demands made of the Man in the White House — and you, certainly, are one of the Titans.

Thanks, and God bless you, Mr. President!

The Safe Winter Driving League presents the above findings of the National Safety Council's Committee on Winter Driving Hazards. These tests, conducted on a glare ice course at Stevens Point, Wis., disclosed that conventional snow tires provided only a small improvement in pulling ability as compared with regular tires. Studded tires developed about three times the pull of regular tires, and reinforced tire chains developed about seven times the pull of regular tires.

Regardless of the type of traction device employed, however, the League reminds motorists that driving speeds on icy pavements must be sharply reduced.

Jan. 4, 1969

I am an Army nurse in one of our hospitals in Qui Nhon, Vietnam. On our days off, we go to villages to help the people. We not only provide medical care, but also distribute food, clothes, etc. Many of these people have never even seen a doctor.

Near here is a refugee camp, located from the north. The people came here rather than live under communist rule.

These are the poorest of God's poor. They brought nothing but the clothing on their back and a strong faith in God. They need everything — soap, boxes of food, clothing, etc. We are also collecting S&H, TV, Blue Chip stamps and BC coupons to purchase bedding. Could any of your readers help us?

I would be glad to write to any reader and give more information. Meanwhile, please remember all of us here in your prayers.

Sincerely,

WSBA BANQUET

The 20th annual WSBA banquet last night with Red Grange as the main speaker and Jim Murray as MC

Murray was one of the very best — and we have attended all 20 of them.

With us at the Newark Sport & Men's table were Sam Gibby, Jr., Bill Murray, Brandy Davis, Ernie Mettener, Winnie Mayer, Bones Eason, Swede Swedchen and Bill Wayman — and while all hand had a gala evening, proudest Vincent L. "Sheet Iron" Mayer enjoys these sports gatherings most of all. Winnie is one of the all-time Blue Hen great athletes.

### YOUNG MEN, HAVE YOU HEARD?

THE U. S. MARINE CORPS HAS NEW ENLISTMENT TERMS

The Marine Corps has modified its length of enlistments to meet an authorized 30,000 increase in personnel strength. This new expansion makes possible a two-year active duty assignment for a limited number of volunteers.

Now you can be an "active-duty Reservist." It works this way: you volunteer as a Reservist, serve only two years on active duty and then revert to an inactive Reserve status. Three and four year enlistments are also available.

Maybe you've thought you couldn't "make the grade" as a Marine. Well, 95 percent of the men who enlist do make it because they respond to the fine training and the exceptional spirit of the Corps.

You'll be proud to say: "I am a Marine."

### Turnberger Named Dixon's Successor As Football Coach

Gilmore B. Ott, principal of Christiana High School, announced the appointment of Robert J. Turnberger as head coach of the Christiana Viking football team for the 1969 season. Turnberger replaces Sam E. Dixon who resigned the position after two years.

Ott explained that Turnberger was appointed from among six applicants for the position because he is "an extremely well qualified individual and because he is very well acquainted with the coaching personnel conference operation and with the boys of the football team themselves."

The Christiana principal noted that Turnberger has been a member of the Viking squad for three years.

Turnberger was head football coach at Pleasantville (N.J.) High School from 1960 to 1962, and won the South Jersey, Cape Atlantic and Atlantic County championships and the South Jersey Coaches Award.

He was head baseball coach at Newark High School in 1963, and in the fall of that year became head football coach for Christiana.

His other football coaching duties include line coach for four years at Pleasantville, and line coach for three years, 1964-65, and 1968 with the Viking squad.

Turnberger has been head baseball coach at Christians since the first year the school was in session.

Concerning his appointment as head coach of the Viking eleven for the 1969 season, Turnberger said: "The motto of the football coaching staff at Christians High School for 1969 will be 'The will to win is not nearly as important as the will to prepare to win.' We are going to try in every way to prepare our boys for a competitive season."

Turnberger, a Navy veteran, is a 1959 graduate of Stroudsburg State College, Pa.

Former All-Conference quarterback at Forty-Fort (Pa.) High near Wilkes-Barre, Turnberger served in the Korean War, and later enrolled at West Chester State where he played football.

In addition to his coaching duties he has held positions as director of playgrounds in Pleasantville; waterfront instructor with the Aquatics Waterfront Administration; waterfront director at Camp Rodney; assistant manager of the Elsmere Swim Club, and manager of the Red Mill Swim Club.

Earl Shelsby, whose Outdoor Living column in the Baltimore Sunday Sun is one of the best anywhere, reports a recent foray to Ed Dowling's Pepe's electric generating plant at Chalk Point on Maryland's Patuxent River.

Dowling doesn't own the Pepe plant, by the way, but has long talked of pleasantly spending a winter day in catching fish at the site where the hot water discharged into the river attracts a reported concentration of fish — and some warmth may remain in the atmosphere as a result.

"My original intention was to just stop by to verify the reports of good catches of rock and white perch from the electric plant-warmed waters of the canal I heard they have been catching stripers that weighed as much as five pounds," Earl Shelsby writes.

"Realizing that rockfish have a way of growing rapidly once they are removed from the water, I like to see them as soon after they are caught as possible before I pass the word along to the readers."

When I reached the parking lot provided for fishermen by the company, it was full but I noticed a fisherman heading towards the lot from the canal. I decided to wait to see if he was leaving.

"The angler was weighted down with a large stringer of fish. Most of them were white perch, but there were five rock on the stringer. The

bait went about three pounds," Earl continues.

With the disclosure that the fish were biting on bloodworms, Earl tactfully toured the countryside in quest of these imported nibblers and returned to find the parking lot almost empty.

Down by the water, one of the few remaining fishermen informed Mr. Shelsby that the fish had "quit biting just after you left," and offered him an abundance of bloodworms.

"I watched as he jugged about

25 pounds of fish up the bank. He left his box of bloodworms on the bank. I thought about how precious they were a little while before when I was running all over the country trying to buy them," Earl continues.

"It looked like it was going to be another one of those days when the typical Shelsby luck would prevail.

"And for the next hour it continued to look that way but with dark approaching fast the tide began to move ... and I muscled in a perch that was at least eight inches. I started to throw it back, but thought that the fish might start biting again and I could get a mess."
